PART 42—LOANS AND DISCOUNTS

EXAMINATIONS AND REPORTS OF BORROWING AND REDISCOUNTING ORGANIZATIONS

Section 42.302 Title 6, Code of Federal Regulations, is hereby amended to read as follows:

§ 42.302 *Examinations and reports of borrowing and rediscounting organizations.* Federal intermediate credit banks shall require, as a condition precedent to making loans to or discounting paper for any eligible organization (other than a production credit association or bank for cooperatives, organized under the Farm Credit Act of 1933) its agreement to furnish to the bank and/or the Farm Credit Administration and/or any Farm Credit examiner at any time upon call, a detailed statement of its financial condition in such form as may be prescribed; and its agreement to submit, at its own expense, to periodic examinations by examiners for the Federal intermediate credit bank, by national bank examiners and/or by Farm Credit examiners; *Provided, however,* That any bank, trust company, or savings institution operating under the supervision of State or national banking authorities, in lieu of such agreement, may submit its authorization to such supervising authority, in writing, to furnish the Federal intermediate credit bank and/or the Farm Credit Administration upon request any report of condition or examination, or other confidential information in the possession of such supervising authority.

(Sec. 2, 42 Stat. 1458, 1459, as amended; 12 U.S.C. 1091, 1101; E.O. 6084, March 27, 1933)

PART 43—PRIVATELY CAPITALIZED FINANCING INSTITUTIONS

MISCELLANEOUS AMENDMENTS

Paragraph (a) of § 43.501, is hereby amended and, paragraph (e) of § 43.501, §§ 43.503, 43.504-1, and 43.504-2, Title 6, Code of Federal Regulations, are hereby added to read as follows:

§ 43.501 *Eligibility of institutions.* In order to be eligible to obtain credit from a Federal intermediate credit bank, a privately capitalized financing institution (other than a bank or a credit union) must meet the following requirements:

(a) *Incorporation and capitalization.* It must be incorporated with a paid-in and unimpaired capital commensurate with the volume of business it expects to handle and, in any event, not less than $10,000.

Ordinarily, such a corporation should have a minimum capital of $25,000 to enable it to handle a volume of business that will produce earnings sufficient to cover operating costs and establish reserves for possible losses.

* * * * *

(e) *Definition of capital and surplus.* Only that portion of a corporation's authorized and subscribed capital which has been paid for, and for which stock certificates are actually outstanding in the names of bona fide stockholders, plus such sums as have been definitely and regularly credited to surplus account and remain therein, may be regarded as capital and surplus for the purposes of this section. Undivided profits may not be treated as surplus, until actually set aside for that purpose; but such undivided profits and any reserves set up will, to the extent of the amount available, be recognized as an offset against losses or other items which otherwise might impair the corporation's capital or surplus.

§ 43.503 *General collateral requirements (financing institutions).* A financing institution (other than a commercial bank, or a bank for cooperatives organized under the Farm Credit Act of 1933) as a condition precedent to borrowing from or rediscounting with a Federal intermediate credit bank, is required to pledge as general collateral to any and all obligations to the bank, cash, United States Government securities, Federal Farm Mortgage Corporation bonds, Federal land bank bonds, Federal intermediate credit bank debentures, or other readily marketable securities of high rating, in an amount equal to a substantial portion of its capital. In the discretion of the Federal intermediate credit bank concerned, banking institutions also may be required (unless prohibited by law or by supervisory authority) to deposit general, acceptable collateral.

§ 43.504-1 *Substitution of direct obligations (financing institutions).* As an incident to the exercise of its specific powers, and as a step in the liquidation of paper discounted for or purchased from a privately-capitalized financing institution pursuant to the provisions of section 202 (a) (1) of the Federal Farm Loan Act, as amended (12 U.S.C. 1031), a Federal intermediate credit bank may accept from such financing institution, in substitution for any such paper which is overdue or otherwise in default, a direct promissory note of such institution secured by the pledge of bonds or other acceptable collateral.

§ 43.504-2 *Temporary advances to financing institutions.* Advances may be made to financing institutions, for temporary periods only, upon the basis of their direct notes secured by the pledge of bonds or other acceptable collateral, provided such advances are incident to the extension of credit by means of loans and discounts as contemplated by section 202 (a) (1) of the Act (12 U.S.C. 1031). Such advances shall be made only in cases where the bank finds that funds are required by the financing institution to enable it to close loans which are to be offered to the bank for discount or purchase, or as collateral for a loan or loans, pursuant to said section 202 (a) (1).

(Sec. 2, 42 Stat. 1455, 1459; 12 U.S.C. 1031, 1101; E.O. 6084, Mar. 27, 1933)

The designated buyer and the processor shall arrange the details of transfer of materials designated on the certificate, using such intermediary parties as the processor may designate. The processor who delivers such oilseed meal pursuant to a certificate shall file such certificate as required under the provisions of paragraph (d) (2).

If a processor elects not to honor a Certificate of Designated Buyer under the provisions of this paragraph, he shall return such certificate to the issuing office and he may dispose of the oilseed meal covered by the certificate free from the restrictions of this order: *Provided, however,* That the provisions of this paragraph shall not apply to oilseed meal required to be set aside by this order which has not heretofore been reported to the Director.

(c) *Existing contracts.* If this order makes it impossible for a processor to fill all of his contracts for the delivery of oilseed meal, which are in existence on the date of the issuance of this order, he shall not, by reason of this order, refuse to make delivery of more than 20 percent of the oilseed meal covered by any such contract.

(d) *Processor's reports*—(1) *Report of tonnage for July delivery for credit against August set aside.* If a processor wishes to make deliveries of oilseed meal pursuant to this order in July 1944 for credit against his set aside in August 1944, he must report to the Director in writing (or by telegraph) not later than July 25, 1944, the estimated tonnage of each kind of oilseed meal which will be available at each of his processing plants for delivery in July 1944 for such credit. Each processor may also submit such additional information as he deems pertinent to the allocation or distribution of oilseed meal to be set aside under this order.

(2) *Report of tonnage set aside and deliveries made.* Each processor subject to this order shall file a report with the Director on FPA Form 2 not later than September 10, 1944, for each plant operated by him. Certificates of Designated Buyers, pursuant to which oilseed meal has been delivered, shall be attached to and made a part of FPA Form 2.

(e) *Certificates issued by County Agricultural Conservation Committees.* No County Agricultural Conservation Committee shall issue Certificates of Designated Buyers unless authorized to do so by its State Agricultural Conservation Committee.

(f) *Release of oilseed meal set aside under prior orders.* Any processor who has on hand oilseed meal, which has been reported pursuant to any set aside order prior to War Food Order No. 9–10 [1] as set aside for sale and delivery to designated buyers and for which the processor has received no shipping instructions from the designated buyers prior to the issuance of this order, may sell and deliver such oilseed meal free from the restrictions of the order under which it was set aside.

CURRENT REPORTS AND PROHIBITION OF TRADING

Amendment to rule relating to current reports to be filed and adoption of rule prohibiting trading during suspension of trading on a national securities exchange.

The Securities and Exchange Commission, deeming it necessary for the exercise of the functions vested in it and necessary and appropriate in the public interest and for the protection of investors so to do, pursuant to authority conferred upon it by the Securities Exchange Act of 1934, particularly sections 2, 13, 15 and 23 (a) thereof, hereby takes the following action:

§ 240.13A-6 *Current reports.* * * *

(e) A current report shall be filed by the registrant whenever its board of directors (or persons performing similar functions) decide to declare a dividend or distribution to the holders of any class of securities of such registrant, either with or without consideration, partly or wholly in the form of (1) an asset other than cash, stock, or a warrant or right to subscribe to or purchase stock, or (2) anything evidencing a right to receive such an asset. Such current report shall be filed promptly by confirmed telegram sent not later than midnight of the same day. The telegram shall be filed with each exchange on which any security of the registrant is registered and with the Commission, and the confirmation shall be filed with each such exchange and in triplicate with the Commission. Both the telegram and the confirmation may be filed in any form and shall contain a full and accurate description of the contemplated dividend or distribution. Whenever the terms of such contemplated dividend are changed in any material respect prior to the actual declaration of the dividend or distribution, and in any event upon such actual declaration, a supplementary report shall be filed, in the same manner and within the same time, bringing up to date the information contained in the report or reports previously filed under this paragraph.

II. The following new § 240.15C2-2 (Rule X-15C2-2) is adopted:

Except as otherwise expressly provided, the amendments made by this title shall be applicable only with respect to taxable years begining after December 31, 1943.

PAR. 6. Section 35.711 (a)–2, as amended by Treasury Decision 5361, approved April 20, 1944, is further amended by striking out the first sentence of the second paragraph immediately following the first example and inserting in lieu thereof the following:

For the exclusion of nontaxable income from exempt excess output of mines and timber blocks provided in section 735 in the case of a producer of minerals or a producer of logs or lumber from a timber block, or in the case of a lessor of a mineral property, a coal mining or iron mining property, or a timber block, as defined in section 735, for the exclusion of nontaxable income from exempt excess output provided in section 735 in the case of a natural gas company as defined in section 735, and for the exclusion of nontaxable bonus income provided in section 735 in the case of a producer of minerals or a producer of logs or lumber from a timber block as defined in section 735, see section 711 (a) (1) (I), as amended by Public Law 172 (78th Congress, 1st Session), approved October 26, 1943, and by section 208 (d) of the Revenue Act of 1943. The exclusion for nontaxable income from exempt excess output in the case of a producer of minerals from, or a lessor of, a coal mining or iron mining property which was not in operation during the base period as defined in section 735, and in the case of a producer of logs or lumber from, or a lessor of, a timber block which was not an operation unit existing as of December 31, 1941, or which was not in operation during the base period, shall be applicable only with respect to taxable years beginning after December 31, 1943. A lessor of a mineral property, a coal or iron mining property, or a timber block is not entitled to the benefit of the exclusion for nontaxable bonus income.

PAR. 7. Section 35.711 (a)–4 (a) is amended by striking out the last sentence and inserting in lieu thereof the following:

The tax under section 710 (a) (1) (B) for a taxable year of less than 12 months is determined on the basis of the actual normal tax and surtax for the taxable year, and on the basis of the corporation surtax net income for such year computed for the period for which the return was made without placing the net income on an annual basis and with the proper adjustments under that section with respect to such year.

PAR. 8. Section 35.711 (b)–1 is amended by changing that part designated as (2) of the first paragraph immediately following the first example to read as follows:

(2) If the excess profits tax taxable year begins on or after January 1, 1943,

the capital loss carry-over provided in section 117 (e) (1), as amended by the Revenue Act of 1942, shall be applicable to net capital losses for taxable years beginning after December 31, 1934, and for the purpose of determining such carry-over capital gains and losses shall be determined as if the provisions of section 23 (g) (2) and (k) (2) and section 117 of the Code, as amended by the Revenue Acts of 1942 and 1943 (not including section 117 (k) (1), were applicable to all such years, and if the excess profits tax taxable years begin on or after January 1, 1944, as if section 117 (k) (1) of the Code, as added by section 127 of the Revenue Act of 1943, were also applicable to all of such years.

PAR. 9. There is inserted immediately preceding § 35.718–1 the following:

SEC. 121. REORGANIZATION OF CERTAIN INSOLVENT CORPORATIONS. (Revenue Act of 1943, Title I.)

* * * * *

(d) *Technical amendments.*

* * * * *

(6) Section 718 (a) (6) (A) is amended by striking out "112 (b) (3), (4), or (5), or so much of section 112 (c), (d), or (e) as refers to section 112 (b) (3), (4), or (5)" and inserting in lieu thereof "112 (b) (3), (4), (5), or (10), or so much of section 112 (c), (d), or (e) as refers to section 112 (b) (3), (4), (5), or (10)".

(e) *Effective date.* Provisions having the effect of the amendments made by * * * subsection (d) * * * (6), shall be deemed to be included in the revenue laws respectively applicable to taxable years beginning after December 31, 1933, but shall not affect any tax liability for any taxable year beginning prior to January 1, 1943. * * *

PAR. 10. Section 35.718–4 (b) is amended as follows:

(A) By striking the phrase "section 112 (b) (3), (4), or (5), or so much of section 112 (c), (d), or (e) as refers to section 112 (b) (3), (4), or (5)" wherever it appears, and inserting in lieu thereof "section 112 (b) (3), (4), (5), or (10), or so much of section 112 (c), (d), or (e) as refers to section 112 (b) (3), (4), (5), or (10)".

(B) By inserting immediately following the third sentence of that portion of the paragraph preceding the example the following new sentence: "The application of section 112 (b) (10), or so much of section 112 (c), (d), or (e) as refers to section 112 (b) (10), to an exchange involving the acquisition of equity invested capital shall not affect any tax liability for any taxable year beginning prior to January 1, 1943."

PAR. 11. Section 35.721–4 is amended by changing that portion of the first paragraph immediately preceding and including the colon, which follows immediately after example (2) to read as follows:

For any taxable year for which the excess profits tax or the increase in excess profits tax is determined under section 721 (c), the excess profits tax, if computed pursuant to the provisions of section 710 (a) (1) (B), shall be an amount which when added to the normal tax and surtax for the year is equal to 80 percent of the corporation surtax net income for such year determined under section 15 or Supplement G of Chapter 1 (relating to insurance companies) and properly adjusted pursuant to the provisions of section 710 (a) (1) (B) which are applicable to such year. As to the adjustments to be made to corporation surtax net income pursuant to the provisions of section 710 (a) (1) (B), see § 35.710–4. For the purposes of the computation provided by section 710 (a) (1) (B) in case of a determination under section 721 (c), the normal tax and surtax, and the corporation surtax net income prior to adjustment, shall be computed as follows:

PAR. 12. Section 35.721–5 is amended as follows:

(A) By striking out the first two sentences of the second paragraph and inserting in lieu thereof the following:

The excess profits tax is determined as the lesser of the amounts computed under section 710 (a) (1) (A) and section 710 (a) (1) (B). Under section 710 (a) (1) (A), the tax for years beginning prior to January 1, 1944 is 90 percent of the adjusted excess profits net income, and for years beginning after December 31, 1943, is 95 percent of the adjusted excess profits net income. Under section 710 (a) (1) (B), the excess profits tax is an amount which when added to the normal tax and surtax for the year is equal to 80 percent of the corporation surtax net income for such year properly adjusted pursuant to the provisions of that section applicable to such year.

(B) By changing the third, fourth, and fifth sentences in the third paragraph to read as follows:

The excess profits tax for 1945 computed without the application of section 721 (d) (1) is $147,500. Under section 721 (d) (1), the excess profits tax is determined to be $119,000. If only $20,000, instead of $50,000, had been included as net abnormal income in the gross income for 1945, the excess profits tax for that year without the application of section 721 (d) (1) would be $119,000.

(C) By changing the first example following the fourth paragraph to read as follows:

Example. A taxpayer, on the calendar year basis, has net abnormal income for 1941, of which $10,000 is attributed to 1945, and net abnormal income for 1942, of which $20,000 is also attributed to 1945. The tax for 1945, before the application of section 721 (d) (1), is $95,000. The adjusted excess profits net income for 1945 is $100,000, and the gross income and other amounts necessary to determine this amount are such that a decrease in gross income (if such decrease is $100,000 or less) causes a decrease of an equal amount in adjusted excess profits net income. For the purpose of applying section 721 (d) (1) to 1945, computations under (a) and (b) are first made only with respect to the $10,000 attributed from 1941, and the $20,000 attributed from 1942 is not considered net abnormal income. Upon this computation, the tax under (a) is $95,000. The tax under (b) (1), determined by excluding $10,000 from gross income, is $85,000. Assuming that the amount determined under (b) (2) with respect to the $10,000 net abnormal income is $4,750, the excess profits tax would then be determined under (b) as $90,250, a lesser amount than the $95,000 computed under (a). The computations under (a) and (b) are then made with respect to the $20,000 attributed from 1942. For this purpose, the tax under (a) is considered to be the $90,250 amount computed with respect to the net abnormal income attributed from 1941. For the purposes of (b), the taxpayer is considered to have such gross income and other items of deductions and credits as would produce the tax of $90,250 determined with respect to the net abnormal income attributed from 1941. That is, the gross income is considered reduced by $5,000, the items of deductions and credits remaining the same, so that the adjusted excess profits net income is reduced to $95,000, on which amount the tax would be $90,250. The exclusion of $20,000 from that amount of gross income which would produce $95,000 adjusted excess profits net income would reduce such adjusted excess profits net income to $75,000, on which the tax is $71,250, and this $71,250 amount is considered the tax under (b) (1) determined by excluding the $20,000 from gross income. Assuming that the amount determined under (b) (2) with respect to the $20,000 net abnormal income is $18,000, then the tax finally determined under section 721 (d) (1) for the future taxable year would be $89,250, the sum of $71,250 and $18,000, which is a lesser amount than the $90,250 determined under (a).

PAR. 13. Section 35.722–2 (d) is amended to read as follows:

(d) *Normal output and normal unit profit in case of producers of minerals or timber, natural gas companies, and lessors of mines or timber blocks.* Nontaxable income from exempt excess output of mines or timber blocks or from natural gas properties determined under section 735 (relating to nontaxable income from certain mining and timber operations, and from natural gas properties) may be excluded under section 711 (a) (1) (I) from the excess profits net income of a taxpayer for which there is established under section 722 a constructive average base period net income. For the purposes of computing nontaxable income from exempt excess output under section 735 in such a case, there shall be determined with respect to each mineral property as defined in section 735 (a) (6), coal or iron mining property set forth in section 735 (b) (2) and defined in § 35.735–2 (1), or timber block as defined in section 735 (a) (8), in which an economic interest is owned by the taxpayer, and with respect to the natural gas property of the taxpayer as defined in section 735 (a) (5), a fair and just amount to be used as the normal output as defined in section 735 (a) (4). With respect to such mineral property or coal or iron mining property there shall also be determined a fair and just amount to be used as the normal unit profit as defined in section 735 (a) (9). However, no amounts representing a fair and just normal output or normal unit profit for such base period shall be established for any mineral property, coal or iron min-

ing property, timber block, or natural gas property unless the constructive average base period net income under section 722 is predicated in whole or in part upon normal earnings attributable directly to such mineral property, coal or iron mining property, timber block, or natural gas property, and unless such property or block satisfies the requirements of section 735 with respect to the taxable year for which the benefits of section 735 are claimed. A normal output and a normal unit profit may be established for a mineral property, coal or iron mining property, or timber block in which an economic interest is owned by the taxpayer, or for a natural gas property owned by the taxpayer, despite the fact that such taxpayer came into existence after December 31, 1939, if such property or block meets the requirements provided in the preceding sentence and if the relief determined with respect to such taxpayer under section 722 is predicated in whole or in part upon normal earnings attributable directly to such property or block.

PAR. 14. Section 35.722–5 (b) (26) (a) is amended to read as follows:

(a) Normal output during the base period, as defined in section 735 (a) (4),

PAR. 15. Section 35.726–1 (b) is amended by striking out that portion of the first paragraph immediately following the second sentence and inserting in lieu thereof the following:

The tentative tax under section 726 (b) (1), as is the case with respect to the tax computed under section 710, shall be the lesser of:

(1) An amount equal to 90 percent of the adjusted excess profits net income in the case of taxable years beginning prior to January 1, 1944, or 95 percent of the adjusted excess profits net income in the case of taxable years beginning after December 31, 1943 (section 710 (a) (1) (A)), or

(2) An amount which when added to the sum of the normal tax and surtax for the taxable year equals 80 percent of the corporation surtax net income computed under section 15 (a) and properly adjusted pursuant to the provisions of section 710 (a) (1) (B) applicable to the taxable year involved.

If the tentative tax is computed under section 710 (a) (1) (B) and clause (2) of the immediately preceding sentence, the normal tax and surtax for such purposes shall be the actual normal tax and surtax computed under Chapter 1 and shall be determined by using as the credit under section 26 (e), in computing normal tax net income and corporation surtax net income, the amount of which the tax computed under section 726 (b) pursuant to the provisions of section 710 (a) (1) (A) is 90 percent in the case of taxable years beginning prior to January 1, 1944, or 95 percent in the case of taxable years beginning after December 31, 1943. The corporation surtax net income for the purposes of section 710 (a) (1) (B) and clause (2) above, properly adjusted pursuant to the provisions of section 710 (a) (1) (B), shall be increased by the amount of any payments made, or to be made, to the United States Maritime Commission with respect to contracts or subcontracts subject to the provisions of section 505 (b). For the computation of tax under section 710 (a) (1) (B), see § 35.710–4 (a) and (c).

PAR. 16. There is inserted immediately preceding § 35.727–1 the following:

SEC. 209. EXEMPT CORPORATIONS. (Revenue Act of 1943, Title II.)

(a) *Corporations subject to Title IV of the Civil Aeronautics Act of 1938.* Section 727 (h) (exempting certain corporations subject to Title IV of the Civil Aeronautics Act of 1938) is amended by adding at the end thereof the following new sentence: "Such exclusion from gross income for such year shall also be made in computing the unused excess profits credit adjustment for any other taxable year, but only for the purpose of determining whether the corporation is exempted by this subsection from the tax imposed by this chapter for such other taxable year."

(b) *Retroactive effect.* The amendment made by this section shall be effective as if it were a part of the Excess Profits Tax Act of 1940 on the date of the enactment of such Act.

PAR. 17. Section 35.727–1 is amended as follows:

(A) Paragraph (d) is amended to read as follows:

(d) A corporation which claims exemption under section 727 (h) shall attach to its income tax return for the taxable year for which exemption is claimed a statement showing for such taxable year (1) that it is subject to the provisions of Title IV of the Civil Aeronautics Act of 1938, (2) the amount of the compensation included in the gross income of the corporation as compensation received from the United States for the transportation of mail by aircraft, and (3) the computation and the amount of its gross income, net income, excess profits net income, excess profits credit, and adjusted excess profits net income, after excluding from its gross income the amount of such compensation received from the United States, including a separate computation of its unused excess profits credit adjustment for such year containing the information required by this subsection with respect to each taxable year entering into the computation of such unused excess profits credit adjustment.

(B) The first paragraph of paragraph (e) is amended to read as follows:

(e) If any corporation described in subsection (e), (g), or (h) of section 727 is a member of an affiliated group of corporations filing consolidated returns under section 141, such corporation shall not be exempt under section 727 for such year.

PAR. 18. There is inserted immediately preceding § 35.731–1 the following:

SEC. 207. STRATEGIC MINERALS. (Revenue Act of 1943, Title II.)

(a) *In general.* Section 731 (relating to corporations engaged in mining certain strategic minerals) is amended by inserting after "tungsten," the following: "fluorspar, flake graphite, vermiculite,".

(b) *Taxable years to which applicable.* The amendment made by subsection (a) insofar as it relates to flake graphite shall be applicable with respect to taxable years beginning after December 31, 1942.

SEC. 201. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1943, Title II.)

Except as otherwise expressly provided, the amendments made by this title shall be applicable only with respect to taxable years beginning after December 31, 1943.

PAR. 19. Section 35.731–1 (a) is amended to read as follows:

(a) The portion of the adjusted excess profits net income of a domestic corporation engaged in mining within the United States the following minerals (all of which are hereinafter referred to as strategic minerals) and attributable to such mining shall be exempt from excess profits tax: antimony, chromite, manganese, nickel, platinum, quicksilver, sheet mica, tantalum, tin, tungsten, vanadium; flake graphite with respect to taxable years beginning after December 31, 1942; or fluorspar or vermiculite with respect to taxable years beginning after December 31, 1943. The excess profits tax on the remaining portion of such adjusted excess profits net income is an amount which bears the same ratio to the excess profits tax computed without regard to section 731 as such remaining portion bears to the entire adjusted excess profits net income. The excess profits tax shall be the lesser of:

(1) An amount equal to 90 percent of the adjusted excess profits net income in the case of taxable years beginning before January 1, 1944, or 95 percent of the adjusted excess profits net income in the case of taxable years beginning after December 31, 1943 (section 710 (a) (1) (A)), or

(2) An amount which when added to the sum of the normal tax and surtax for the taxable year equals 80 percent of the corporation surtax net income computed under section 15 (a) and properly adjusted pursuant to the provisions of section 710 (a) (1) (B) applicable to the taxable year involved. If the excess profits tax computed without regard to section 731 is determined under section 710 (a) (1) (B) and clause (2) of this paragraph, the normal tax and surtax for such purposes shall be determined by using as the credit under section 26 (e) in computing normal tax net income and corporation surtax net income, the amount of which the tax computed pursuant to sections 710 (a) (1) (A) and 731 upon the adjusted excess profits net

income other than from mining strategic minerals is 90 percent in the case of taxable years beginning before January 1, 1944, or 95 percent in the case of taxable years beginning after December 31, 1943.

For the computation of the excess profits tax for taxable years beginning in 1943 and ending in 1944, see § 35.710–4 (b).

PAR. 20. Section 35.736 (a)–1 (b) (3) is amended by changing the third and fourth sentences to read as follows:

In computing the net debit amount of such accounts for the installment base period there shall be allowed as credits not only payments, trade-ins, and returns and allowances but also the amount of installment accounts receivable which have been allowed as a deduction under section 23 (k) of the Internal Revenue Code or a corresponding provision of a prior revenue law. With respect to the taxable year for which eligibility for relief under section 736 (a) and this section is being determined, in addition to the credits for payments, trade-ins, and returns and allowances, there shall be allowed as a credit the amount of installment accounts receivable which have been allowed as a deduction under section 23 (k) of the Internal Revenue Code.

PAR. 21. Section 35.736 (a)–3 is amended as follows:

(A) By changing the second sentence of the second paragraph to read as follows: "The deduction for bad debts under section 23 (k) shall be allowed only with respect to specific debts."

(B) By changing the fourth sentence of the second paragraph to read as follows:

Only those debts which are allowed as a deduction in the computation of net income for the purposes of the income tax under Chapter 1 for the taxable year shall be allowed in the determination of the bad debt deduction for excess profits tax purposes under section 736 (a).

(C) By striking out the last sentence of the sixth paragraph and inserting in lieu thereof the following:

For the purposes of determining the excess profits tax under section 710 (a) (1) (B) as an amount which when added to the normal tax and surtax for the taxable year equals 80 percent of the corporation surtax net income properly adjusted pursuant to the provisions of section 710 (a) (1) (B) applicable to such taxable year, the corporation surtax net income shall include income from installment sales computed upon the straight accrual basis described in this section, the credit for dividends received used in computing corporation surtax net income shall be limited to 85 percent of the net income which shall include income from installment sales computed upon such straight accrual basis, and the normal tax and surtax shall be the actual normal tax and surtax determined under Chapter 1.

PAR. 22. Section 35.736 (b)–3 is amended as follows:

(A) By changing the first sentence of the fourth paragraph of paragraph (a) thereof to read as follows:

The excess profits tax may be computed under section 710 (a) (1) (B) as an amount which when added to the normal tax and surtax computed under Chapter 1 for the taxable year equals 80 percent of the corporation surtax net income properly adjusted under the provisions of section 710 (a) (1) (B) applicable to such year.

(B) By changing the second sentence immediately following (i) of paragraph (c) to read as follows:

If the excess profits tax is computed pursuant to an election under section 736 (b), such income is the amount of which the excess profits tax computed under section 710 (a) (1) (A) is 90 percent in the case of taxable years beginning prior to January 1, 1944, or 95 percent in the case of taxable years beginning after December 31, 1943.

PAR. 23. The first paragraph of § 35.760–1 (b) (1) is amended by striking the word "and" at the end of subdivision (v), by renumbering as (vii) the subdivision designated as (vi), and by inserting immediately preceding the subdivision renumbered as (vii) the following:

(vi) The application of section 113 (a) (22) to property acquired in a taxable year beginning after December 31, 1933, in a reorganization of a corporation resulting from certain receivership and bankruptcy proceedings (in the case of excess profits tax taxable years beginning after December 31, 1942); and

PAR. 24. Section 35.761–1 (a) (2) is amended by changing that portion thereof immediately preceding the first complete sentence to read as follows:

(2) A provision of law is applicable prescribing the nonrecognition of gain or loss in whole or in part upon such receipt, including a provision of the regulations applicable to a consolidated income tax return or a consolidated excess profits tax return, but not including the provisions of section 112 (b) (7) of the Revenue Act of 1938 relating to certain complete liquidations occurring during December 1938, the provisions of section 112 (b) (7) of the Internal Revenue Code relating to certain complete liquidations occurring during some one calendar month in 1944, the provisions of section 112 (b) (9) relating to certain complete liquidations of railroad corporations, or the provisions of section 112 (b) (10) relating to reorganizations of corporations in certain receivership and bankruptcy proceedings.

(Sec. 62 I.R.C. (53 Stat. 32; 26 U.S.C. 62) as made applicable by sec. 729 (a), I.R.C. (54 Stat. 989; 26 U.S.C. 729 (a)), and secs. 121 (d) (6), 121 (e), 201, 207, 208 (d), (e), and (f), and 209, Revenue Act of 1943 (Pub. Law 235, 78th Cong.) enacted Feb. 25, 1944)

Subchapter A—General Provisions

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1, as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 903—DELEGATIONS OF AUTHORITY

[Directive 24, Interpretation 1]

HOUSING CONSTRUCTION COVERED BY THE SCHEDULES TO DIRECTIVE 24

The following interpretation is issued with respect to Directive 24:

Directive 24 describes the kind of action which the National Housing Agency and its constituent operating agencies (Federal Housing Administration, Federal Public Housing Authority, and Home Owners' Loan Corporation) can take with respect to housing construction. Schedules A and B to Directive 24 set forth what is meant by housing construction for this purpose. If the construction is covered by Directive 24, persons (other than government units) who want permission to build should make application to the Federal Housing Administration on Form WPB-2896. Local public housing authorities apply on Form WPB-2896 to the FPHA. If the construction is not covered by Directive 24, Order L-41 will explain how to get permission to do the building. Schedules A and B of Directive 24 merely tell what kind of construction is reviewed by the National Housing Agency. They do not define residential construction for any other purpose. For example, Conservation Order L-41 establishes a dollar limit of $200 for residential construction which may be performed without permission. Schedules A and B have no bearing on the meaning of residential construction in L-41 for the purpose of determining the necessity for permission.

(a) *Room count and floor area.* Jurisdiction over hotel construction is determined by the number of rooms as provided in paragraph (c) of Schedule A. In cases of remodeling or additions, this room count should be applied to the completed structure and not to the structure before the remodeling or addition is made. Jurisdiction over new construction of structures which are partly commercial and partly residential depends on the percentage of floor area devoted to each use under paragraph (a) (3) of Schedule B. In cases of remodeling and additions, a change in the percentage of floor area devoted to living accommodations is sometimes involved. In such cases the determination of jurisdiction should be made on the basis of the floor area being remodeled or added, and should not be made on the basis of the floor area of the whole structure as it will be after completion of the remodeling or additions (see also paragraph (e) (2) (ii) of this Interpretation). Furthermore, if the remodeling or addition is wholly commercial, paragraph (h) of Schedule A applies; and if it is wholly residential, paragraph (a) (4) of Schedule B applies.

(b) *Farm housing.* As provided in paragraph (a) of Schedule A, farm housing is not covered by Directive 24. Whether a project is farm housing or other residential construction is ordinarily determined by its location. A farm house is a structure built on the farm and used primarily for housing agricultural workers required in the operation of that farm. A farm is a place primarily used for raising crops, livestock, dairy products, poultry, etc., for the market. A suburban house with a victory garden is not a farm. Except in unusual cases a place of less than five acres will not be considered a farm. Housing built off a farm for the purpose of housing farm laborers would not be farm housing. Housing constructed on a farm for the purpose of housing nonfarm workers would likewise not be farm housing, since running the rooming house or apartment house would be a separate nonfarming enterprise.

(c) *Institutional housing.* As provided in paragraph (d) of Schedule A, institutional housing is not covered by Directive 24. Housing which is owned or operated by an institution (whether or not it is rented to the occupant) primarily for accommodating its personnel, is institutional housing. The term includes, for example, a house being built by a church for a parson, or housing owned or operated by a university for its professors or other employees.

(d) *Housing for petroleum operators.* (Paragraph (f) of Schedule A). Application

shall be made to the Petroleum Administration for War under P–98–b for housing to be built on or immediately adjacent to a "lease" (land where petroleum resources are being explored, developed, or depleted), or on an oil pipe line in a remote area, either by the operator for occupancy by his employees or by an employee for his own occupancy. Applications must be filed under P–55–c for all other types of housing needed in the Petroleum industry, including housing for refineries and other plants, and for petroleum distribution outlets.

(e) *Commercial establishments.* In many cases commercial establishments and dwelling units are either part of the same structure or are separate buildings which are part of the same project. The general rule is that for a single project only one application need be filed. Paragraph (h) of Schedule A and paragraphs (a), (b) and (g) of Schedule B tell how to determine whether or not a project containing commercial establishments is essentially a housing project for which a WPB–2896 should be filed.

(1) *New project.* New construction in which more than 50% of the floor area of each structure provides dwelling accommodations is a housing project under paragraph (a) (3) of Schedule B. In addition separate commercial establishments to serve the housing project may be constructed under the housing authorization if they meet the conditions of paragraph (g) of Schedule B. One of the conditions set forth in subparagraph (1) states that the commercial establishments must be "an integral part of" the housing project. This means that the commercial establishments must be located at or adjacent to the site of the dwelling accommodations, must be owned by the owner of the dwelling accommodations and must be part of the project as approved or as amended, providing the amendment is made before the dwelling accommodations have been completed. The building of separate structures for commercial purposes as an addition to a completed residential project is not housing construction. (See paragraph (b) of Schedule B).

(2) *Existing structures.* If an existing structure is being altered by remodeling or making additions so that the building will, when complete, include dwelling accommodations and commercial establishments, the remodeling or addition is a housing project under the following conditions:

(i) When the proposed construction involves the creation of additional dwelling units only. It is a housing project whether or not most of the floor area of the structure after remodeling is for commercial use. (See paragraph (a) (4) of Schedule B). However, if the proposed construction involves only space to be used for commercial purposes the construction is not a housing project. (See paragraph (h) of Schedule A).

(ii) If the addition or remodeling is partly for residential purposes and partly for commercial purposes the construction is a housing project only if more than 50% of the floor area of the addition or of the part of the structure being remodeled is to be used for dwelling accommodations. (See paragraph (h) of Schedule A and paragraph (a) (3) of Schedule B).

(f) *Accommodations for transient workers.* Bunk houses and similar accommodations built by employers for transient workers such as train and engine crews who need living accommodations at division points and terminals during a lay-over period or for maintenance of way workers are housing construction covered by paragraph (a) (2) of Schedule B and not by paragraph (c) or (d) of Schedule A if the accommodations are intended for a fixed location. Trailers and other mobile housing units for transient workers are not housing construction and are covered by paragraph (e) of Schedule A.

(g) *Repair.* Preference ratings for maintenance and repair of houses are available under the provisions of CMP Reg. 5 or 9A, Order L–79, or other WPB Orders or Regulations. No applications for priorities assistance for maintenance and repair may be approved on Form WPB–2896 if other orders are adequate.

(1) CMP Reg. 9A provides repairmen with an allotment symbol and preference rating equivalent to the rating available under P–55–c for use in obtaining materials within the quantity limitations specified in the Regulation. However, if the applicant proposes to do his own work and cannot be considered as a person "in the business of making repairs", he is not entitled to use CMP Reg. 9A authorization.

(2) CMP Reg. 5 provides that a person managing property for profit may use an AA–5 rating to get materials for maintenance and repair.

(3) Order L–79 authorizes repairs and replacements for plumbing and heating equipment subject to certain limitations.

(4) CMP Regs. 4 and 9 authorize warehouses and retailers to sell limited quantities of steel in the controlled material form and copper wire on unrated orders.

The National Housing Agency may consider applications on Form WPB–2896 for priorities assistance for maintenance and repair where (i) none of the above orders and regulations are sufficient to provide the needed materials and (ii) the maintenance and repair relates to housing covered by Schedule B of Directive 24.

Issued this 8th day of July 1944.

S. W. ANDERSON,
Program Vice Chairman.

Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–564]

ROSENBERG IRON & METAL CO.

Isadore Louis Rosenberg, doing business as Rosenberg Iron & Metal Co., at 2450 Harrison Street, San Francisco, California has engaged in the business of buying and selling iron and steel.

During the period from May 11, 1943, through November 1, 1943, Mr. Rosenberg placed orders purporting to be authorized controlled material orders for more than 600 tons of steel for which he had received no allotment of controlled materials. Such of these acts as took place after May 28, 1943, constituted violations of CMP Regulation No. 1. In placing these orders, he made false and misleading statements to his suppliers and to the War Production Board.

In or about October, 1943, and November, 1943, Mr. Rosenberg delivered approximately 176 tons of steel which he was not required or permitted to deliver under the provisions of CMP Regulation No. 4. This was a violation of CMP Regulation No. 4 and of General Preference Order M–21.

On or about November 22, 1943, Mr. Rosenberg made false statements concerning his transactions in steel to representatives of the War Production Board. Mr. Rosenberg was aware, or from his business experience should have been aware, of CMP Regulations 1 and 4, Priorities Regulation No. 1 and of Order M–21; his violation of CMP Regulations 1 and 4 and of Order M–21 must be deemed wilful. These violations have diverted critical materials to uses unauthorized by the War Production Board and have hampered and impeded the war effort of the United States. The false statements made by Mr. Rosenberg subject him to administrative action under the provisions of CMP Regulation 1 and of Priorities Regulation 1. In view of the foregoing, it is hereby ordered, that:

§ 1010.564 *Suspension Order No. S–564.* (a) Isadore Louis Rosenberg, doing business as Rosenberg Iron & Metal Co., individually or under any other name, his successors and assigns, shall not either independently or for the account of another directly or indirectly buy, sell, or otherwise deal in steel as defined in General Preference Order M–21, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Isadore Louis Rosenberg, doing business as Rosenberg

Iron & Metal Co., individually or under any other name, his successors or assigns, from any restriction, prohibition, or provisions contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on July 7, 1944, and shall continue in effect until December 31, 1944.

Issued this 27th day of June 1944.

WAR PRODUCTION BOARD,

Recording Secretary.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 13, as Amended July 8, 1944]

§ 944.34 *Priorities Regulation 13*—(a) *Purpose of this regulation.* This regulation, in general, describes the rules under which materials may be sold by persons who are not in the regular business of selling such materials. While most sales of this kind will be sales of frozen, idle, or excess materials the regulation also covers any sale from inventory by such persons. For example, a person who has idle materials on hand because his business has been converted to war work, or because the business he used to carry on has been stopped or limited by War Production Board orders, or whose contract has been cancelled or changed, may sell off the idle or excess materials only under the rules in this regulation and, if he follows this regulation, he does not have to look at any other order or regulation except in a few cases which are described in paragraph (f) (2) below. This regulation also controls liquidation sales, bankruptcy sales, general auction sales, and other special sales, as defined in paragraph (b) (1).

(b) *Special definitions used in this regulation.* This regulation deals only with "special sales" of "industrial materials" or "finished products." As used in the regulation, those terms have the following meanings:

(1) "Special sale" means a sale of a material or product by a person who does not, in the regular course of his business, sell it in that form. For example, if a manufacturer sells the raw material he has bought to use in making his regular product, it is a special sale because selling raw material is not his regular business. Or, if a contractor has bought building materials and equipment to build a building and cannot finish it and sells them, that is a special sale because his business is building houses, not selling lumber and nails and lighting fixtures. Liquidation sales by trustees in bankruptcy, receivers and other kinds of liquidators (unless they are continuing to operate a business) and sales by general auctioneers are special sales as that type of person is not considered to be regularly in the business of selling any particular products.

(2) "Material" means any commodity, equipment, accessory, part, assembly, or product of any kind. It includes both "industrial materials" and "finished products."

(3) "Industrial materials" means the simple kinds of materials that finished products are made out of. It includes simple material forms like pipe, metal sheet and rod, wire, lumber, chemicals, nails, nuts and bolts. These are things that are bought for use in making something else, or are to be put together with other things to make a finished product.

(4) "Finished products" means completed articles which are ready for use just as they are and which do not need to be put together with something else before they can be used. It includes wrenches and hammers, assembled parts, replacement parts and products like tools, machinery, motors, valves, drums and fabricated industrial, agricultural or household equipment. Other examples of what it includes are clothing, furnishings, light bulbs, etc.

(5) "Used materials" means any industrial materials or finished products which have been put into actual use.

(6) Materials not covered by this regulation. There are three types of materials which are not covered by this regulation. They are the following:

(i) Scrap. This includes both scrap normally generated in production and other material which is sold as scrap. There are special orders covering certain types of scrap and except in those cases scrap may be sold to a scrap dealer.

(ii) Rationed products which are controlled by another government agency.

(iii) Foods for humans or animals, medicines, tobacco, oils and fats, petroleum and petroleum products including natural and liquefied petroleum gases.

(c) *Kinds of special sales which may be made.* If a person wants to make a "special sale" (as described above), the rules in this regulation apply and only these rules. There is no need to look at any other order or regulation, and these rules must be followed, no matter how the material was bought, and no matter what any other order or regulation provides. The only exceptions to this rule are stated in paragraphs (f) (2) and (3). The types of special sales which may be made are the following:

(1) *Materials not on Lists A or B.* (i) Industrial materials not on List A may be sold freely to anyone.

(ii) Finished products not on List B may be sold freely to any producer who makes such a product in the form in which the holder has it, or to a wholesaler whose regular business is selling that sort of a product either to industrial users or to other distributors for resale. They also may be sold to anyone else on a rating of AA-5 or higher. If a holder has a total of not more than $100.00 worth of the particular finished product he wants to sell, he may sell it freely to anyone. In deciding whether he has $100.00 worth, he must count all products of the same type and style. For example, all wrenches, or chairs or ash cans. This does not mean that a person may sell freely separate lots worth less than $100.00 if he has more than that amount. It only allows the sale if all he has of that product is worth $100.00 or less. A holder may also make a special sale of a finished product which is not on List B if he obtains permission from the War Production Board as explained below in paragraph (c) (2) (iii).

(2) *Materials on List A or List B.* If the material that the holder wants to sell is one of the industrial materials listed on List A or is a finished product appearing on List B, the following are the only kinds of sales that can be made.

(i) Sales may be made in accordance with List A or List B. Those lists have four columns showing classes of buyers who might want to buy materials. Opposite each material on the lists in each column is shown whether, and under what conditions, sales can be made to the class of buyer described in the heading of the column.

(ii) A holder may sell freely to one of the following Government corporations, or to anyone buying as agent for one of them: Commodity Credit Corporation, Defense Supplies Corporation, Metals Reserve Company or Rubber Reserve Company.

(iii) A holder may sell if he has been given permission by the War Production Board to make the particular sale. Form WPB-1161 (PD-470) should be used in applying for permission. It shows the information which is needed before permission can be given and it should be sent to the regional office of the War Production Board in the region where the material is located. Copies of this form can be obtained from district or regional offices of the War Production Board. If a note in List A or List B states that another form is to be used, application should be made on that form.

(iv) A holder may sell freely to anyone if he has a total of not more than $100 worth of the particular material to be sold, unless it is one of the few materials for which special rules and amounts are stated in Column 6 of List A or List B. In deciding whether the holder has $100 worth he must count all material of the same type and composition. For example, all zinc sheet or cattle hides, or all cotton duck, or all shovels or hammers. This paragraph does not mean that a person may sell freely lots worth less than $100 if he has more than that amount. It only allows the sales if all he has of that kind of material is worth $100 or less.

(v) If the material is copper, copper base alloy, aluminum or steel in a form described as a "controlled material" in CMP Regulation 1, the holder may sell it to a buyer who gives him an order bearing a CMP allotment symbol or number and this certification:

> The undersigned purchaser certifies that he is entitled under CMP regulations to place an authorized controlled material order for the above material.

Or the certification may be in the form set out in CMP Regulation 7 or in any other form which may be used in placing an authorized controlled material order. The buyer must charge material bought under this paragraph, against

his CMP allotment account. If the material which the holder wants to sell is steel he may also sell it to steel warehouses, dealers or distributors on orders bearing the endorsements described in M–21–b–1 and M–21–b–2.

(vi) Special permission to sell controlled materials. The War Production Board may give special permission to sell idle or excess controlled materials for any use which is permitted under War Production Board orders or regulations either to a person who has no allotment or to a person who already has an allotment and an authorized production schedule under the Controlled Material Plan. This permission may be given only if the material has been reported to the War Production Board as idle or excess and if the material is iron, steel, aluminum, copper or copper base alloy in controlled material form. If this permission is given, the holder need not get from the buyer the certification provided in paragraph (c) (2) (v) above and if the buyer has an allotment he does not have to charge against his allotment account the amount of controlled materials bought under this special permission. In the case of copper and copper base alloy in controlled material form, the above permission may be given only if the buyer has a production schedule authorized under the Controlled Materials Plan and will use the material for the same purpose for which the production schedule was authorized. The seller may apply for this permission in person or by writing, wiring or telephoning, giving full details about the size, shape, analysis, specifications and quantity of the material and the purpose for which it will be used. Requests for such permission should be directed to the regional office of the War Production Board for the region in which the material is located or to the appropriate materials division.

(3) *Special orders.* If the War Production Board, by an order or in any other way, has ruled that all persons engaged in a particular business may sell or exchange materials between themselves, they can do so.

(4) *Used materials.* Used materials may be sold freely to anyone unless there is a notation in List A or List B restricting the sale of the particular used material which the holder wants to sell.

(d) *Transfers within a company.* If a person wants to transfer material from one of his plants or operating units to another one which normally purchases separately, the transfer is considered equivalent to a sale and he may make it only under the same conditions as he could make a special sale under this regulation. In any other case where a person who has obtained material with priorities assistance wants to use it for another purpose, he should refer to § 944.11 of Priorities Regulation 1 or (in the case of controlled materials or Class A products obtained with an allotment) to paragraph (u) of CMP Regulation 1.

(e) *Replacing material sold.* If a person sells material under this regulation to someone who gives him a priority rating or a CMP allotment symbol or number, the seller cannot use this rating or allotment to replace the material he has sold. The effect of this rating or symbol or number stops when the seller receives it.

(f) *Sales covered by this regulation.* (1) This regulation applies only to "special sales" (as described in paragraph (b) (1)) and if the holder is regularly engaged in selling a material a sale of it by him is not a special sale and he is governed by all orders and regulations of the War Production Board which apply to the material he is selling.

(2) Provisions in any orders or regulations issued before July 1, 1944 which say that this regulation does not apply may be disregarded, except for Order U–1 affecting utilities, WPB Directive 16, which provides special rules for aircraft inventory transfers, and Order P–98–c, which applies to special sales in the petroleum industry. To find the rules for making a special sale there is no need to refer to any order or regulation other than Priorities Regulation 13, outside of the three exceptions stated. However, if another order or regulation issued after July 1, 1944 expressly mentions Priorities Regulation 13 and says that this regulation does not apply to a particular type of sale, then that order or regulation takes the place of this regulation.

(3) If any seller is allowed to make a sale under this regulation, the buyer is permitted to buy and accept delivery, except that:

(i) The buyer may not violate any regulation or order controlling the quantity of material which he may have or buy or receive or the amount of any product he may make or the use that he may make of any particular material. All the prohibitions in orders against the use of materials for particular purposes remain in effect.

(ii) If any order or regulation provides that a buyer of material must make any report or furnish any information either to the War Production Board or to the seller, this regulation does not excuse him from these requirements.

(iii) If any holder of material knows that a person who wants to buy it will use it for a prohibited purpose or would have more of it than he is permitted to have, the sale cannot be made.

(g) *Records.* Any person making a sale under this regulation must keep sufficient records so that he can show that the sale was permitted under this regulation.

(h) *Listing materials with the War Production Board.* If anyone has any excess, idle or frozen material that he wants to sell, he should report it to his nearest War Production Board office giving full details about its size, shape, analysis, specifications and quantity, and they will try to help him.

(i) *Letters and questions.* Any letters or questions about this regulation should be sent either to the Redistribution Division of the War Production Board in Washington, marked "Ref: P.R. 13", or to any of the field offices of the War Production Board.

(j) *Revisions of Lists A and B.* Lists A and B attached to this regulation will be revised from time to time. A person wishing to sell material under this regulation should be sure that he has the list which is in effect at the time of the sale. Copies may be obtained from any field office of the War Production Board.

Issued this 8th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

LISTS A AND B

NOTE: Lists A and B amended July 8, 1944.

Explanation of Lists A and B: Column (1) of List A lists the industrial materials (as defined in paragraph (b) (3) that are restricted under the regulation. This shows in some instances the class or group of materials and does not always list all the trade names and related materials.

Column (1) of List B lists the finished products to which the general sales rules in paragraph (c) (1) (ii) do not apply because the finished product is either more or less restricted than the general rule.

Columns (2), (3), (4) and (5) each apply to a type of possible buyer. Opposite each material in each column is shown the conditions under which a special sale of the particular material may be made to the person described in the heading of the column.

Column (2) applies to persons who make or produce material in the form in which the holder bought it. This includes non-integrated producers. If the holder bought copper wire, column (2) refers to a wire mill, which makes copper wire. If he bought a machine tool, it refers to a company which makes that kind of a product.

Column (3) refers to persons who are permitted to buy and use the material for production, construction, maintenance, repair or operating supplies or for capital expansion or replacement.

Column (4) refers to persons who buy new, rejected or second grade materials and who rework them. This includes persons who change the form of the material by redrawing, rerolling, etc., except that it does not include controlled material producers.

Column (5) refers to persons who are wholesale dealers in the material the holder has like a wholesaler in chemicals or textiles. A wholesaler means anyone whose regular business consists in whole or in part of the sale from stock or inventory of the particular materials or products to other persons for the purpose of resale, or for fabrication or assembly into other products. It also includes persons who recondition or rebuild equipment and machinery for resale to industrial users. Such a person is not, however, relieved from compliance with any orders or regulations of the War Production Board which control the distribution of the material by him.

Column (6) contains notes which should be read whenever a star (*) or note shows on the list.

If the list shows "no," it means that the holder cannot sell to the class of person mentioned in the column head without special permission of the War Production Board except when a note in column (6) allows certain kinds of sales. Paragraph (c) (2) (iii) of the regulation tells how to get permission.

If the list shows "PR" followed by a letter and number, like "PR AA–5," it means that the holder can sell to anyone who gives him an AA–5 priority rating for the sale, or a higher rating.

If the list shows "W. O. P.," it means the holder can sell to the person at the head of the column without any priority rating or allocation or allotment being necessary.

If the list shows "X," it means that there are no persons who fall in the description at the top of the column so far as that particular material is concerned.

PART 3216—MATERIAL ENTERING INTO THE OPERATION OF TRANSPORTATION SYSTEMS

[Preference Rating Order P-142
Interpretation 2]

PRODUCTIVE CAPITAL EQUIPMENT

The following interpretation is issued with respect to Preference Rating Order P-142:

Paragraph (f) (4) of Order P-142 (§ 3216.1) permits operators to use their MRO ratings under the order to buy "minor items of productive capital equipment not exceeding $500 per unit (excluding cost of labor)."

"Items of productive capital equipment" are not limited to rolling stock items such as locomotives and cars, but include all items which the particular operator normally charges to his capital account. Examples are adzers and spike pullers (maintenance of way equipment), and lathes and drill presses (shop equipment).

Operators needing to buy such capital items costing more than $500 per unit (excluding cost of labor) may not do so under the provisions of P-142. The usual way to get these items is by applying on Forms WPB-541 (PD-1A) or WPB-1319, on other applicable forms (such as WPB-3131) for special items of equipment, or under Order L-41 if a construction job covered by that order is involved.

Issued this 8th day of July 1944.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L-335, Direction 8]

DISTRIBUTOR RECEIPTS ON CERTIFIED BUT UNRATED ORDERS AND RETAIL SALES ON UNCERTIFIED AND UNRATED ORDERS

The following direction is issued pursuant to Order L-335:

(a) *What this direction does.* This direction tells distributors how they can get lumber other than by extending their customers' certified orders, and explains what lumber may be sold by sawmills and distributors on uncertified and unrated orders. It also permits distributors to validate certain orders that distributors have placed with sawmills.

(b) *Lumber that a distributor may receive on certified but unrated orders.* Every distributor who was engaged in the business of selling lumber at retail before May 1, 1944, and who had a lumber inventory at that date is permitted to place certified but unrated orders with his lumber supplier and receive in each calendar quarter either 5,000 board feet of lumber or 10 percent of the amount of lumber he received in the same calendar quarter of 1943 provided the 10 percent is not more than 8,000 board feet of lumber. Orders that a distributor places with his lumber supplier to get this amount of lumber must bear the certification described in paragraph (q) (4) of Order L-335. A distributor is not authorized to apply a preference rating to such an order. Lumber that a distributor receives under this provision is in addition to any lumber that he is authorized on Form WPB-3813 to receive or any lumber he is authorized to receive through the extension of his customers' certified orders or under the provisions of paragraph (g) below.

(c) *Distribution yard of sawmill included.* If a person operates both a sawmill and a distribution yard and the distribution yard was engaged in selling lumber at retail prior to May 1, 1944, and had a lumber inventory at that date, the distribution yard may receive the same quantity of lumber from the sawmill as it would be entitled to receive from any other supplier. A transfer of lumber from the person's sawmill stock to his distributor stock must be treated the same way as if the transfer were from another lumber supplier and he must keep a record of the transfer in his sawmill files and endorse the certificate provided for in paragraph (q) (4) of Order L-335 of that record.

(d) *Distributor sales on uncertified and unrated orders.* The 5,000 to 8,000 board feet of lumber that a distributor receives under the provisions of paragraph (b) above is intended for sale to persons who need lumber for a purpose for which such persons have no rating or a rating of AA-5 MRO. This includes industrial plants, business enterprises and private individuals who do not have a rating, and industrial plants and business enterprises (except Class I consumers) who have an AA-5 MRO preference rating but who are not authorized to use it on a lumber order. Such persons are defined in paragraph (m) of Order L-335 as "all other consumers". Any lumber that a distributor receives under the provisions of paragraph (b) above may be sold on certified orders provided an equivalent amount of lumber so sold is made available to persons that are not authorized to place certified orders. A distributor must not sell more lumber on uncertified and unrated orders in a calendar quarter than the 5,000 to 8,000 board feet of lumber he is authorized to receive under paragraph (b) above.

(e) *Sawmills that also sell at retail but do not have a distribution yard.* Sawmills that were engaged in selling lumber at retail on May 1, 1944, but do not maintain a separate retail distribution yard are authorized to withdraw lumber from sawmill stock and sell it on uncertified and unrated orders to the same extent that a distributor is authorized to sell lumber on such orders under the above provisions, and the sawmill must compute the amount of lumber that he is authorized to sell on uncertified and unrated orders in the same way that a distributor computes the amount of lumber that he is authorized to receive on certified but unrated orders under the provisions of paragraph (b) above.

(f) *Distributors validation of orders placed with lumber suppliers during the months of June and July 1944.* Any lumber distributor that has received from the War Production Board a release on Form WPB-2720 under Orders L-290, M-361 and M-364 which is dated subsequent to May 31, 1944 and has placed an order with a sawmill but is not able to receive delivery of that lumber before August 1, 1944, may validate such an order by providing the supplier with the certification described in paragraph (q) (4) of Order L-335. If the order is validated before July 20, 1944 the distributor may receive that lumber in the month of August. If the order is not validated before July 20, 1944 receipt of that lumber must be had before August 1, 1944. Other lumber orders that a distributor has placed with his lumber supplier for delivery subsequent to August 1, 1944 may be validated only to the extent that he has received certified orders from his customers requesting delivery after August 1, 1944. The validation of such an order may only be made by extending his customers' certified orders as provided in paragraph (o) (1) of Order L-335. All other

orders placed by distributors which cannot be delivered prior to August 1, 1944, must be cancelled by notifying the supplier.

(g) *Uncertified and unrated orders.* A distributor may place uncertified and unrated orders with and accept delivery of lumber from (1) lumber mills that produce less than 100,000 board feet of lumber per year; (2) sawmills that are permitted to accept and ship lumber on uncertified and unrated orders under paragraph (e) of Directions 1 to 5 inclusive; and (3) sawmills that are included in Direction 7. Acceptance of delivery on such orders is authorized. However, sawmills may not deliver lumber on an uncertified and unrated order if it will interfere with the filling of a certified order. The fact that a distributor is permitted to receive lumber under this paragraph on uncertified and unrated orders does not permit him to sell on uncertified and unrated orders more than the five to eight thousand board feet of lumber that he is authorized to sell on such orders under paragraph (d) above.

Issued this 8th day of July 1944.

Recording Secretary.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L-335, Interpretation 2]

LUMBER CONTROL ORDER

The following interpretation in question and answer form is issued with respect to § 3285.121, Order L-335.

General

1. Q. What is the relation of Order L-335 Amended to present lumber control orders?

A. Orders M-208, M-361, M-364, L-218, and L-290 will be revoked as of August 1, 1944, and Order L-335 will supersede those orders.

2. Q. Will the restrictions of Order M-122 on the delivery and receipt of mahogany continue to be in effect after Order L-335 is effective?

A. Yes. Any authorization to receive lumber under Order L-335 will be subject to the restrictions of Order M-122.

3. Q. How will farmers who are now assigned preference ratings under Order M-208 obtain preference ratings after it is revoked?

A. Farmers who get authority from the County Agricultural Conservation Committees to receive lumber will, at the same time, get authority from these Committees to use preference ratings.

4. Q. How may orders placed for August and September delivery be validated?

A. These orders may be validated by giving the supplier the certification that a consumer would use if he were placing an order after August 1, 1944. A consumer may validate orders only to the extent he would be authorized to place new lumber orders after August 1, 1944.

5. Q. Is it necessary for consumers to validate delivery orders for the months of August and September if they have obtained releases on Form WPB-2720 or have certified their purchase orders as permitted by Orders M-361, M-364, or L-290?

A. Yes. Orders requesting delivery of lumber after August 1, 1944 cannot be filled unless validated.

6. Q. A Class I consumer has been authorized to receive 80,000 feet of lumber during the third quarter. He has orders for this lumber placed with sawmills and has been granted releases on WPB-2720. To obtain a release of this lumber under Order L-335, must he place another order with the mill bearing the certificate provided for in paragraphs (q) (1) or (q) (2)?

A. It is not necessary to send the mill another order, but he must send him a statement bearing the certificate provided for in paragraphs (q) (1) or (q) (2) of Order L-335, asking his supplier to attach this to his order.

7. Q. Would the procedure outlined in paragraph 6 above apply to other classes of consumers as well as the Class I consumer?

A. Yes. Any person authorized under L-335 to receive lumber may validate existing purchase orders by forwarding the proper certificate to his supplier.

8. Q. If a Class I consumer receives delivery of lumber during July, does the receipt of this lumber count against his third quarter authorization?

A. Yes. The authorization governs the amount of lumber which he may receive in the third quarter.

9. Q. May a mine in Peru which has been assigned a serial number under Order P-56 use the certificate provided in paragraph (q) (2) of Order L-335 in purchasing lumber to be delivered to it?

A. Authority to export lumber from the United States for a serialized mine located outside the continental United States must be obtained through the Foreign Economic Administration. Any person who wishes to buy lumber for export (except export for the Army and Navy) must submit his delivery orders to the Foreign Economic Administration for certification when requesting permission to export.

10. Q. A manufacturer of prefabricated housing units has a contract with a firm in Canada. The Canadian firm wishes to furnish him Canadian lumber to be made into prefabricated units which, in turn, will be shipped back to the Canadian firm. Must the fabricator place a certified order with this Canadian firm for the lumber to be so used?

A. No. He does not need an authorization to receive it, and has no authority to issue a certified order. The fabricator is a contractor and not a consumer.

Definitions

11. Q. A small sawmill produces, on an average, 4,000 board feet of oak per 8-hour day. The lumber it produces was not restricted under Order M-364. Will it be controlled by Order L-335 Amended?

A. Yes, if it operate 25 days a year. Order L-335 defines a sawmill as "any mill or plant, stationary or portable, which produced more than 100,000 board feet of lumber in the calendar year 1943 or any such mill or plant that expects to produce more than 100,000 board feet in the calendar year, 1944."

12. Q. Order L-335, issued March 22, 1944, did not exempt railroad and mine cross ties and switch ties from the definition of lumber. How are these items treated in the present Order?

A. Mine ties and railway cross ties, either sawed or hewed, are excluded from the definition of lumber, and delivery and receipt of these ties may be made without restriction. Bridge ties and railway switch ties, usually sold by board foot measure, are classed as lumber.

13. Q. Under Order M-364 hardwood flooring was defined as lumber, and its delivery by the producer was restricted. How is it defined in Order L-335?

A. Hardwood flooring is not defined as lumber under Order L-335. Delivery and receipt of hardwood flooring may be made without restriction, but the person who manufactures hardwood flooring must be authorized under the Order to receive the lumber.

14. Q. Order L-335 excludes from the definition of lumber edgings, trim, and off-fall less than 3 inches wide or less than 4 feet long which is not made into commercial lumber sizes or standards. What is meant by commercial lumber sizes or standards?

A. Commercial lumber or standards means any lumber which conforms to standard dimensions as given in any lumber grading rule book.

15. Q. A plant buys waste material less than 3 inches wide or less than 4 feet long from a hardwood mill. This waste material is used in a hardwood distillation plant. Is its receipt restricted under the order?

A. No, because it is not made into commercial lumber sizes or standards.

16. Q. A sawmill operates a remanufacturing plant. It takes the trim from the sawmill and produces strips 1" x 2" random length from this material. Must it have authorization to transfer these edgings from sawmill stock to the manufacturing plant?

A. No. Until remanufactured into strips 1" x 2", which are standard dimensions, this material is not lumber. As soon as it is remanufactured it becomes lumber under Order L-335.

17. Q. Is lumber worked to standard patterns such as flooring, car siding, or beaded ceiling considered lumber under Order L-335?

A. Yes, with the exception of hardwood flooring. Lumber worked to any other patterns for which standard dimensions are given in any lumber grading rule book is considered lumber under the order the same as boards, dimensions, planks and timbers. A producer may manufacture these patterns without prior permission of the War Production Board, but these patterns are subject to the same restrictions governing delivery and receipt that apply to other types of lumber. Softwood flooring is lumber.

18. Q. Does the definition of lumber in Order L-335 include moulding?

A. Moulding which is normally sold by the producer by the lineal foot is not lumber but is a fabricated product and is treated the same as box shook, dimension stock, cut stock and millwork. Moulding which is normally sold by the producer by board foot measure is lumber, and is subject to all the restrictions of the order on the delivery and receipt of lumber.

19. Q. How is a person to determine whether the item he receives and uses is lumber whose receipt and delivery is controlled by the order, or is a fabricated product which can be received and delivered without restriction under the order?

A. The purpose of Order L-335 is to control the distribution of lumber and to channel its use while the material still retains the general purpose utility characteristic of lumber. Within the various processes by which a log is converted into a fabricated product or is used in a structure or in some other way, the wood passes through the lumber stage. After the wood has reached the lumber stage, and before it has been converted into an item or used in a manner which takes it out of the classification of lumber, is the point at which control is exercised. The next step (the point at which the lumber is converted into a finished product or a semi-finished product, or put to some other specific use as in a structure) is the consumption of lumber. It is this consumption for which consumers must be authorized by the War Production Board to receive lumber. The delivery and receipt of lumber is restricted under Order L-335. The delivery and receipt of products made from lumber is not restricted under the Order (except paragraph (i) (5) restricts a Class I consumer's use of ratings to get fabricated products which he can produce). Normally there should be no difficulty in identifying the point at which lumber is consumed or changed to a product

which is no longer classed as lumber. For instance, lumber is consumed when a board is nailed into the framing of a house; a plank or board is cut into moulding strips; a piece of softwood matched flooring is cut and nailed into either a house or an object such as a crate or a fence; a timber cut to specification is incorporated into a bridge or building. Also, lumber is consumed when cut to specification or otherwise processed for a particular use in a way which destroys its general usefulness. Generally, dimension stock is not lumber but dimension lumber is lumber. Dimension stock is considered an unfinished wooden item cut to specifications (usually less than 4 feet long and less than 3 inches square in cross sectional area) which can be converted into a finished product by some further operation. For instance, a manufacturer of furniture might purchase dimension stock measuring 3 x 3 x 18 inches for use in manufacturing legs for chairs. This dimension stock being unfinished has not reached its final fabrication stage but it is not lumber because its size limits its usefulness to a very narrow field. On the other hand, in the trade, dimension lumber is usually more than 4 feet long and although cut to specification its use is not limited and therefore, it is still lumber. For instance, if a log has been cut to a particular specification for a particular use such as a 2 x 5 x 15 its general usefulness may not necessarily be destroyed. This lumber until incorporated into a structure can still be used in a different structure; it can be cut into smaller boards; it can be cut up for shipping and dunnage material; it can be cut into dimension stock or into boxing and crating material. Likewise, a cross arm blank which is normally more than 6 feet long and which, when further processed, is used to support wires on a telephone pole, is considered lumber in the blank form. If, however, the cross arm blank has been roofed and holes have been bored in it the general utility has been destroyed and it is no longer lumber.

20. Q. Are any of the following items lumber under the definition of Order L–335: (a) hewn wooden items such as firewood and fence posts; (b) poles and piling made from logs which have not been sawed lengthwise and are in their natural round shape; (c) sawdust, shavings, chips, ground wood products, and excelsior?

A. No. These items are not lumber and are not subject to the restrictions on receipt and delivery that L–335 places on lumber.

21. Q. Are staves, heads and hoops used in cooperage lumber as defined in Order L–335?

A. No. These are fabricated wooden products.

22. Q. Must the producer of cooperage stock such as staves, heads, and hoops be authorized to receive raw material for the manufacture of these items?

A. Not unless the material he receives is lumber. An authorization is not needed to receive bolts, as they are not lumber. But a manufacturer who uses lumber in making heading is restricted in his receipt of such lumber in the same way as any other consumer of lumber. Lumber used in the manufacture of tobacco hogshead staves is also subject to the restrictions of the order.

23. Q. A manufacturer of dimension stock cuts it direct from bolts and billets six feet or less in length. The dimension stock he produces is not classed as lumber. Does he need authorization to receive these short bolts and billets that are cut into such stock?

A. No. Bolts and billets are not considered lumber under the order. However, if lumber is used in the manufacture of dimension stock, the user must have authority to receive it. If he uses bolts or billets more than six feet in length and cuts them into boards or flitches as a step in the manufacture of dimension stock, this material assumes the form of lumber at one point in the process of manufacture, and he must have authority to use such lumber.

24. Q. A manufacturer of furniture purchases plywood panels with lumber cores. Must he have an authorization to receive these plywood panels?

A. No. Plywood panels are considered fabricated products and not lumber. The manufacturer of the panel must have authority to receive the lumber he uses in making the panels.

25. Q. A manufacturer receives lumber and uses it in making laminated trusses. How is he affected by Order L–335?

A. The trusses he manufactures are considered fabricated products and there is no restriction on their delivery or receipt. The lumber he uses in making these trusses is restricted under the order and he must have an authorization to receive such lumber.

26. Q. Match plank is purchased and cut into match blocks. How is this operation affected by Order L–335?

A. Match plank is considered lumber and match blocks are considered fabricated products. Match blocks may be delivered and received without authorization under the order, but the block manufacturer must have an authorization to receive the match plank which he converts into blocks.

27. Q. A plant uses treated lumber and timbers for construction purposes. Is authorization to receive this material necessary, or is it classed as a fabricated product?

A. Lumber treated with creosote or other preservative or fire retardant is still considered lumber and the purchaser must have authority under Order L–335 to receive it.

28. Q. A plant treats lumber, timbers, and poles. How is this operation affected under Order L–335?

A. The treating plant does not consume lumber because treated lumber is still classified as lumber. Therefore, the plant does not need any authorization of its own to receive lumber which is merely treated by it. The treating plant operates under Order L–335 in somewhat the same way as a distribution yard. It can deliver treated lumber and timbers only on certified orders, and it may extend those orders to its suppliers to get the lumber needed to fill the orders of its customers or to replace lumber in inventory. Poles and piling are not lumber, whether treated or untreated, and may be received and delivered without restriction under Order L–335.

29. Q. In the definition of a concentration yard the order refers to the volume of logs and lumber which the plant receives from the area in which it is located. What is meant by "the area in which the plant is located"?

A. Concentration yards and plants engaged in drying, sawing, edging, planing and other forms of processing lumber, generally serve the needs of several sawmills and are located in an area where timber is felled and logs are cut into lumber. This is the area in which the plant must be located in order for it to be classified as a concentration yard. The function of a concentration yard is to serve as an outlet for the lumber produced by sawmills. The function of a distribution yard is to provide a readily available source of supply for consumers. A concentration yard may have a retail sales department and be both a concentration yard and a distributor.

30. Q. Persons who own small timber tracts bring logs to a sawmill to be cut into lumber. The mill never takes title to the logs or the lumber but operates on a custom milling basis. Is there any restriction on the delivery of this lumber to the owner?

A. If the sawmill cuts more than 100,000 feet of lumber per year, whether it owns the logs or not, the lumber produced by the mill is restricted and can be delivered only in accordance with the provisions of Order L–335.

31. Q. Rough lumber is brought to a custom planing mill to be dressed. The mill does not take title to the lumber. Is there any restriction on delivery of lumber which is processed on this basis?

A. If the processed lumber is returned to the person who supplied it, there is no restriction on such delivery. However, if rough lumber is furnished by a sawmill or by a distributor for custom dressing and the owner requests that it be delivered to anyone who would need an authorization to receive lumber if he received it directly from the owner of the lumber, it may not be delivered to such a receiver unless he is authorized under Order L–335 to take receipt of such lumber and furnishes the proper certificate.

32. Q. A Millwork plant, in addition to manufacturing millwork from lumber which it is authorized to receive and use for this purpose, is occasionally requested to manufacture millwork on a custom basis without taking title to the lumber. Is there any restriction on the delivery of millwork which is made on this basis?

A. No. Millwork is a fabricated product and may be delivered and received without restriction under Order L–335. However, the person who supplies lumber and asks to have it manufactured into millwork for him must have an authorization to receive the lumber used for this purpose. If a sawmill or distribution yard wants its lumber made into millwork, it must have the same authority that would be required if the sawmill or distribution yard consumed such lumber on its own millwork department.

33. Q. What is meant by "production material" as used in Order L–335?

A. "Production material" means material to be incorporated into a product. Lumber is production material if it is to be incorporated into a table. Lumber required to crate the table is shipping material, and not production material. "Production material" excludes all material used for maintenance, repair and operating supplies.

34. Q. What is meant by the term "expressly" authorized by the War Production Board or any other Federal agency as used in paragraph (e) (2) and (j) (3) of the Order?

A. This means construction which has been authorized on one of the following forms under Order L–41. Forms GA–1456, WPB–2896, and WPB–2774 are now used to authorize construction under that order. In addition, there are various other orders and authorizations which are not generally used today, but construction which has heretofore been authorized under them is still proceeding. These orders and authorizations are: CMPL–224; CMPL–127; GA–235; GA–236; PD–443; PD–654; orders in the P–19 series; orders in the P–55 series; orders in the P–14 series; P–41; P–110; PD–3; PD–3A; and WPB–542.

35. Q. A plant operates a hardwood veneer mill and a basket factory. From the cores of its veneer bolts it cuts material which is used for basket bottoms and for crating purposes. Is an authorization needed to transfer these boards produced from veneer cores to the basket factory?

A. No. Material cut from hardwood veneer cores 6" to 8" in diameter is not considered lumber according to usual definitions, and no authorization is needed for its transfer or receipt.

36. Q. Douglas fir veneer mill cuts 2 x 4's and other standard items of lumber from its veneer cores. Are these items considered lumber under Order L–335?

A. Yes. These items are lumber, and delivery and receipt of these items is controlled by Order L–335.

Consumers

37. Q. A person has applied on Form 617 and has been given a rating for material and authority to begin construction. Is he authorized to use the certificate in paragraph (q) (1) on his lumber purchase orders?

A. Yes. Having made the application for authority to construct, he is the consumer of the lumber.

38. Q. A building contractor is doing work for others. The persons for whom the work is being done have applied to the War Production Board on Form 617 and have been given authority to begin construction. Is the contractor authorized to use the certificate in paragraph (q) (1) on lumber purchase orders?

A. No. The person for whom the contractor is doing the construction work is the user of the lumber. He must sign the certificate provided for in paragraph (q) (1), or he may delegate to the contractor authority to sign the certificate as his duly authorized official.

39. Q. A manufacturer of prefabricated houses on a custom basis uses lumber supplied to him by other persons. He does not take title to the lumber, but delivers the prefabricated units to the owner of the lumber. Does he need an authorization to receive this lumber?

A. No. The person who supplies him with the lumber and who receives the fabricated units is the one who needs authority to receive the lumber and who is entitled to issue a certified order for such lumber.

40. Q. An authorized consumer wishes to buy lumber from Canada. May he use the (q) (1) or (q) (2) certificate on his purchase order?

A. Yes. His Canadian supplier will need additional permission to ship the lumber to the United States, but will not be given this permission unless he has received a certified order.

41. Q. Is the definition of Class I Consumer in amended L–335 any different from the definition in the original Order?

A. Yes. Under the amended Order, a Class I Consumer is any consumer who has been granted an authorization on Form WPB–3640 to receive lumber. A person is not a Class I Consumer until he has filed his application on WPB–3640 and has been given an authorization. If he files an application and it is returned to him with instructions not to file further applications, he is no longer a Class I consumer.

42. Q. A person operates a lumber distribution yard, fabricating plant, and general merchandise business. He is not a Class I consumer, but his lumber requirements are increasing, and he may be required to file an application for the fourth quarter of 1944. He expects that he will need to receive lumber for the following purposes:

(1) He has filed Form WPB–617 and has been authorized to begin construction on a job which will take 20 thousand feet of lumber in the fourth quarter.

(2) He will need to receive 10 thousand feet for maintenance and repair of his own plant, on work which is permitted under Order L–41 without express authorization of the War Production Board.

(3) He will need to receive 150 thousand feet of lumber which will be sold to farmers and other consumers in his vicinity who can place certified orders for lumber.

(4) He will need to receive 40 thousand feet of lumber to be used in making ammunition boxes on a contract he has just received.

(5) He does some general contracting work and will need to receive 20 thousand feet of lumber to be used on construction jobs he will be doing for other persons.

(6) He will need to receive about 5 thousand feet of lumber to be used in boxing and crating material shipped from his plant.

(7) He does a retail business in millwork and will need to receive 2 thousand lineal feet of moulding, and storm sash and doors containing 10 thousand board feet of lumber.

Must he file Form WPB–3640 and, if so, for which of these items does he request authority to receive delivery of lumber?

A. The moulding and millwork are fabricated items and not lumber, and need not be considered at all. The total amount of lumber he will need to receive is 245 thousand board feet. However, he does not need to apply on Form WPB–3640 for authorization to receive lumber for all of these purposes. If he will refer to paragraph (e) (2) of Order L–335, he will note that lumber for certain purposes is not to be included in determining whether he is required to file the form. Among these are expressly authorized construction projects (his item 1), and lumber for resale (his item 3). If he will refer to paragraph (b) (6) of the order he will note that he is not the consumer of the lumber used in construction work done for other persons (his item 5). After subtracting lumber for purposes which are not to be included, he will need to receive 55 thousand board feet for maintenance and repair of his own plant, for making ammunition boxes, and for boxing and crating the products that he ships. This is the amount for which he should request permission to receive delivery.

43. Q. If the plant owner files an application according to the instructions in Question and Answer 42 above, he will get an authorization on Form WPB–3640 to receive not more than 55 thousand feet. Will he be authorized to receive the other 190 thousand feet of lumber he will need?

A. For the lumber needed to carry out the construction project which has been approved by WPB, he will be a Class II Consumer and as such may receive the lumber needed for that project. He will not get an authorization from the WPB for the lumber listed in Item 3 for resale. The ultimate users of this lumber will buy it from him on certified purchase orders and he will be permitted to extend their certificates in accordance with the provisions of Order L–335 relating to lumber distributors. The persons for whom he is doing the construction work will have their own authorizations for such lumber and their orders for lumber can be placed through him, but as a contractor he would not be authorized to place his own certification on the lumber order. The contractor may buy the lumber but the order will bear the certification of the person for whom he is doing the construction work. If a consumer authorizes a contractor to do so the contractor can sign a certification as the duly authorized agent of the consumer (see Question and Answer 38).

44. Q. A consumer filed Form WPB–3640 in April and received an authorization to receive lumber in the third quarter. He will not need to receive any lumber in the fourth quarter. Should he file WPB–3640 for the fourth quarter?

A. No. He should notify the War Production Board that he will not need to receive any lumber in the fourth quarter and he will be advised that he is no longer a Class I consumer and that he will not have to file.

45. Q. A sawmill operator uses his own lumber for repair work which is permitted under Order L–41 without express authorization of the War Production Board. He expects that he will need to use more than 50,000 board feet for this purpose in the fourth quarter. Should he file Form WPB–3640?.

A. Yes. He must have authorization to withdraw lumber from his sawmill stock for these purposes just the same as he would need authorization if he were buying the lumber from someone else.

46. Q. A sawmill owner operates a box factory. Each quarter his box factory uses about 1 million feet of the lumber produced by his sawmill. How does he get authority to use this lumber in his box factory?

A. He must file application on Form WPB–3640 for his box factory to receive the lumber required by it. Lumber cannot be withdrawn from his sawmill stock for use in his box factory or for delivery to any other consumer except on certified orders as provided in Order L–335. When his box factory receives its authorization on Form WPB–3640 it will be qualified to use the certificate provided for in paragraph (q) (1) of Order L–335 to obtain the lumber it requires. The procedure is described in paragraph (w) of Order L–335. This also applies to the transfer of lumber from sawmill stock to a cut-up plant, dimension stock plant, or any other fabricating plant operated in conjunction with a sawmill.

47. Q. A consumer filed Form WPB–3640 asking for authority to receive 250 thousand feet of lumber during the third quarter. New contracts he has just received mean that he will need to receive 100 thousand feet in addition to the amount authorized. What should he do?

A. He should file a supplementary Form WPB–3640 requesting the additional amount required. He should clearly identify the application as a supplemental one and refer to his previous application and authorization.

48. Q. A consumer misunderstood the instructions on Form WPB–3640 when he filed it and did not include all the lumber he will need for the purposes to be reported on the application. What should he do?

A. He should file application on Form WPB–3640 for the amount he will require which was not originally reported, and explain the reasons why he is making this additional application.

49. Q. A person operates a distribution yard and a box factory. When he filed his Form WPB–3640 for the third quarter, he included with his lumber requirements some lumber which he needed for resale, and he received an authorization for the full amount. He now understands he should not have included lumber for resale. What should he do?

A. He should notify the War Production Board on Form WPB–3773 of the amount of lumber he does not need as a Class I consumer.

50. Q. Order L–335 provides for the return of authorization and the cancellation of purchase orders when any part of the amount authorized is not required during the quarter. This takes care of the situation if the authorized lumber has not been received by the applicant. A consumer was given an authorization to receive 100 thousand feet for the third quarter and this lumber was delivered to him. After he had used 40 thousand feet, the contract for which he was using the lumber was cancelled. What should he do with the 60 thousand feet he has in inventory?

A. He may use the lumber for other purposes if such use is in accordance with the provisions of Section 944.11 of Priorities Regulation 1, or he may dispose of the lumber in accordance with the provisions of Priorities Regulation 13.

51. Q. A lumber consumer normally buys lumber in carload lots from sawmills. His authority to receive lumber in the third quarter does not figure out to even carloads. Can he exceed his authorization to the extent necessary to permit him to continue buying in carlot quantities?

A. No. Usually he will be able to arrange carlot shipments to equal his authorization by requesting heavier loading than usual, or by pooling a car of lumber with someone located near him.

52. Q. A company has nine plants. Six of these plants maintain their individual inventory records of lumber; the other three are served from a common inventory for which only one record is kept. How should the company report its lumber requirements on Form WPB–3640?

A. It should make separate reports for each of the six plants having separate inventory records if as individual units they are required to file Form WPB–3640. One application should be filed covering the other three plants served by a common inventory if the requirements of the three combined necessitate the filing of an application.

53. Q. A company has three plants, each maintaining separate lumber inventory records. No individual plant will require 50 thousand feet of lumber per calendar quarter, but the combined requirements will exceed 50 thousand feet. Should this company report its combined requirements?

A. None of these plants is required to file. In determining in any instance whether any application should be filed depends on whether any individual unit maintaining an inventory record is required to file.

54. Q. A plant maintains one inventory record for lumber stored in three different places and all this lumber is used for maintenance and repair, crating or dunnage of the plant products. Should the plant file separate applications for each inventory maintained?

A. No. The plant should file only one report to include all lumber in inventory and complete plant requirements of lumber.

55. Q. A box plant operator in Indiana buys lumber in the South and stores it in the South. He also keeps a lumber inventory in his box plant in Indiana. How should he report on Form WPB–3640?

A. He should report the inventory at his box plant and the quantity stored elsewhere for use in his box plant. These should be combined in one report.

56. Q. After a Class I consumer receives his authorization on Form WPB–3640 to receive lumber, what must he do to actually get the lumber?

A. The consumer must find a supplier (a sawmill, a concentration yard, a retail or wholesale distribution yard, a commission man, a broker, or other supplier) who can accept his order for lumber, and he must endorse on each of his purchase orders the certification provided for in paragraphs (q) (1) or (q) (2) of Order L–335. This certification is the only authority or release required by the supplier before he can make shipment. Where a (q) (1) certification is used the order must bear the appropriate rating. No ratings may be used on orders bearing the (q) (2) certification.

57. Q. A Class I consumer who has been assigned a rating of AA–3 for lumber for production material was not able to place an order for the amount of lumber he was authorized to receive in the quarter for which he got the authorization. Can he place a certified order after the close of the quarter for lumber he was authorized to receive during the quarter?

A. No. Class I consumers may not place an order after the end of the quarter, nor may they order lumber for delivery after the quarter, for which they were authorized to receive the lumber, unless permission from the War Production Board has been granted.

58. Q. A Class I consumer received an authorization on Form WPB–3640 to receive 130 thousand board feet of lumber during the third quarter. He placed orders for delivery of this amount of lumber during the third quarter, but his supplier was unable to ship the full amount. May the Class I consumer receive the unshipped balance of his order after the end of the third quarter, and will such receipt of lumber count against his third or fourth quarter authorization?

A. So long as the lumber was ordered for delivery in the third quarter, the consumer may receive any lumber on this order shipped during the first month of the following quarter, and receipt of this lumber will be charged only against his third quarter authorization.

59. Q. A consumer did not file Form WPB–3640 for the second and third quarters of 1944 because his expected use of lumber was less than the required amount. He expects that in the fourth quarter he will need to receive more than 50,000 feet of lumber for the purposes to be reported on Form WPB–3640. Is he a Class I consumer?

A. No. He is not a Class I consumer but he is required to file Form WPB–3640 for the fourth quarter. He will become a Class I consumer when he receives an authorization on the form.

60. Q. A consumer did not file Form WPB–3640 for the third quarter of 1944 because he did not expect that he would need to receive more than 50 thousand feet of lumber for those purposes to be reported on the application form. He now discovers that he will need to receive more than 50 thousand feet in the third quarter in order to meet new contracts. What should he do?

A. As soon as he finds that his quarterly requirements for the purposes for which he is required to file WPB–3640 exceed 50 thousand feet, he should immediately file his application on that form.

61. Q. An operator of a small manufacturing plant is a Class II consumer because his lumber requirements for purposes which would require him to file Form WPB–3640 are less than 50 thousand board feet per quarter. Is he authorized under L–335 to use the certificate in paragraph (q) (1) to obtain all the lumber he needs?

A. The certificate may be used by him in obtaining lumber for any purpose which makes him a Class II consumer. It cannot be used on purchase orders for lumber for resale, for lumber for farm buildings and equipment, and for purposes for which he has not been assigned a preference rating. He is also forbidden to use this certificate for lumber for maintenance, repair and operating supplies unless he has a rating higher than AA–5 MRO for lumber for such purposes.

62. Q. Class I consumers are limited in the amount of lumber they may receive in any quarter by their authorization on Form WPB–3640. Is there any limit on the amount of lumber which can be received by a Class II consumer doing the same kind of business as a Class I consumer?

A. Yes. The receipts of a Class II consumer are restricted to the amount of lumber for which he has been authorized to use his preference ratings. To discover what amount of lumber this is, the Class II consumer should consult the regulation or preference rating order or certificate under which his ratings were assigned, and comply with the restrictions imposed by such regulation or order on the use of the preference rating assigned him as well as the general restrictions of Priorities Regulation 3. If a person is the type of Class II consumer defined in paragraph (j) (1) of Order L–335, he may not under any circumstances use a certificate to get more than 50 thousand board feet of lumber for purposes which make him that type of Class II consumer.

63. Q. How does a farmer get authority to receive lumber for the maintenance, repair and operation of his farm buildings and equipment?

A. He will get his authority to receive lumber for these purposes through procedures set up by the War Food Administration. He should get in touch with his local County Agricultural Conservation Committee for information on the procedures which have been set up by the War Food Administration for him to follow in getting his lumber.

64. Q. How does a farmer get authority to receive lumber for construction jobs which have been "expressly" authorized by the War Production Board?

A. Lumber for these purposes does not come out of the quota set up for the War Food Administration, and the farmer should not apply to his County Agricultural Conservation Committee for authority to receive lumber for this purpose. When using lumber for construction jobs which have been authorized on one of the forms mentioned in Q. and A. 34, the farmer is a Class II consumer and the authority on one of those forms to begin construction permits him to use the certificate provided for in paragraph (q) (1) of Order L–335 on his purchase orders for lumber.

65. Q. How does a farmer get authority to receive lumber for the maintenance and repair of his dwelling?

A. For this purpose, the farmer is classed with "all other consumers" and may place an uncertified and unrated order with a lumber distributor for such lumber.

66. Q. If a farmer needs to receive more than 50 thousand board feet of lumber per quarter for maintenance, repair and operation of farm buildings and equipment, and for new construction of farm buildings permitted by paragraphs (c) and (d) of Order L–41, should he file Form WPB–3640?

A. No. These are uses for which lumber requirements are not to be reported on the application form.

67. Q. A Class I consumer is engaged on a long term program which will require the use of lumber through the year 1945. He has been given an authorization on Form WPB–3640 for the third quarter of 1944. May he place certified orders for the delivery of lumber in the fourth and following quarters?

A. Yes. He may place certified orders for the delivery of lumber in future quarters for an amount of lumber not to exceed in any one future quarter, 50 percent of the amount he has been authorized to receive in any current quarter. He may use ratings on these orders for future delivery to the extent that he has been assigned ratings which will be valid for these future periods, after he has received an authorization in any future quarter his authorization for that quarter is the basis for orders placed in advance of that quarter.

Distributors

68. Q. In conjunction with his distribution yard, the owner operates a plant which makes box shook, millwork, and small dimension stock. How can he transfer lumber from his yard stock to his fabricating plant?

A. His fabricating plant must have authority either as a Class I or Class II consumer to receive lumber. This will be true whether the lumber is to be purchased from another person or transferred from his distributor's stock. The fabricating plant is not permitted to receive, and the yard is not permitted to transfer from distributor stock, an amount of lumber greater than the quantity which the fabricating plant is authorized under Order L–335 to receive in a quarter. The fabricating plant must furnish the distribution yard with the certificate provided for in paragraph (q) of Order L–335 for all lumber transferred, and the distribution yard must keep such certificates in its files.

69. Q. How is a lumber distribution yard authorized to replace in inventory lumber which it sells on certified orders to Class I and Class II consumers and farmers?

A. The distributor is authorized to place purchase orders with suppliers and to use on these orders the certificate provided for in paragraph (q) (3) of Order L–335 to the extent that he has consumers' certified orders. He will not pass the consumer's certificate on to his supplier, but will retain it in his files and issue his own (q) (3) certificate on orders he places with his suppliers. He may not extend certificates for an amount of lum-

ber greater than the amount shown on the consumer's unextended certificates in his files.

70. Q. An operator of a distribution yard has received a certified order for items which he does not carry in stock. What procedure should he follow in obtaining these items to fill this order?

A. He may use the (q) (3) certificate, for an equal amount of lumber, on the order for these items which he places with his supplier.

71. Q. May a distribution yard sell lumber on any orders which are not certified in accordance with provisions of Order L–335?

A. Only to the extent that distribution yards may be authorized to make delivery on uncertified orders as provided in Direction 8 to Order L–335.

72. Q. Is there any provision in Order L–335 whereby distributors whose stocks of lumber are low may receive lumber to increase their inventories?

A. Yes. Order L–335 provides that distributors who were engaged in the business of selling lumber at wholesale or retail and who carried a lumber inventory prior to May 1, 1944, may apply to the War Production Board on Form WPB–3813 for authority to place a certified but unrated order with sawmills and to receive such additional quantities of lumber as may be authorized on that form. In placing such orders, the distributor may use the certification provided for in paragraph (q) (4) of Order L–335. The lumber received by distributors on these orders may be sold by them only on certified orders to their customers except to the extent that they may sell on uncertified and unrated orders as provided in Direction 8 to Order L–335.

73. Q. A small distribution yard wants to accumulate enough certified and rated orders so that it may extend these certificates for a full carload of lumber. By the time enough certificates for a carload have been accumulated, the ones received first are more than 90 days old. May the distributor extend the ratings on these certified orders after he has held them for 90 days?

A. Yes. Paragraph (o) (1) of Order L–335 provides that there is no time limit within which distributors must extend certified orders accepted for past or future delivery. This permits distributors to "basket" their ratings and to extend ratings which they could have extended 90 days earlier along with current ratings, notwithstanding the provisions of paragraph (h) (1) of Priorities Regulation No. 3.

Sawmills

74. Q. What types of orders may a sawmill accept?

A. A sawmill may accept certified and rated orders placed by an authorized consumer bearing a (q) (1) certificate, certified but unrated orders from a Class I consumer bearing a (q) (2) certificate, and orders from distributors bearing either the (q) (3) or (q) (4) certificates.

75. Q. Is there any difference in the treatment to be accorded each of these types of orders by sawmills?

A. Yes. Shipment may not be made on certified but unrated orders from Class I consumers or distributors bearing the (q) (2) or (q) (4) certificate if such shipment would interfere with the filling of a certified and rated order.

76. Q. Is there any limit on the amount of orders a sawmill may accept?

A. Yes. A sawmill may not accept certified and rated orders for delivery in any month in an amount exceeding 110 percent of its anticipated shipments of lumber in that month. A sawmill may accept as many orders bearing (q) (2) or (q) (4) certificates as it wants to but in order to protect the buyer, the sawmill should not accept more of these orders than it reasonably expects it may be able to ship.

77. Q. A sawmill may not accept certified, rated orders for delivery in any month in an amount exceeding 110 percent of its anticipated shipments of lumber in that month. Does this mean, for example, that if a mill, on the 20th of August, has booked certified and rated orders for delivery in October up to 110 percent of expected October shipments, that it cannot accept any more such orders?

A. No. The October shipping file remains flexible during August and if the mill, on the 21st of August, is offered an order which carries a higher rating than some of the orders on its October shipping schedule, the mill must accept this higher rated order. Because the acceptance of this order would bring total certified and rated orders for October shipment above 110 percent, orders for an equal amount of lumber bearing the lowest ratings would have to be dropped, and the person who placed the order which has been dropped must be notified of this fact.

78. Q. The order provides that if a mill has accepted certified and rated orders equal to 110 percent of its expected shipments by the beginning of the month prior to the month in which shipments are to be made, it cannot accept any more certified and rated orders. Does this mean that a mill's order file for September shipments is frozen on the first of August if certified and rated orders for September delivery equal 110 percent of expected September shipments?

A. Yes. Certified orders bearing a rating of AAA, and orders that the mill is required by either a direction or directive of the War Production Board to accept, are the only ones that can get on that order file.

79. Q. If, on the first of August, a mill has certified and rated orders for September delivery amounting to only 80 percent of its expected September shipments and it receives a certified and rated order during August, must the mill accept such order in accordance with the provisions of § 944.2 of Priorities Regulation No. 1?

A. Yes. The order must be accepted, and it will take precedence over any lower rated orders on the mill's books.

80. Q. Is there any provision whereby a mill's order file will be frozen for the first month in which Order L–335 is effective?

A. The order file for August will remain open during July until the mill has accepted certified and rated orders equal to 110 percent of anticipated August shipments, at which point the order file for August shipments becomes frozen and no more certified and rated orders for August delivery may be accepted.

81. Q. After a mill's order file for October delivery is filled in August with certified and rated orders, may the mill accept certified and unrated orders for October delivery?

A. Yes. There is no limit on the amount of these orders that a mill can accept, but it should be remembered that shipment cannot be made on certified and unrated orders if such shipment would interfere with shipment on certified and rated orders.

82. Q. A sawmill has accepted certified and rated orders for September delivery up to 110 percent of expected September shipments. During September the mill was able to ship only 80 percent of orders accepted for September shipment. The mill has also booked orders for 110 percent of its October shipment. What orders are to be shipped first during October?

A. The unshipped certified and rated orders for September delivery take precedence over orders scheduled for October delivery, even though these unshipped September orders bear lower ratings than the orders scheduled for October delivery. The unshipped September orders may be displaced only by orders rated AAA and such orders as the mill may have been required by a direction or directive of the War Production Board to fill in the early part of October.

83. Q. A sawmill has accepted certified and rated orders for delivery equal to 110 percent of expected shipments for a given month. During that month the mill receives an order bearing an AAA rating, which it is required to accept. Must the mill drop low rated orders for an equal amount of lumber, or may it exceed the 110 percent limit on acceptance of certified and rated orders?

A. The mill may exceed the 110 percent limitation to the extent that it receives AAA orders or orders which it was required by a direction or directive of the War Production Board to ship in that month, so long as these orders are received within 30 days preceding the month for which shipment is to be made. Lower rated orders are not dropped, and low rated orders that are not shipped during that month will be carried over to the following month and will have shipping precedence over any orders scheduled for delivery in the following month.

84. Q. Are sawmills authorized to accept uncertified and unrated orders?

A. Sawmills are permitted to accept uncertified and unrated orders only to the extent provided by directions issued under the order. Generally, this will be governed by Directions 1 to 7 inclusive.

85. Q. Directions 1 to 6 provide that a sawmill must not accept a military order after the beginning of the month preceding the month of shipment if the acceptance of the order will result in the displacement of other certified and rated orders calling for more than 10 percent of the sawmill's anticipated monthly shipments. What happens to orders displaced up to the 10 percent?

A. These orders are only displaced from that month's shipping schedule. Like other certified and rated orders which the mill is unable to fill in the month in which delivery was requested they are carried over to the next month and filled ahead of orders on the next month's schedule regardless of ratings.

86. Q. Referring again to the provision of Directions 1 to 6 stated in Question 85 a sawmill has accepted certified and rated orders for 110 percent of its anticipated monthly shipments. These orders were accepted before the beginning of the month preceding the month of shipment and the order file is frozen. Each of these orders calls for more than 10 percent of the mill's anticipated monthly shipment. If the military order is for 10 percent or a lesser percentage of the mill's anticipated monthly shipments it will interfere with filling of one of the other orders that are for more than 10 percent. Must the military order be accepted and what happens to the other certified and rated order?

A. The military order must be accepted. The sawmill should get in touch with the person placing the lowest rated order and advise him that all of his order cannot be filled during the month in which he requested shipment and ask the buyer whether he wants shipment on the part that still can be shipped with the balance being shipped at the beginning of the next shipping month ahead of other orders or whether he wishes to cancel his order and place it with another mill. The acceptance of the military order only displaces orders from the month's shipping schedule. If the order being displaced is for more than ten percent only that part of the order is displaced which calls for the amount required by the military.

PART 3290—TEXTILES, CLOTHING AND LEATHER

[General Limitation Order L–312, as Amended July 7, 1944]

INDUSTRIAL WIPING CLOTHS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of industrial wiping cloths for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3290.76 *General Limitation Order L–312*—(a) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time, except as otherwise provided herein.

(b) *Definitions.* (1) "Industrial wiping cloth" means any used cloth which has been reclaimed for industrial wiping and cleaning.

NOTE: Paragraphs (2) and (3), formerly paragraphs (3) and (4), redesignated, and former paragraph (2) deleted July 7, 1944.

(2) "Industrial wiping cloth processor" means a person who during any calendar month launders or causes to be laundered more than 12,000 pounds of reclaimed cloths for the purpose of selling them to any other person for use as industrial wiping cloths.

(3) "Direct military order" means an order for industrial wiping cloths to be delivered directly to the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, The Panama Canal, the Coast and Geodetic Survey, the Coast Guard, the Civil Aeronautics Authority, the National Advisory Committee for Aeronautics, or the Office of Scientific Research and Development.

(c) *Reservation of industrial wiping cloths for direct military usage.* Notwithstanding any preference rating or preference rating certificate:

During each calendar month beginning July, 1944, no industrial wiping cloth processor shall deliver more than 33⅓% by weight of his production of industrial wiping cloths on industrial or other non-military orders. The remaining 66⅔% shall either be delivered against direct military orders or set aside for delivery against future direct military orders, unless the War Production Board by specific authorization in writing releases such stock set aside or allocates it to some other person. (Requests for such authorization may be made by letter to the War Production Board stating the quantity and quality of cloths involved and other pertinent facts.) However, no industrial wiping cloths which are set aside for direct military orders need to be held for more than 30 days if the processor has no direct military orders calling for delivery within that time.

The processor shall include in the stock delivered or set aside against direct military orders all his wiping cloths meeting specifications for wiping cloths approved by the Federal Specifications Board or the Bureau of Ships of the Navy Department. This paragraph shall not, however, require the setting aside of more than 66⅔% of any processor's production of all cloths.

On or before the 10th day of each calendar month each wiping cloth processor shall report on Form WPB–3133 to the War Production Board as directed on said form.

These reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(d) *Restrictions on grading, processing and delivery of industrial wiping cloths.* No industrial wiping cloth grader or processor shall grade, process or deliver any industrial wiping cloth contrary to any specific direction which may be issued in writing from time to time by the War Prodution Board in order to meet designated military or industrial requirements.

(e) *Restriction on delivery and use of new textile products for wiping cloths.* No user of industrial wiping cloths shall use any new towels, new diapers or other new textile product as a substitute for industrial wiping cloths, and no person shall deliver any such product if he has reason to believe it will be used for this purpose. This restriction does not apply to mill ends or remnants or to new fabric made especially for use as industrial wiping cloths.

(f) *Records.* All persons affected by this order shall keep and preserve the records required by § 944.15 of Priorities Regulation 1.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(h) *Communications to the War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Division, Washington, D. C., Ref.: L–312.

(i) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 7th day of July 1944.

PART 3293—CHEMICALS

[General Allocation Order M–300, Schedule 33]

HIGHER ALIPHATIC ALCOHOLS

§ 3293.1033 (*Schedule 33 to General Allocation Order M–300*—(a) *Definition.* "Higher aliphatic alcohol" means any one of the following:

(1) Capryl alcohol (known also as "methyl hexyl carbinol" and "2-octanol").

(2) Octanol (2-ethyl hexanol).

(3) Normal octanol (normal octyl alcohol).

(4) Normal decanol (normal decyl alcohol).

(5) Lauryl alcohol (any mixture of normal aliphatic alcohols containing more than 50% normal dodecanol).

(6) Oleyl alcohol (normal heptadecanol).

(7) Mixed higher aliphatic alcohols (any mixture of higher aliphatic alcohols containing less than 50% dodecanol and more than 80% of normal octanol, normal decanol, and lauryl alcohol, combined).

(b) *General provisions.* Higher aliphatic alcohols are subject to the provisions of General Allocation Order M–300 as Appendix B materials. The initial allocation date for oleyl alcohol is August 1, 1944, for capryl alcohol is July 1, 1942, when capryl alcohol first became subject to allocation under Order M–167 (revoked), and for octanol, normal octanol, normal decanol, lauryl alcohol and mixed higher aliphatic alcohols is September 1, 1943, when these alcohols first became subject to allocation under Order M–344 (revoked). The allocation period is the calendar month. The small order exemption without use certificate per person per month is as follows:

70 pounds of capryl alcohol.
370 pounds of octanol (2-ethyl hexanol).
50 pounds of normal octanol.
50 pounds of normal decanol.
360 pounds of lauryl alcohol.
40 pounds of oleyl alcohol.
50 pounds of mixed higher aliphatic alcohols.

(c) *Special provisions.* (1) Use, delivery and acceptance of delivery prior to August 1, 1944, of higher aliphatic alcohols other than oleyl alcohol will be authorized on the basis of applications filed in the form prescribed in Order M–344 (revoked). Oleyl alcohol is subject to allocation under this schedule beginning August 1, 1944.

(2) Restrictions on deliveries by suppliers shall apply to deliveries to other persons and not to intra-company deliveries, notwithstanding § 944.12 (intra-company deliveries) of Priorities Regulation No. 1, as amended.

(d) *Suppliers' applications on WPB–2947.* Each supplier seeking authorization to use or deliver shall file application on Form WPB–2947 (formerly PD–602). Filing date is the 20th day of the month before the proposed delivery month. Send three copies (one certified) to the War Production Board, Chemicals Bureau, Washington 25, D. C., Ref: M–300–33. A separate set of applications shall be filed for each higher aliphatic alcohol, but a consolidated application may be filed for all plants and warehouses.

The unit of measure is pounds. In Table II, first, list in Column 1 customers who have filed use certificates with the applicant, and in Column 1a enter each primary product and end use stated in each certificate; second, specify in Column 1 "aggregate exempt small orders" and leave Column 1a blank; third, the applicant may specify in Column 1 his own name, and in Column 1a the product and end use for which he requests authorization to use the higher aliphatic alcohol. Fill in the other columns of Table I and fill in Table II as indicated.

(e) *Customers' certified statements of use.* Each person placing a purchase order for delivery from all suppliers in any month of more of any higher aliphatic alcohol than the exempt quantity specified in paragraph (b) shall furnish each supplier with a certified statement of proposed uses as prescribed in Appendix D of General Allocation Order M-300. Primary product and end use may be specified as follows, for each higher aliphatic alcohol ordered:

(Primary product).
Chemical Manufacture (specify product).
Anti-foam.

Other (specify).
(End use).
Industrial (specify product).
Civilian consumer goods (specify product).
Export (if Lend-Lease, specify contract number; if other exports, specify license number and consignee).
Military (specify branch of Service and contract and specification number).

If the higher aliphatic alcohol is to be resold or exported as such, proposed use may be specified as "For authorized resale", "For resale on exempt small orders" or "For export" (specify destination and export license number).

(f) *Budget Bureau approval.* The above reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(g) *Communications to War Production Board.* Communications concerning this schedule shall be addressed to War Production Board, Chemicals Bureau, Washington 25, D. C., Ref: M-300-33.

PART 3293—CHEMICALS

[Conservation Order M-374, as Amended July 8, 1944]

BEVERAGE CANE SPIRITS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of industrial alcohol and of sugar, molasses, and grain, and facilities for the production of industrial alcohol, for defense, for private account and for export. The use of such raw materials as sugar, molasses and grain is necessary to the production of industrial alcohol for the manufacture of synthetic rubber and munitions. It is therefore deemed necessary and appropriate in the public interest and to promote the national defense, to allocate facilities for the production of beverage cane spirits (as defined in this order), and to control the importation of beverage cane spirits so as to prevent further uncontrolled diversion of sugar and molasses to the production of these spirits:

§ 3293.616 *Conservation Order M-374* — (a) *Definitions.* (1) "Beverage cane spirits" means ethyl alcohol of 50 proof or higher made from molasses, sugar, sugar cane or sugar cane juice, and produced for beverage purposes or tax paid for beverage purposes. The term includes any solution, compound or mixture containing ethyl alcohol of 50 proof or higher made from molasses, sugar, sugar cane or sugar cane juice, such as, for example, rum, cordials or gin.

(2) "Producer" means any person engaged in the production of beverage cane spirits.

(3) "Import" means to transport in any manner into the continental United States or into Puerto Rico, the Virgin Islands of the United States, or the territories of Hawaii and Alaska, from any foreign country, or from any territory or possession of the United States other than those mentioned above. It includes shipments into a free port, free zone or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States and shipments in bond into the continental United States for trans-shipment to Canada, Mexico or any other foreign country.

(4) Beverage cane spirits shall be deemed "in transit" if it is afloat, if an on-board ocean bill of lading has actually been issued with respect to it, or if it has actually been delivered to and accepted by a rail, truck, or air carrier, for transportation to a point within the continental United States.

(b) *Restrictions on production of beverage cane spirits.* On and after March 15, 1944, no person shall produce beverage cane spirits except as specifically authorized by the War Production Board. The provisions of this paragraph shall be applicable to the continental United States, Puerto Rico, the Virgin Islands of the United States and the territories of Hawaii and Alaska.

(c) *Restrictions on imports of beverage cane spirits.* On and after March 15, 1944, no person shall import, attempt to import, purchase for import, or make any contract or other arrangement for the importing of any beverage cane spirits without first having obtained authorization to do so from the War Production Board. This paragraph applies to the importation of beverage cane spirits regardless of the existence on March 15, 1944, or thereafter, of any contract or other arrangement for importation.

(d) *Applications for authorization to produce or import.* Any person requiring authorization to produce or import beverage cane spirits may apply by letter, in triplicate, to the War Production Board, stating the amount, by calendar quarter, of beverage cane spirits applicant desires to produce or import. Applicant must also state the amount of beverage cane spirits he has produced or imported, by calendar quarters, during the years 1940, 1941, 1942, 1943 and 1944. All quantities should be expressed in terms of proof gallons. It will be the policy of the War Production Board to permit production or importation of beverage cane spirits to the extent consistent with the fulfillment of requirements of sugar, molasses and industrial alcohol for the defense of the United States.

(e) *Exceptions.* Paragraphs (c) and (d) of this order do not apply:

(1) To beverage cane spirits which, on or before March 15, 1944, were in transit to a point within the continental United States; or

(2) To beverage cane spirits consigned as gifts or as samples, or for use as samples, or imported for personal use, where the quantity of each consignment or shipment is not more than 2.4 proof gallons. No person shall split up a single order of beverage cane spirits into smaller orders for the purpose of coming within this exception.

(3) To shipments of beverage cane spirits in bond into the continental United States for trans-shipment to Canada, Mexico or any other foreign country.

(4) To shipments of beverage cane spirits into the United States or its territories or possessions by members of the armed forces of the United States on duty outside the continental limits of the United States to the extent that such shipments are admitted free of all customs duty, charges or exactions, or internal revenue taxes imposed upon or by reason of importation, pursuant to Public Law 790, 77th Congress (Act of December 5, 1942).

(5) To beverage cane spirits consigned to diplomatic representatives of any foreign government for their personal use or for the use of members of their staff.

NOTE: Subparagraph (6), formerly (4), redesignated July 8, 1944.

(6) To any bank or other person who participates, by financing or otherwise, in any arrangement which such bank or person knows or has reason to know involves the importation after March 15, 1944 of beverage cane spirits, provided such bank or person either has received a copy of the authorization issued by the War Production Board under the provisions of paragraph (d), or is satisfied from known facts that the proposed transaction comes within the exceptions set forth in this paragraph (e).

(f) *Special directives.* The War Production Board may from time to time issue special directives to producers concerning the kind of raw materials which

may be used for the production of beverage cane spirits. This paragraph applies only to the continental United States, Puerto Rico, the Virgin Islands of the United States and the territories of Hawaii and Alaska.

(g) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(h) *Reports.* No beverage cane spirits, which are imported after March 15, 1944, shall be entered through the United States Bureau of Customs for any purpose (other than pursuant to paragraphs (e) (2), (e) (3), and (e) (4) of this order) whether for consumption, for warehouse, in transit, in bond, for re-export, for appraisal, or otherwise, unless the person making the entry shall file with the entry a certificate in duplicate, stating the following information: (1) Name of importer; (2) Date of bill of lading (this is only necessary if the beverage cane spirits were in transit on or before March 15, 1944); (3) Date and number of importer's WPB authorization; (4) Quantity of beverage cane spirits covered by the entry; (5) Port of entry; (6) Port of origin of shipment. The certificate shall be signed manually by a duly authorized official of the importer or as provided by Priorities Regulation No. 7. The standard form of certification provided in Priorities Regulation No. 7 may not be used instead of the certificate described above. The filing of such certificate a second time shall not be required upon any subsequent entry of the same shipment of beverage cane spirits through the United States Bureau of Customs for any purpose; nor shall the filing of such certificate be required upon the withdrawal of any beverage cane spirits from bonded custody of the United States Bureau of Customs, regardless of the date when such material was first transported into the continental United States. Both copies of the certificate shall be promptly transmitted by the Collector of Customs to the War Production Board, Chemicals Bureau, Washington 25, D. C., Reference M-374.

(i) *Bureau of the Budget Approval.* The reporting provisions of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any person may be prohibited from making or obtaining further deliveries of or from processing or using, material under priority control and may be deprived of priorities assistance.

(k) *Communications.* All communications concerning this order shall be addressed to the War Production Board, Chemicals Bureau, Washington 25, D. C., Reference M-374.

Issued this 8th day of July 1944.

PART 3294—IRON AND STEEL PRODUCTION

[General Preference Order M-21-b-1, as Amended July 8, 1944]

GENERAL STEEL PRODUCT DISTRIBUTORS

§ 3294.81 *General Preference Order M-21-b-1*—(a) *Purpose and scope.* This order tells how a distributor obtains deliveries of general steel products for his own stock or for direct delivery to his customers. The rules governing his purchases of merchant trade products are contained in General Preference Order M-21-b-2, and the rules governing his deliveries of all types of steel products to consumers are contained in CMP Regulation No. 4.

(b) *Definitions.* For the purposes of this order:

(1) "Steel" means carbon steel, alloy steel, and wrought iron, in the forms and shapes listed in Schedule I to CMP Regulation No. 1.

(2) "Alloy steel" means alloy steel as defined in Order M-21-a.

(3) "Carbon steel" means any steel (including wrought iron) other than alloy steel.

(4) "General steel product" means any of the steel products listed in Schedule A of this order.

(5) "Product group" means any of the 17 numbered groups of general steel products listed in Schedule A of this order.

(6) "Type" means (i) carbon steel, or (ii) stainless steel, or (iii) other alloy steel.

(7) "Base tonnage" of a distributor for any product group and type at any location means the tonnage of that product group and type certified to that distributor for that location by the War Production Board on form GA-996. In general, the base tonnage of any product group and type for any location will be the tonnage delivered by that distributor from his stock at that location during the first three months of 1941. In no event will a base tonnage be established for a distributor at any location except for product groups and types which he was regularly receiving into stock from producer on or before August 9, 1941.

(8) "Distributor" means any person (including a warehouse, jobber, dealer, or retailer) who receives physical delivery of steel into his stock for sale or resale in the same form, or after performing such operations as cutting to length, shearing to size, torch cutting or burning to shape, sorting and grading, pipe threading, or corrugating or otherwise forming sheets for roofing and siding. A person who, in connection with any sale, bends, punches or fabricates steel for final use or assembly shall not be considered a distributor with respect to that sale. The term "distributor" excludes any person who purchases steel for resale who does not actually take physical delivery of the material into his stock at a location regularly maintained by him for such purpose. The activities of such a person are governed by the terms of Direction 48 to CMP Regulation No. 1.

(9) "Delivery" includes deliveries received on consignment.

(c) *Purchases for stock*—(1) *From a producer; only replacement orders permitted.* A distributor may not order general steel products for his stock from a producer except to replace general steel products delivered from his stock at one or more locations during the previous 90 days to consumers in accordance with CMP Regulation No. 4, or to other distributors in accordance with this order, plus scrap accumulated in the course of warehouse operations and actually sold to a scrap dealer or melter and reported to the War Production Board on Form WPB-2888, and which he has not previously replaced or ordered for replacement. A distributor may not, however, use any delivery from his stock authorized by the War Production Board pursuant to an appeal filed by him under Direction 44 to CMP Regulation No. 1 to support a stock replacement order. Within these limits, a distributor may order any general steel product for his stock from any producer.

(2) *From a producer; limits on product groups.* No distributor may order from a producer for his stock, and no producer may deliver to a distributor's stock, any carbon type steel plates (product group No. 3), mechanical tubing (product group No. 8), pressure tubing (product group No. 9) or sheets and strip, hot rolled (product group No. 11) unless the distributor has a base tonnage for carbon steel in the product group ordered. No distributor may order any carbon steel in any of these product groups from producers for delivery to his stock during any calendar quarter in excess of 150% of his carbon steel base tonnage for such product group.

(3) *From another distributor; replacement orders.* A distributor may order general steel products for stock replacement from another distributor in the same manner and subject to the same restrictions as when he purchases from a producer. However, such orders shall not be subject to the restrictions contained in paragraph (c) (2) of this order.

(4) *From another distributor; salvaged and excess steel.* In addition, a distributor may order for his stock from another distributor any general steel product items which the latter has purchased from a holder of idle or excess inventories in accordance with para-

graph (c) (5) of this order, or has salvaged from material purchased as scrap. Such material does not have to be ordered on a replacement basis, and previous deliveries from stock are not needed to support such an order. However, the distributor making such a delivery may not use it to support his own stock replacement order with a producer or another distributor.

(5) *From a holder of idle or excess inventories.* In addition, a distributor may order any general steel products for his stock from a holder of idle or excess inventories. Such material does not have to be ordered on a replacement basis, and previous deliveries from stock are not needed to support such an order.

(6) *How to place orders.* Each distributor to whom the War Production Board has issued a GA-996 warehouse certificate shall file once with each of his producer suppliers of general steel products a copy of the front page of the GA-996 warehouse certificate most recently issued to him. The copy of the GA-996 certificate received by a producer from a distributor may be used by the producer to verify the existence of a base tonnage on any particular product group. Each purchase order for general steel products placed for shipment to a distributor's stock must bear the words, "For distributor's stock." On orders placed with producers for product groups for which the distributor has a base tonnage for the location where the material will be received into stock, he should also place the serial number assigned him on his GA-996 certificate; but this serial number must not be used on any other sort of order. In addition, an order placed under paragraph (c)(4) must bear the word "salvage" or "excess" to show that the order is for the sort of material described in that paragraph. This will constitute a representation to the seller and to the War Production Board that the purchase order complies in all respects with the requirements of this order. No other endorsement or form is required.

(7) *Status of orders for delivery to stock.* An order placed with a producer in accordance with this paragraph (c) and bearing the distributor's serial number, or an order placed with a holder of idle or excess inventories, will be considered an authorized controlled material order. Any other order placed in accordance with this paragraph (c) may, but need not, be accepted; any part of the order which is accepted will be considered an authorized controlled material order.

(d) *Purchases for direct delivery to a customer*—(1) *Placing of orders.* A distributor who receives from a customer an order which he is permitted to fill under CMP Regulation No. 4 or under paragraph (c) above, or an order which has been specifically authorized by the War Production Board, and who wishes to arrange for direct delivery from a supplier to the customer, must furnish with his own purchase order a copy of the endorsement received by him from the customer including the customer's name, or a copy of the specific permission granted by the War Production Board. The distributor may not specify delivery to his own warehouse unless the order is for less than a minimum carload; and in the latter case, the material must be promptly redelivered by him to his customer. A distributor may not use any such sale to support an order for stock replacement.

(2) *Status of orders.* An order placed in accordance with this paragraph (d) may, but need not, be accepted by the supplier. Any part of the order which is accepted shall be considered an authorized controlled material order. If a producer rejects such an order designating shipment to a consumer when he has open space available to fill it, he must immediately notify the distributor in writing that he is prepared to fill an authorized controlled material order direct from the consumer or through another person.

(e) *Warehouse load directives.* A distributor may place orders in accordance with paragraph (c) for any general steel product with any producer. However, when necessary to secure an equitable distribution of any scarce general steel product, the War Production Board may direct producers to reserve each month a part of their production of such product to fill authorized controlled material orders bearing distributors' serial numbers. In order to take advantage of the tonnage reserved for any month, a distributor must submit his orders in accordance with paragraph (c) to a producer not later than the expiration date stated in the warehouse load directive. A producer may fill distributors' orders for that month received after the expiration date but may not reserve any space for them. A producer may not, until after the expiration date, schedule distributors' orders which do not bear a serial number.

(f) *Earmarked warehouse stocks.* The War Production Board may establish earmarked stocks of general steel products with any distributor. Deliveries to and from such stocks must be made in accordance with specific directions which will be issued to the distributor when the earmarked stock is established.

(g) *Establishing an initial stock.* This paragraph covers three groups: persons who have not previously been authorized to act as distributors of general steel products, distributors wishing to purchase for stock a product group which they have not previously handled, and distributors who have not previously purchased general steel products from producers but who now wish to do so.

(1) *New distributors.* Hereafter, any person who wishes to become a distributor of any general steel product from stock at a location not in operation prior to April 1, 1944, may do so only by purchasing his entire working stock from holders of idle or excess inventories in accordance with paragraph (c)(5) of this order. Deliveries from such stock may be replaced in accordance with paragraph (c) of this order. The term "working stock" includes all of the tonnage deemed necessary by the distributor to maintain operations at the new location at a satisfactory level under this order. Each location established by any person pursuant to this paragraph (g)(1) shall hereafter be considered a separate distributor subject to all of the terms of this regulation even though the location may only represent the addition of another unit to a group operated by one distributor.

(2) *New product lines or sources of supply.* A distributor wishing to add a new general steel product group to his stock, or any distributor who wishes to place orders with producers for the first time may do so by placing orders in the manner authorized by paragraph (c) of this order.

(h) *General provisions*—(1) *Reports.* Each distributor must file a quarterly report on form WPB-2888 for each location at which his total base tonnage of general steel products, or his receipts of general steel products into stock from producers during the quarter, exceeds 150 tons. In addition, if his base tonnage of tool steel (product group No. 7) for any location, or his receipts of tool steel into stock at any location from producers during the quarter, exceed 25 tons, he must file this report. Each report must be filed in duplicate with the Bureau of the Census, Washington 25, D. C., on or before the 15th day of January, April, July and October. Each distributor, even though he is not required to file this report, must maintain for at least two years a record of his shipments from stock, receipts into stock, and inventory of each product group on hand at the end of each calendar quarter. This record must be available for inspection at any time by authorized representatives of the War Production Board.

(2) *Appeals.* Any appeal from this order must be made by letter referring to the particular provision appealed from and stating fully the grounds for the appeal. In emergency cases, appeal may be made by telegraph.

(3) *Communications to War Production Board.* All appeals or other communications concerning this order should be addressed to the Warehouse Branch, Steel Division, War Production Board, Washington 25, D. C., References: M-21-b-1.

(4) *Violations.* Any distributor or other person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under prior-

ity control and may be deprived of priorities assistance.

(5) *Special instructions.* The War Production Board may from time to time issue instructions to distributors with respect to making, withholding, accepting or refusing deliveries.

This amended order shall become effective July 15, 1944.

NOTE: The record keeping and reporting provisions of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 8th day of July 1944.

PART 3294—IRON AND STEEL PRODUCTION

[General Preference Order M-21-b-2, as Amended July 8, 1944]

MERCHANT TRADE PRODUCTS DISTRIBUTORS

§ 3294.86 *General Preference Order M-21-b-2*—(a) *Purpose and scope.* This order tells how a distributor obtains deliveries of merchant trade products for his own stock or for direct delivery to his customers. The rules governing his purchases of general steel products are contained in Order M-21-b-1, and the rules governing his deliveries of all types of steel products to consumers are contained in CMP Regulation No. 4.

(b) *Definitions.* (1) "Steel" means carbon steel, alloy steel, and wrought iron, in the forms and shapes listed in Schedule 1 to CMP Regulation No. 1.

(2) "Merchant trade products" means any of the steel products listed in Schedule I of this order.

(3) "Product group" means any of the 12 numbered groups of merchant trade products listed in Schedule I of this order.

(4) "Base period" means

(i) For merchant trade products in product groups 20-23, inclusive, the calendar year 1940.

(ii) For merchant trade products in product groups 24-31, inclusive, the 12 months ending June 30, 1941.

(5) "Base tonnage" of a distributor for any product group at any location means the tonnage of that product group delivered by producers to his stock at that location during the base period, or such other tonnage as may be specifically established by the War Production Board. By the use of Form WPB-2889 a distributor can shift his base tonnage for any product group from one producer to another.

(6) "Distributor" means any person (including a warehouse, jobber, dealer, or retailer) who receives physical delivery of steel into his stock for sale or resale in the same form, or after performing such operations as cutting to length, shearing to size, torch cutting or burning to shape, sorting and grading, pipe threading, or corrugating or otherwise forming sheets for roofing and siding. A person who, in connection with any sale, bends, punches or fabricates steel for final use or assembly shall not be considered a distributor with respect to that sale. The term "distributor" excludes any person who purchases steel for resale who does not actually take physical delivery of the material into his stock at a location regularly maintained by him for such purpose. The activities of such a person are governed by the terms of Direction 48 to CMP Regulation No. 1.

(7) "Delivery" includes deliveries received on consignment.

(8) "Minimum carload" means a carload weighing not less than 40,000 lbs.

(c) *Purchases for stock*—(1) *From a producer; only replacement orders permitted.* A distributor may not order merchant trade products for his stock from a producer except to replace merchant trade products which he delivered from his stock at one or more locations during the previous 12 months to consumers in accordance with CMP Regulation No. 4 or to other distributors in accordance with this order, and which he has not previously replaced or ordered for replacement. A distributor may not, however, use any delivery from his stock authorized by the War Production Board pursuant to an appeal filed by him under Direction 44 to CMP Regulation No. 1 to support a stock replacement order. Within these limits, a distributor may order any merchant trade product for his stock from any producer. When placing orders with producers a distributor should, so far as possible, specify deliveries in not less than minimum carload quantities in order to save transportation.

(2) *From another distributor; replacement orders.* A distributor may order merchant trade products for stock replacement from another distributor in the same manner and subject to the same restrictions as when he purchases from a producer.

(3) *From another distributor; salvaged and excess steel.* In addition, a distributor may order for his stock from another distributor any merchant trade product items which the latter has purchased from a holder of idle or excess inventories in accordance with paragraph (c) (4) of this order, or has salvaged from material purchased as scrap. Such material does not have to be ordered on a replacement basis, and previous deliveries from stock are not needed to support such an order. However, the distributor making such a delivery may not use it to support his own stock replacement order with a producer or another distributor.

(4) *From a holder of idle or excess inventories.* In addition, a distributor may order any merchant trade products for his stock from a holder of idle or excess inventories. Such material does not have to be ordered on a replacement basis, and previous deliveries from stock are not needed to support such an order.

(5) *How to place orders.* Each order for merchant trade products for shipment to a distributor's stock must bear the words "For distributor's stock." In addition, an order placed under paragraph (c) (3) must bear the word "salvage" or "excess" to show that the order is for the sort of material described in that paragraph. This will constitute a representation to the seller and to the War Production Board that the purchase order complies in all respects with the requirements of this order. No other endorsement or form is required.

(6) *Status of orders for delivery to stock.* An order placed with a producer in accordance with this paragraph (c) for delivery of a merchant trade product to stock at a location where the distributor has a base tonnage for that product group with that producer, or an order placed with a holder of idle or excess inventories, will be considered an authorized controlled material order. Any other order placed in accordance with this paragraph (c) may, but need not be accepted; any part of the order which is accepted will be considered an authorized controlled material order.

(d) *Purchases for direct delivery to a customer*—(1) *Placing of orders.* A distributor who receives from a customer an order which he is permitted to fill under CMP Regulation No. 4 or under paragraph (c) above, or an order which has been specifically authorized by the War Production Board, and who wishes to arrange for direct delivery from a supplier to the customer, must furnish with his own purchase order a copy of the endorsement received by him from the customer including the customer's name, or a copy of the specific permission granted by the War Production Board. The distributor may not specify delivery to his own warehouse unless the order is for less than a minimum carload; and in the latter case, the material must be promptly redelivered by him to his customer. A distributor may not use

any such sale to support an order for stock replacement.

(2) *Status of orders.* An order placed in accordance with this paragraph (d) may, but need not, be accepted by the supplier. Any part of the order which is accepted shall be considered an authorized controlled material order. If a producer rejects such an order designating shipment to a consumer when he has open space available to fill it, he must immediately notify the distributor in writing that he is prepared to fill an authorized controlled material order direct from the consumer or through another person.

(e) *Warehouse load directives.* A distributor may place orders in accordance with paragraph (c) for any merchant trade product group with any producer. However, when necessary to secure an equitable distribution of any scarce merchant trade product, the War Production Board may direct producers to reserve each calendar quarter a part of their production of such product to fill authorized controlled material orders from distributors for whom they have a base tonnage covering a specific location or locations. In order to take advantage of any such reserved tonnage, a distributor must submit his orders in accordance with paragraph (c) to the producer then holding his base tonnage, not later than the expiration date stated in the warehouse load directive. A producer may fill distributors' orders for that quarter received after the expiration date, but may not reserve any space for them. A producer must consider the first orders for any product group received from any distributor for delivery in a particular calendar quarter as applicable to the tonnage of such product group reserved for that distributor during that quarter. In addition to the tonnage of any product group which a distributor may order against the amount reserved for him by a warehouse load directive, he may place other properly supported orders for that product group with the same or any other producer in accordance with paragraph (c). However, a producer may not schedule such orders for delivery until after his obligations under the warehouse load directive have been filled, or unless when the order is received he knows that he will have material for shipment to distributors over and above the tonnage required to satisfy his warehouse load directive.

(f) *Earmarked warehouse stocks.* The War Production Board may establish earmarked stocks of merchant trade products with any distributor. Deliveries to and from such stocks must be made in accordance with specific directions which will be issued to the distributor when the earmarked stock is established.

(g) *Establishing an initial stock.* This paragraph covers three groups: persons who have not previously been authorized to act as distributors of merchant trade products, distributors wishing to purchase for stock a product group which they did not handle during the base period, and distributors who did not purchase merchant trade products from producers during the base period but who now wish to do so.

(1) *New distributors.* Hereafter, any person who wishes to become a distributor of any merchant trade product from stock at a location not in operation prior to April 1, 1944, may do so only by purchasing his entire working stock from holders of idle or excess inventories in accordance with paragraph (c) (4) of this order. Deliveries from such stock may be replaced in accordance with paragraph (c) of this order. The term "working stock" includes all of the tonnage deemed necessary by the distributor to maintain operations at the new location at a satisfactory level under this order. Each location established by any person pursuant to this paragraph (g) (1) shall hereafter be considered a separate distributor subject to all of the terms of this regulation even though the location may only represent the addition of another unit to a group operated by the distributor.

(2) *New product lines or sources of supply.* A distributor wishing to add a new merchant trade product group to his stock, or any distributor who wishes to place orders with producers for the first time may do so by placing orders in the manner authorized by paragraph (c) of this order.

(h) *General provisions*—(1) Reports. Each distributor who has a base tonnage for any of the following groups of merchant trade products at any one location in excess of that shown below must file with the Bureau of the Census, Washington, D. C., a quarterly report for such location in duplicate on Form WPB–2892.

	Net tons
Pipe (product groups 20–21)	240
Tin and terne plate (product group 22)	240
Galvanized, lead coated, or painted sheets and strip, including roofing and siding, valley, ridge roll, and flashing (product group 23)	240
Wire products (product groups 24–31)	240

This report must also be filed by a distributor for any of his warehouses which during the quarter receives into stock from producers over 100 tons of merchant trade products. Each distributor, whether or not he is required to file this report, must maintain for a period of not less than two years a record of his shipments from stock, receipts into stock, and inventory of each product group on hand at the end of his fiscal year. This record must be available for inspection at any time by authorized representatives of the War Production Board.

(2) *Appeals.* Any appeal from this order must be made by letter referring to the particular provision appealed from and stating fully the grounds for the appeal. In emergency cases, appeal may be made by telegraph.

(3) *Communications to War Production Board.* All appeals or other communications concerning this order should be addressed to the Warehouse Branch, Steel Division, War Production Board, Washington 25, D. C., Reference: M–21–b–2.

(4) *Violations.* Any distributor or other person who wilfully violates any provisions of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(5) *Special instructions.* The War Production Board may from time to time issue instructions to distributors with respect to making, withholding, accepting or refusing deliveries.

This amended order shall become effective July 15, 1944.

NOTE: The record keeping and reporting provisions of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 8th day of July 1944.

Recording Secretary.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-576]

ELECTRIC MOTORS CORPORATION

Electric Motors Corporation, a corporation doing business at 111 South Meridian Street, Indianapolis, Indiana, is engaged in the business of purchasing and selling electric motors. Between May 5, 1943, and September 15, 1943, the corporation sold more than 1000 new fractional horsepower electric motors on unrated purchase orders, in violation of Limitation Order L-123. The corporation was familiar with the provisions of Limitation Order L-123, and its actions constituted a wilful violation of that order.

These violations have hampered and impeded the war effort of the United States by diverting scarce material to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.576 *Suspension Order No. S-576.* (a) Electric Motors Corporation, its successors or assigns, is hereby prohibited from accepting delivery of or receiving any new fractional horsepower electric motors and generators as defined in Limitation Order L-123, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Electric Motors Corporation, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on July 8, 1944, and shall expire on November 8, 1944.

Issued this 1st day of July 1944.

Recording Secretary.

PART 1029—FARM MACHINERY

[Limitation Order L-257-a, as Amended July 10, 1944]

EXPORTS

§ 1029.16 *Limitation Order L-257-a*—(a) *What this order does.* This order describes the rules governing the manufacture for export of machinery and equipment (both farm and non-farm) and repair parts, and supplements Limitation Order L-257 covering domestic production. All general provisions of the domestic order, such as definitions and rules for production schedules, will apply to producers for export under this order, unless this order indicates otherwise. It is expected that this order L-257-a will be the basic export order from year to year, but that "applicable export schedules" of quotas will be issued for each "current quota period", just as explained in Order L-257 for domestic quotas. It may be assumed that the applicable export schedules in effect at any particular time will continue into the next "current quota period", until such time as new schedules are issued.

(b) *Additional definitions.* The definitions of Order L-257, unless otherwise indicated in this order, shall apply for the purpose of this order, and also the following:

(1) "Base shipment" means one-half the net shipping weight of the total quantity (as reported on Form PD-388) of farm machinery and equipment and repair parts in the aggregate exported by a producer during the calendar years 1940 and 1941 combined to any country or group of countries (except Canada) listed on an applicable export schedule.

(2) "Lend-Lease order" means any order for machinery and equipment (both farm and non-farm) or repair parts placed by any agency of the United States Government in response to a requisition filed pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(3) "Applicable export schedule" means any schedule which relates to a current quota period and fixes manufacturing quotas for the foreign country or countries listed for that period.

(c) *Restrictions on production for export*—(1) *General export quotas (except Canada).* During any current quota period, no producer shall manufacture for shipment, or ship, to foreign countries more machinery and equipment (both farm and non-farm) and repair parts than his quota for the particular country or countries, as indicated on the applicable export schedule. Where countries are listed on an applicable export schedule as a group with only one quota percentage, the producer's quota for all countries in the group as a whole is the listed percentage of his base shipments to those countries. Where countries are listed individually with separate quota percentages, the producer's quota for each country is the applicable percentage of his base shipment to that country. Where the quota percentage is 0% for any country or group of countries listed, or where a particular foreign country is not listed at all, shipments can be made only by getting a special quota under paragraph (c) (4). These special quotas will be given only as the need arises.

Each export quota for a country or group of countries (except Canada) is an over-all tonnage, which the producer can divide up among farm machinery and equipment, non-farm machinery and equipment, and repair parts, as he chooses.

Exceptions to these general rules are stated in paragraph (d).

(2) *Canadian quotas.* During any current quota period, no producer shall manufacture for shipment to Canada more of any item of farm machinery and equipment (in units) or attachments (by weight) than his quota as indicated on the applicable export schedule. For each item of farm machinery and equipment (excluding attachments) the producer's quota is half the number of that item (in units) shipped by him to Canada during the calendar years 1940 and 1941, multiplied by the percentage shown for the item on the schedule. (Non-farm machinery and equipment is not included in the above quotas and may not be shipped to Canada.

For each item of attachments, the quota is half the net shipping weight of that item shipped by the producer to Canada during the calendar years 1940 and 1941, multiplied by the percentage shown for the item on the schedule. However, the producer may choose to lump all attachments as explained in paragraph (d) (3).

There is no quota limitation on the manufacture of repair parts for Canada. However, it is necessary to comply with paragraph (e) with respect to production schedules.

Exceptions to these general rules are stated in paragraph (d).

(3) *Special restrictions.* No producer shall manufacture for shipment, or ship, to any foreign country (including Canada):

(i) Any item of farm machinery and equipment requiring rubber tires except the following items:

Wheel type tractors including garden type.
Combines.
Pick-up hay balers and field hay harvesters.
Corn pickers.
Power sprayers over ten gallons per minute.
Any item requiring tires to be mounted on wheel rims of the following sizes (diameter): 15", 16", 18", 20" and 21".

(ii) Any item of farm machinery and equipment or repair parts except to the extent listed on an approved production schedule under paragraph (e).

(4) *Adjustments in quotas.* The War Production Board may, by specific written directions or authorizations issued to any producer or other person affected by this order, increase or decrease any export quota or authorized use of materials; and may transfer any portions of quotas between producers, taking into account the amount and weight of materials to be used, the need for particular items at the time required in particular countries, the labor and transportation situation in the manufacturing areas involved, and such other factors as may be proper.

(d) *Exceptions*—(1) *Production before or after current quota periods*—(i) *Advance planning of production.* Before the beginning of any current quota period, producers may plan their advance production for export as explained for domestic production in subparagraph (d) (5) (i) of Order L-257.

(ii) *Carry-over of uncompleted portions of quotas.* Any portions of export quotas under an applicable export schedule (including all amendments, appeals and specific authorizations) which are not completely manufactured

by the end of the current quota period, may be carried over and added to the corresponding quotas of the next current quota period, but only to the extent that the particular items are covered by an export license or release certificate issued by or under authority of the Foreign Economic Administration, or by a Lend-Lease order, dated before July 1 of this next period. However, items for Canada may be carried over to the extent that they can be completed by July 31 of this next period. In addition, uncompleted quotas for the following items of harvesting machinery and equipment for Canada under Export Schedule X–10 (including special authorizations, etc.) may be carried over for completion any time before September 30, 1944:

Combines (Item 126 only).
Corn binders (Item 132).
Corn pickers (Items 133–136).
Field ensilage harvesters (Item 137).
Corn shellers (Items 166 and 167 only).
Feed grinders and crushers (Items 174, 175, and 175a only).
Portable elevators (Item 188).

(iii) [Deleted July 10, 1944.]

(2) *Bracketed items for Canada.* Wherever, in an applicable export schedule for Canada, two or more items are bracketed together, the producer may distribute his total quota (in units) for that bracket among all the items in that bracket, as set forth for domestic items in paragraph (d) (2) of Order L–257.

(3) *Attachments for Canada.* Any producer may choose not to follow the individual quota percentages for attachment items for Canada as indicated on the applicable export schedule, and instead manufacture up to 100% of half his total 1940 and 1941 shipments of all attachments (by weight) to Canada, under the terms set forth for domestic attachments in paragraph (d) (3) of Order L–257.

NOTE: The over-all quota for attachments under Schedule X–10 is 75%.

(e) *Production schedules.* Each producer who is not a "small producer" must have available for shipment export the quantities of items of machinery and equipment (both farm and non-farm) and repair parts as indicated on his production schedules which have been filed and approved in accordance with paragraph (e) of Order L–257. All provisions of that paragraph apply to production schedules for export, unless otherwise indicated. However, any item manufactured for export, whether for an O. E. W. country or Lend-Lease country (excluding Canada), may be shipped to any foreign country (except Canada) regardless of the schedule filed on Form WPB–3053 or WPB–3181, *Provided*, That the total shipments to any country or group of countries during the current quota period must not be more than the quota for that country or group of countries established under this order. Shifts of this nature do not have to be reported on Form WPB–3181.

(f) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(g) *Reports.* Each producer must file by the 10th day of each month a report on Form WPB–813 of his export shipments to all foreign countries (except Canada) during the previous month in accordance with the instructions on the form. However, producers whose total export quota for all countries, except Canada, is 15,000 pounds or less for any current quota period, need not file this form.

NOTE: This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

NOTE: Paragraph (h) formerly (g) redesignated July 10, 1944.

(h) *Communications.* All communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Farm Machinery and Equipment Division, Washington 25, D. C., Ref.: L–257–a.

Issued this 10th day of July 1944.

PART 1029—FARM MACHINERY

[Limitation Order L–257–a, Export Schedules X–11 Through X–18, as Amended July 10, 1944]

APPLICABLE EXPORT SCHEDULES OF QUOTAS FOR FARM MACHINERY, EQUIPMENT AND REPAIRS FOR EXPORT FOR THE CURRENT QUOTA PERIOD JULY 1, 1944, TO JUNE 30, 1945

§ 1029.18 *Export Schedule X–11 through X–18 to Limitation Order L–257–a.* In accordance with the provisions of Orders L–257 and L–257–a, the

following are the "applicable export schedules" for the current quota period starting July 1, 1944. These are similar to the applicable export schedules for the current quota period ending June 30, 1944, with some minor changes and consolidations, and with certain changes in quota percentages.

The production quotas set forth in these export schedules should be used by producers as the basis for planning their production, establishing production schedules and ordering material under CMP. The War Production Board may establish a final distribution pattern which is not in accord with these quotas. Any additional controls or exemptions which may be desirable with regard to production quotas, and any modifications with respect to final distribution of completed machines, will be issued as the need arises. In figuring his anticipated production, each producer must comply with the provisions of the basic Limitation Orders L-257 and L-257-a, unless these export schedules state otherwise.

Quotas for countries listed on Schedules X-11, X-13, X-14, X-15, and X-16, below are expressed as a percentage of one-half the total net shipping weight of the 1940 and 1941 shipments of farm machinery and equipment and repair parts to all the countries in the particular group.

Quotas for countries listed on Schedule X-17 below are expressed as a percentage of one-half the total net shipping weight of the 1940 and 1941 shipments to each such country.

NOTE: A quota percentage is not established for countries listed in Schedule X-12 below. Quotas for these countries will be allocated specifically from time to time under paragraph (c) (4) of Order L-257-a.

PART 3133—PRINTING AND PUBLISHING

[Conservation Order M-339, as Amended July 10, 1944]

COPPER AND ZINC FOR PRINTING PLATES

Section 3133.30 *Conservation Order M-339* is amended to read as follows:

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of copper, zinc and paper for the production of printed matter for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3133.30 *Conservation Order M-339*— (a) *Definitions.* Meaning of terms used in this order:

(1) A person "uses" copper, copper base alloy, copper scrap, copper base alloy scrap or zinc when he first changes its form or shape in the production of printing plates by putting it into an electrolytic bath or etching or engraving it or re-using it in any way. However, in the case of an offset plate, zinc is "used" when the first prints are made from the plate. Re-use of a zinc offset plate after re-graining shall not be considered "use".

(2) The term "copper" includes copper, copper base alloy, copper scrap and copper base alloy scrap.

(3) The term "printing industry scrap copper" means old copper printing plates or other copper scrap derived from plate-making operations.

(4) The term "printing plate" means any kind or shape of printing or marking plate containing copper or zinc except plates made in plants or offices whose sole processing of plates is for use in connection with office machinery as listed in General Limitation Order L-54-c as amended from time to time.

(b) *Limitation on the use of zinc.* (1) In any calendar quarter beginning with the third quarter of 1944, no person shall use more zinc in the production of printing plates than 100%, by weight, of the zinc which he used in the production of such plates during the same quarter of 1941.

(2) If a plate-maker used less than 250 pounds of zinc in any calendar quarter of 1941, he may use up to 250 pounds of zinc in any calendar quarter beginning with the third quarter of 1944. Moreover, any person who used no zinc whatever in the production of printing plates in any calendar quarter of 1941 may use a total of 250 pounds in any calendar quarter beginning with the third quarter of 1944.

(3) A person may add an extra 15% to his permitted usage during one calendar quarter if he subtracts that amount from his permitted usage for the next quarter. Also, if he uses less than this order allows for one quarter, he may increase his use in the next quarter by that amount.

(4) No person shall deliver zinc to any plate-maker and no plate-maker shall accept zinc, except to fill an order carrying an authorized preference rating of AA-5 or higher.

(c) *General limitations on the use of copper.* In any calendar quarter after the second quarter of 1943, no person shall use more copper in the production of printing plates than 60%, by weight, of the copper which he used in the production of such plates during the same quarter of 1940. However, a person may use an additional 15% during one calendar quarter if he uses that much less during the next quarter. Also, if he uses less than this order allows for one quarter, he may increase his use in the next quarter by that amount.

(d) *Further provisions regarding the use of copper in certain processes*—(1) *Photoengraving.* In order to liquidate inventories of 16-gauge photoengravers sheet copper which are now in the possession of photoengravers and suppliers,

25 percent of the weight of any copper finished as 16-gauge photoengravers' sheet before July 1, 1943 which a photoengraver uses after that date, shall not be counted in computing his allowed usage under paragraph (c) of this order. For example, a photoengraver may use four pounds of such 16-gauge copper but he need charge only three pounds of the four against his allowable usage. Photoengravers' sheet copper thicker than 16-gauge is not exempted under this provision.

(2) *Electrotyping and gravure platemaking.* (i) For the third calendar quarter of 1944 and for each calendar quarter after that, one pound or more out of every two pounds of copper used for electrotyping and gravure platemaking must be in the form of printing industry scrap copper, recast anodes of such scrap, or new cast anodes received by the plate-maker in return for an equal amount of printing industry scrap copper.

(ii) If, in any calendar quarter, 95% or more of the copper which a person used for electrotyping and gravure platemaking is in the form of printing industry scrap copper, recast anodes of such scrap or new cast anodes received by him in return for an equal amount of printing industry scrap copper, he will be allowed a "bonus" equal to 10% of the copper which he used in that quarter for electrotyping and gravure platemaking. This "bonus" must be used in the form of printing industry scrap copper, recast anodes of such scrap, or new cast anodes received by him in return for an equal amount of printing industry scrap copper.

(iii) The delivery to and acceptance by an electrotyper or gravure platemaker of printing industry scrap copper, recast anodes of such scrap, or new cast anodes is subject to approval under Order M-9, as amended from time to time. Application for such authority shall be made on Form WPB-2959 as required by Order M-9.

(3) *Copperplate engraving.* (i) A person's entire allowable usage of copper for copperplate engravings must be composed of sheets which were in his possession or in the possession of his supplier on December 31, 1942 or old engraved plates, or a combination of the two.

(ii) Each copperplate engraver must deliver to a scrap dealer, or other person authorized by the War Production Board to accept the scrap, at least one pound of old copperplate engravings for each pound of copper sheet or old engraved plates used by him in making new copperplate engravings. Such delivery must be made not later than fifteen days after the end of the calendar quarter in which the copper was used for this purpose. This paragraph exempts copperplate engravers from the provisions of Order M-9, relating to the acceptance and delivery of old copperplate engravings in the production of new engraved plates.

(e) *Exceptions.* (1) When plates containing copper are ordered by any department or agency of the United States Government or when such plates are made exclusively for printed matter which is ordered directly from the producer of such printed matter by any department or agency of the United States Government, the copper used in such plates need not be counted in calculating the plate-maker's allowable usage under paragraph (c) of this order if the purchase order is endorsed as provided in the following paragraph. The exemption contained in this paragraph shall not apply in the case of subcontracted printing, that is, when the order for printed matter is placed by any person other than a department or agency of the United States Government even when the printed matter is delivered to such department or agency in the fulfillment of a government contract.

(2) Each person who orders plates containing copper for the purposes described in the first sentence of paragraph (e) (1) shall endorse on the purchase order for such plates a statement in substantially the following form signed manually, or as provided in Priorities Regulation No. 7 (§ 944.27), by an official duly authorized for such purpose:

The undersigned hereby certifies that the plates covered by this order are to be used in the production of printed matter as described in the first sentence of paragraph (e) (1) of Order M-339, such plates or printed matter being ordered by a department or agency of the United States Government under Contract No. ------

---

Name of person

Duly authorized official

(3) The gross weight of copper used to fill orders endorsed in the manner set forth in the previous paragraph shall be reported to the Printing and Publishing Division of the War Production Board once every calendar quarter. Persons who apply for copper on form CMP-4B shall make this report in a letter attached to such application. Persons who do not apply on this form shall report by letter not later than fifteen days after the end of each calendar quarter. The report shall state the weight of the metal and whether it is copper or electrotyping metal. In the case of electrotyping metal, the gross weight of the plates, including backing metal, shall be stated. The original records must be kept on file as long as this order remains in force and for two years after that. This reporting provision has been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(f) *Effect of allocations, preference ratings and inventories.* Notwithstanding any allocation number or symbol or any preference rating which may be extended to any person or which may be granted to any person on specific application or by any blanket symbol or rating procedure, the provisions of this order shall prevail with relation to the amount of copper and zinc which may be used by any person in the production of printing plates. The fact that a person has an inventory of copper or zinc, or an allocation or rating for copper or zinc, in excess of his allowable usage, or that he has received permission under Order M-9 to accept printing industry scrap copper, recast anodes of such scrap or new cast anodes does not justify his use of such copper or zinc in excess of his allowable usage as prescribed by this order.

(g) *Inventory limitation.* No person shall accept delivery of copper or zinc if his combined new metal inventory of all gages and sizes of that metal for a given type of plate-making process prior to such acceptance exceeds a 60 days' supply at his current allowable rate of consumption.

(h) *Applicability of regulations.* This order and all transactions affected by it are subject to the regulations of the War Production Board, as amended from time to time.

(i) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter referring to the particular provisions appealed from and stating fully the grounds of the appeal.

(j) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref.: M-339.

(k) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 10th day of July 1944.

PART 3270—CONTAINERS

[Limitation Order L–239–a]

PAPER MILK CONTAINERS

The fulfillment of requirements for the defense of the United States has created shortages in the supply of materials entering into the production of paper milk containers for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3270.71 *Limitation Order L–239–a*—(a) *What this order does.* This order deals only with paper milk containers. It places quota restrictions on their manufacture and inventory restrictions on their use.

(b) *Definitions.* For the purpose of this order:

(1) "Paper milk container" means any waxed paper container, blank or folded carton of the type which is generally used to package fluid milk.

(2) "Blank" means any sheet of paper or paperboard cut to shape, or creased or scored, for the purpose of being used as a paper milk container or part thereof.

(3) "Folded carton" means any blank, scored and folded, to partially form a paper milk container.

(c) *Restriction on tonnage of paper and paperboard to be processed.* No person shall accept more paper and paperboard for the manufacture of paper milk containers in any calendar quarter, commencing with the third quarter of 1944, than the amount determined by the War Production Board to be his quota for that quarter. A person's quota for the third quarter of 1944, and for each succeeding quarter until the War Production Board determines otherwise, is 100% of the amount of paper and paperboard that he used for the manufacture of paper milk containers in the fourth quarter of 1943.

(d) *Inventory restrictions.* No person shall accept, or have set aside, any quantity of paper milk containers which will increase his inventory for such containers to more than his reasonably anticipated requirements for the next thirty days, except that, whenever his inventory is less than thirty days' supply, he may accept the minimum delivery required by his manufacturer under a published price list or sales policy in effect on the date of this order. No person shall order any quantity of paper milk containers for delivery to him or for his account on any date, if receipt thereof on that date would increase his inventory of such containers to more than the amount permitted in the first sentence of this paragraph.

(e) *Reporting requirements.* Any person who used during the first six months of 1944 more than fifteen thousand new paper milk containers for any purpose other than the packaging of fluid milk or other milk products shall report by letter to the War Production Board before July 15, 1944, the following facts: (1) description of the product packed, (2) number and size of paper milk containers used each month, (3) when he started packing the product in paper milk containers, and (4) what other container he could use. The reporting requirements of this paragraph have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(f) *Records.* All persons affected by this order shall keep for at least two years records concerning inventory, production, purchases and sales, and shall make reports on same if required.

(g) *Audit and inspection.* All records required to be kept by this order shall upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(h) *Appeals.* Appeals from Order L–239–a shall be filed by addressing a letter to the War Production Board, Containers Division, Washington 25, D. C., Ref: L–239–a.

The letter of appeal need not follow any particular form. It should state informally, but completely, the particular provision appealed from, the precise relief desired, the reasons why denial of the appeal would result in undue and excessive hardship, and such other statistical and narrative information as may be pertinent.

(i) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable War Production Board regulations, as amended from time to time.

(j) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(k) *Communications to War Production Board.* All communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Containers Division, Washington 25, D. C., Ref: L–239–a.

Issued this 10th day of July 1944.

PART 3274—MACHINE TOOLS AND INDUSTRIAL SPECIALTIES

[General Preference Order E–5–a, as Amended July 10, 1944]

GAGES AND PRECISION MEASURING HAND TOOLS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of gages and precision measuring hand tools, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3274.41 *General Preference Order E–5–a*—(a) *Definitions.* For the purpose of this order:

(1) "Gages and precision measuring hand tools" means those types of tools which are listed on Exhibit A attached hereto, excluding tools made of wood or plastics.

(2) "Producer" means any person who is engaged in the manufacture of gages or precision measuring hand tools.

(3) "Stock order" means any purchase order for gages or precision measuring hand tools now or hereafter placed with a producer by any person acquiring such tools pursuant to a rating assigned on Form WPB–547 (formerly PD–1X), Form WPB–646 (formerly PD–300), or Canadian Form PB–1010.

(4) "Other order" means any purchase order for gages or precision measuring hand tools except stock orders.

(5) "Total monthly production" means either, (i) The total dollar value of each of the types of gages and precision measuring hand tools listed on Exhibit A scheduled to be produced in any given month by a producer or, (ii) The total number of units of each of the types of gages and precision measuring hand tools listed on Exhibit A scheduled to be produced in any given month by a producer. Each producer may choose between computing his total monthly production on a dollar or a unit basis.

(b) *Necessity for preference ratings.* On and after June 6, 1944, no producer shall sell or deliver any gages or precision measuring hand tools except to fill purchase orders bearing a preference rating of AA–5 or higher.

(c) *Allocation of production between stock orders and other orders.* Beginning with the month of July 1944, and in each month thereafter, each producer shall schedule his monthly production and delivery of gages and precision measuring hand tools as follows:

(1) To the extent that he has stock orders on hand he shall schedule between 20 and 25 percent of his total monthly production of each type of gages and precision measuring hand tools listed on Exhibit A for delivery against stock orders requiring delivery in such month. No producer shall schedule any purchase order pursuant to this paragraph (c) (1) unless it clearly appears from such order that the rating was assigned on Form WPB–547 (PD–1X), Form WPB–646 (PD–300) or Canadian Form PB–1010.

The sequence of deliveries of stock orders within the percentage limitations which may be delivered in any given month shall be scheduled according to § 944.7 of Priorities Regulation No. 1 and other applicable War Production Board regulations.

(2) To the extent that he has other orders on hand he shall schedule between 75 and 80 percent of his total monthly production of each type of gages and precision measuring hand tools listed on Exhibit A for delivery against other orders requiring delivery in such month.

The sequence of deliveries of other orders within the percentage limitations which may be delivered in any given month shall be scheduled according to § 944.7 of Priorities Regulation No. 1 and other applicable War Production Board regulations.

(3) Any portion of the percentage allocated to stock orders which has not been taken up by such orders on or before the 15th day of the month preceding the month being scheduled shall be scheduled for delivery against other orders and vice versa.

(d) *Repair parts.* Nothing in this order shall be deemed to prevent the sale and delivery of any part manufactured for use in the repair or maintenance of gages and precision measuring hand tools. Purchase and delivery of such repair parts shall be in accordance with applicable regulations and orders of the War Production Board.

(e) *Intra-company deliveries.* Notwithstanding the provisions of § 944.12 of Priorities Regulation No. 1, the provisions of this order shall not apply to deliveries from one branch, division or section of a single enterprise to another branch, division or section of the same or any other enterprise under common ownership or control.

(f) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

(g) *Reports.* All persons affected by this order shall execute and file with the War Production Board such reports and questionnaires as said Board shall, from time to time request, subject to the approval of the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.

(h) *Appeals.* Any appeal from the provisions of this order shall be made on Form WPB–1477 (formerly PD–500) or by letter in triplicate, referring to the particular provisions appealed from, and stating fully the grounds of the appeal. All appeals should be filed with the field office of the War Production Board for the district in which is located the plant to which the appeal relates.

(i) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

(j) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Tools Division, Washington 25, D. C., Ref: E–5–a.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M–379]

WORK CLOTHING PRODUCTION ORDER

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of work clothing and of materials and facilities used in the production of work clothing for defense, for private account, and for export. It is deemed necessary and appropriate in the public interest and to promote the national defense to assign priority to orders for work clothing and to allocate materials and facilities available for civilian work clothing production on the conditions and in the manner and to the extent set forth in the following order:

§ 3290.341 Conservation Order M–379 (a) *Definitions.* For the purpose of this order:

(1) "Civilian work clothing" means the following items:

Civilian work clothing:
(1) Men's bib overalls.
(2) Boys' bib overalls.
(3) Men's dungarees.

[1] Formerly Part 3154.

(4) Boys' dungarees.
(5) Men's work shirts.
(6) Boys' work shirts.
(7) Men's one piece work suits.
(8) Men's work pants.
(9) Boys' work pants.
(10) Men's overall jackets (jumpers).
(11) Men's blanket-lined coats.

(2) "Garments" means civilian work clothing and any similar garments (such as shirts, dungarees, battle dress, fatigues, etc.) made for delivery to United States Army or Navy. It does not include headwear, leggings, hosiery and gloves.

(3) "Unit" means a dozen of garments, whether civilian work clothing or garments for delivery to the United States Army or Navy.

(4) "Base period" means the third calendar quarter of the year 1942.

(5) "Military unit" means a dozen of garments delivered by the producer to fill contracts of the United States Army or Navy.

(6) "Manufacturer" means a person in the business of producing any item of civilian work clothing and includes any person who causes civilian work clothing to be manufactured commercially for his account. It also includes a person who manufactures similar garments (such as dungarees, battle dress, fatigues, etc.) for the United States Army and Navy.

(b) *Production quotas.* (1) Each manufacturer shall in the calendar quarter beginning July 1, 1944, and in each calendar quarter thereafter, produce at least 90% of the number of units he produced in the base period. Thus, if the manufacturer's production in the base period totaled 100,000 dozen, he is required to produce quarterly at least 90,000 dozen garments, civilian and military. If in the particular quarter his production of military garments is 50,000 dozen, this amount may be subtracted from his total production quota (that is, 90% of his units of production in the base period), and his civilian work clothing quota in that quarter would be 40,000 dozen. The War Production Board may from time to time order increased production by the entire industry or by individual manufacturers. Unless his inventory of any finished item of civilian work clothing is less than 30 days production of the item, each manufacturer shall accept and fill all orders for the item tendered to him at regularly established terms and prices.

(2) *Civilian work clothing production quota by items.* Each manufacturer shall produce the number of units of civilian work clothing required by paragraph (b) (1) in those items of civilian work clothing which he produced in the base period; and the proportion of his production of each item to his total production of civilian work clothing in each calendar quarter shall be the same as the proportion which his production of such item in the base period was to his total civilian work clothing production in the base period. However, to the extent only that his machinery suitable for the manufacture of an item of civilian work clothing is not available because it is being operated in the manufacture of military garments he may shift his quota of that civilian item to other civilian items. (Thus, if in the base period he produced men's bib overalls, boys' bib overalls, boys' work shirts and men's one piece work suits, he must continue to produce the same items; and if in the base period his production of each of these items was 25% of his total civilian production, he must continue to produce each of these items in the same proportion to his total civilian production. If his shirt machinery is taken up by military production, he may shift his quota of boys' work shirts to the other items.)

(c) *Priorities assistance.* The War Production Board may from time to time issue special programs for the production with priorities assistance and for the distribution of specified quantities of specified items of civilian work clothing.

(d) *Miscellaneous provisions*—(1) *Applicability of regulations.* Except as otherwise provided herein, this order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time.

(2) *Violations and false statements.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Communications.* All reports to be filed hereunder and communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Clothing, Knit Goods and Equipage Division, Washington, 25, D. C. Ref.: M–379.

(4) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and setting forth the grounds of the appeal. An appeal for the suspension of the requirements of paragraph (b) may be made on the ground that compliance therewith will result in production at a loss, *Provided*, That an application for price relief on that ground is first filed with the Secretary of the Office of Price Administration, Washington, D. C., and a copy is filed with the War Production Board appeal. If the War Production Board appeal is granted, requirements for increases above current production will be suspended until the decision by the Office of Price Administration upon the application for price relief. This paragraph does not indicate or limit the extent or kind of price relief, if any, which may be granted by the Office of Price Administration.

Issued this 10th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 3293—CHEMICALS

[Allocation Order M–30, as Amended July 10, 1944]

ETHYL ALCOHOL

§ 3293.66 *Allocation Order M–30*—(a) *Definitions.* (1) "Ethyl alcohol" means the product of that name, from whatever source derived. The term includes mixtures of ethyl alcohol and denaturants, including the product known as "proprietary solvent." The term does not include ethyl alcohol which has been tax paid for beverage purposes.

(2) "Producer" means any person engaged in the production of ethyl alcohol under an industrial alcohol permit issued by the Bureau of Internal Revenue and includes any importer and any person who has ethyl alcohol produced for him pursuant to toll agreement.

(3) "Distributor" means any person who has purchased or purchases ethyl alcohol for purposes of resale.

(4) "Supplier" means a producer or distributor.

(b) *General restrictions on deliveries and use.* (1) No person shall accept delivery of ethyl alcohol from a supplier except in accordance with the procedure established by paragraphs (c) and (d) or except upon specific written authorization of the War Production Board issued on application made pursuant to paragraph (e).

(2) No supplier shall deliver any ethyl alcohol except in accordance with the provisions of paragraph (f) or except upon specific written authorization of the War Production Board, issued on application made by the supplier under paragraph (g).

(3) No supplier shall use any ethyl alcohol except upon specific written authorization of the War Production Board issued on application made by him under paragraph (e).

(c) *Acceptance of certain deliveries of 7900 gallons or less per quarter.* Any person may without specific written authorization of War Production Board accept delivery in any calendar quarter from all sources or not more than 7900 gallons of ethyl alcohol, subject to two conditions. The first condition is that he shall have furnished to each supplier from whom he obtains delivery a certificate substantially in the form set forth in Appendix C. The second condition is that the aggregate amount received (in no case in excess of 7900 gallons) must be within the following additional quantity limitations:

(1) Where the purpose for which delivery is requested is the manufacture of any of the following products, the quantity received in any calendar quarter shall not (without specific written authorization) exceed 100% of the quantity used for the same purpose in the corresponding calendar quarter of the 12-month period ended June 30, 1941:

Adhesives.
Agricultural poisons.
Brake fluids.
Cutting oils.

Drugs and pharmaceuticals (not including rubbing alcohol or products specifically listed in paragraphs (c) (3) or (c) (4)).

Photographic materials (including photo engraving).
All other products not classified in paragraphs (c) (2) to (c) (6) inclusive.

(2) Where the purpose is the manufacture of any of the following products, the quantity received in any calendar quarter shall not (without specific written authorization) exceed 50% of the quantity used (meaning used or processed on the premises of the person who is entitled to the quota) for the same purpose in the corresponding calendar quarter of the 12-month period ended June 30, 1941:

Candy glazes.
Cleaning and polishing preparations (including shoe and floor polishes).

However, any person who, during the period from July 1, 1942 to June 30, 1943 inclusive, held a permit issued by the Bureau of Internal Revenue and who purchased ethyl alcohol in quantities averaging not in excess of 162 gallons per calendar quarter during such period and who used such ethyl alcohol for the manufacture of toiletries and cosmetics, may continue to purchase and use not more than 162 gallons of ethyl alcohol per calendar quarter for the manufacture of toiletries and cosmetics.

For the purposes of this paragraph (c) (2) all toiletry and cosmetic uses of ethyl alcohol shall be considered as a whole, and the use during the base period of ethyl alcohol in the manufacture of a particular toiletry or cosmetic product may be used to support the acceptance of delivery for use in the manufacture of a different toiletry or cosmetic product. For example, ethyl alcohol used in the manufacture of toilet waters during the base period would support the receipt of ethyl alcohol for the manufacture of after-shave lotions containing ethyl alcohol.

(3) Where the purpose is the manufacture of one of the following products, the quantity received in any calendar quarter shall not (without specific written authorization) exceed 60% of the quantity used for the same purpose in the corresponding calendar quarter of the 12-month period ended June 30, 1941:

Antiseptics for oral uses (including Antiseptic Solution N. F.).
Mouth washes.

(4) Where the purpose is the manufacture of any of the following products, there shall be no further limitation on the quantity received (beyond the requirement that only 7900 gallons may be accepted in a calendar quarter):

Acetaldehyde.
Acetic acid (except vinegar for food use).
Basic medicinal chemicals not in compounded form.
Biological preparations.
Butadiene.

Flavoring extracts.
Vinegar.

(6) Where the purpose is the manufacture of any rubbing alcohol compound or preparation, the quantity received in any calendar quarter shall not (without specific written authorization) exceed 15% of the quantity used for the same purpose in the corresponding calendar quarter of the 12-month period ended June 30, 1941.

(7) Where the purpose is not the manufacture of other products but resale as ethyl alcohol, specific written authorization of War Production Board shall in every case be obtained, whatever the quantity, except as provided in (d) (1).

(d) *Special exemptions.* The following deliveries may be accepted without War Production Board authorization, notwithstanding the provisions of paragraphs (b) and (c) of this order:

(1) *Small deliveries.* Any person, upon giving to each supplier from whom he obtains delivery a certificate substantially in the form set forth in Appendix D, may, without any limitation based on past use, accept small deliveries as specified in this paragraph. The specified maximum quantity of either (but not both) of the following two categories of ethyl alcohol may be accepted from all sources: (i) 972 gallons, which may be comprised of proprietary solvent or completely denatured alcohol, or a portion of each, or, in the alternative (ii) 162 gallons which may be comprised of specially denatured or pure alcohol, or a portion of each. However, in computing the amount which may be so accepted, all other ethyl alcohol delivered or ordered for delivery in the same quarter pursuant to any of the provisions of this order, must be taken into account and only the difference between any amounts so delivered and ordered and either 972 gallons or 162 gallons, as the case may be, may be accepted pursuant to this paragraph. Moreover, specially denatured and pure alcohol may not be accepted under this paragraph for use in the manufacture of rubbing alcohol compound or preparation or for use in the manufacture of toiletries and cosmetics.

Any person entitled under this paragraph to receive a small delivery of ethyl alcohol shall not tell the supplier to deliver it to another person for processing under toll agreement or if the delivery was made directly to the person entitled under this paragraph to receive it, he shall not thereafter deliver the alcohol to another person for processing under toll agreement.

(2) *Hospitals and scientific institutions.* Any hospital or scientific institution holding a permit issued by the Bureau of Internal Revenue permitting it to acquire undenatured alcohol tax free, may, without any limitation based on past use, accept delivery of such quantity of alcohol as it is permitted to acquire tax free by such permit.

(3) *Beverage use.* Any person may accept delivery of ethyl alcohol in bond for the purpose of tax paying the same for beverage purposes if that person is authorized to do so under the rules and regulations of the Bureau of Internal Revenue.

(e) *Acceptance of deliveries (and use by suppliers) upon specific authorization.* Each person seeking specific authorization to accept delivery of ethyl alcohol during any calendar quarter, whether for his own consumption or resale (and each supplier requiring authorization to use ethyl alcohol in any calendar quarter) shall file application therefor on or before the 5th day of the last month of the preceding quarter. The application will be made on Form WPB-2945 (formerly PD-600) in the manner set forth in the general instructions appearing on that form, subject to the special instructions appearing in Appendix A to this order. If there is any inconsistency between the general and special instructions, the special instructions must be followed.

(f) *Special provisions governing deliveries by suppliers.* (1) A supplier may without specific authorization of the War Production Board deliver to any person, who has filed with him the appropriate certificate substantially in the form either as set forth in Appendix C or in Appendix D, the quantity of ethyl

alcohol which such person is entitled to receive under one of the paragraphs (c) (1) to (c) (6), inclusive, or under paragraph (d) (1). A supplier must not deliver ethyl alcohol where he knows or has reason to believe that the certificate is false, but in the absence of such knowledge or reason to believe he may rely upon it.

(2) A supplier may, without such certificate and without specific authorization of the War Production Board, deliver to any hospital or scientific institution which holds a permit issued by the Bureau of Internal Revenue permitting it to acquire undenatured alcohol tax free, such quantity of alcohol as such hospital or scientific institution is permitted to acquire tax free by its permit.

(3) Any person may tax pay for beverage purposes, and any producer may deliver in bond to any person authorized under the rules and regulations of the Bureau of Internal Revenue to receive ethyl alcohol in bond for the purpose of tax paying the same for beverage purposes, such quantity of ethyl alcohol as is authorized by War Production Board pursuant to application of the original producer made by letter addressed to the Chemicals Bureau, War Production Board, Washington 25, D. C.

(4) If War Production Board issues written directions to suppliers reducing the quantities of ethyl alcohol which may be delivered pursuant to paragraph (f) (1), suppliers will rateably reduce all orders for ethyl alcohol from customers wishing it for the same class of use.

(i) Any person may deliver or accept delivery of completed anti-freeze preparations containing ethyl alcohol without specific authorizations under this order; and

(ii) Nothing contained in this order shall be construed to permit the manufacture, delivery or acceptance of delivery of any anti-freeze preparation in violation of § 1100.1, Limitation Order L-51, as from time to time amended.

[General Preference Order M-69, as Amended July 10, 1944]

DISTILLED SPIRITS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of distilled spirits, as hereinafter defined, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3293.101[1] *General Preference Order M-69*—(a) *Definitions.* (1) "Distilled spirits" means ethyl alcohol of 190 proof or higher produced from corn or grain.

(2) "High wines" means spirits distilled at less than 190 proof from corn or grain.

(3) "Producer" means any person engaged in the operation of a distillery under a registered distillery permit issued by the Bureau of Internal Revenue.

(4) "Distillery" means any distillery which has equipment and facilities to convert corn or grain into distilled spirits or high wines.

(b) *Restrictions on operations of distilleries.* No producer shall, except as specifically authorized or directed by the War Production Board, operate any part of his distillery except for the production of distilled spirits: *Provided, however,* That the War Production Board, on a proper showing by a producer that the equipment and facilities of his distillery, or of any part of his distillery, cannot be converted or adapted to the production of distilled spirits, may authorize the operation thereof for the production of high wines.

(c) *Restrictions on use.* No producer, except as specifically authorized or directed by the War Production Board shall use, bottle or barrel for beverage purposes or otherwise allocate or appropriate to such purposes any distilled

spirits produced on or after February 20, 1942, or any high wines produced on or after November 1, 1942.

(d) *Directions and restrictions respecting delivery.* (1) The War Production Board will from time to time issue authorizations or directions to each producer to deliver specified quantities of distilled spirits to designated persons for designated non-beverage purposes. Except as specifically authorized or directed by the War Production Board, no producer shall deliver to any person distilled spirits produced on or after February 20, 1942: *Provided, however,* That if at any time all deliveries theretofore authorized or directed by the War Production Board have been made or provided for, a producer may deliver such distilled spirits for non-beverage purposes to the persons and in the quantities permitted by General Preference Order M-30, as amended from time to time.

(2) The War Production Board will from time to time issue authorizations and directions to each producer to deliver specified quantities of high wines to designated persons for redistillation into distilled spirits. Except as specifically authorized or directed by the War Production Board, no producer shall deliver high wines produced on or after November 1, 1942 to any person for any purpose. No producer shall deliver high wines produced before that date unless all deliveries theretofore directed by the War Production Board shall have been made or provided for.

(3) No person shall accept delivery of distilled spirits or high wines if such person knows or has reason to believe that the said delivery is made in violation of the restrictions of this paragraph (d).

(e) *Alterations of existing equipment and facilities.* Except as specifically authorized or directed by the War Production Board, no producer whose distillery has equipment and facilities for the production of distilled spirits shall alter such equipment and facilities in any way so as to impair the capacity of such distillery to produce distilled spirits.

(f) *Directions as to use of materials.* War Production Board may from time to time issue directions to producers as to the kinds of raw materials which may be used in the production of distilled spirits or high wines.

(g) *Notification of customers.* Producers of distilled spirits and high wines shall, as soon as practicable, notify each of their regular customers of the requirements of this order, but failure to give such notice shall not excuse any such person from complying with the terms hereof.

(h) *Miscellaneous provisions*—(1) *Applicability of priorities regulations.* This order and all transactions affected hereby are subject to all applicable provisions of the War Production Board priorities regulations, as amended from time to time.

(2) *Intra-company transactions.* The prohibitions and restrictions of this order with respect to deliveries of distilled spirits and high wines, shall apply not only to deliveries to other persons, including affiliates and subsidiaries, but also to deliveries from one branch, division or section of a single enterprise to another branch, division or section of the same or any other enterprise under common ownership or control.

(3) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(4) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of material conserved, or that compliance with this order would disrupt or impair a program of conversion from non-defense to defense work, may appeal to the War Production Board by addressing a letter to the War Production Board, Chemicals Division, Washington, D. C., Ref: M-69, setting forth the pertinent facts and the reasons he considers that he is entitled to relief. The War Production Board may thereupon take such action as it deems appropriate.

(5) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Chemicals Division, Washington, D. C. Ref: M-69.

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 525 is amended in the following respects:

1. In section 2 (a) immediately after the word "regulations:", the following phrase is inserted: 2d Rev. MPR 19—Southern Pine Lumber (mouldings); RMPR 26—Douglas Fir and Other West Coast Lumber (mouldings);

2. In section 2, paragraph (b) is amended to read as follows:

(b) *Definition of the term "jobber's sale of stock millwork".* As used in this regulation the term "jobber's sale of stock millwork" means all sales out of jobbers' warehouses to retail lumber yards and other distributors and all direct mill sales of items covered by Revised Maximum Price Regulation No. 293 in quantities exempted under section 2 (b) (1) thereof. (Revised Maximum Price Regulation No. 293 covers direct-mill sales in quantities of 12,000 pounds or more by truck delivered to one place, or of 15,000 pounds or more by rail delivered to one or more places, no matter whether the buyer is a jobber, dealer, or anyone else.) Note that sales out of jobbers' warehouses which are situated in the same locality as a manufacturing plant and which are controlled by the plant, or control it, or are under common control with it, are on the same basis as sales direct from the factory.

3. A sentence is added to section 3 (a) (1) as follows: Unless otherwise specified, the mark-ups given in this regulation are to be added to the manufacturer's largest quantity maximum price.

4. In section 3 (a), paragraph (2) is amended to read as follows:

(2) *Items not specifically priced.* Any person whose stock list includes stock millwork items which are not shown on the stock lists specified in the appendix for the particular area in which the sale is to be made shall file with the Lumber Branch, Office of Price Administration in Washington 25, D. C., a copy of his stock list, indicating which stock millwork items in it are not included in the stock lists specified for the area, and may thereafter sell these items at the maximum prices, if any, established for that area unless notified to the contrary by the Office of Price Administration within thirty days of the receipt of the filing of the list. If no mark-up is provided for any such item for that area, the seller must apply to the Office of Price Administration for approval of a mark-up. His application must show the mark-up used prior to March 31, 1942 for the same item. Such a mark-up may not be used by the seller before approval by the Office of Price Administration.

5. In section 3, a new paragraph (d) is added to read as follows:

(d) *Maximum prices for sales of items which cannot be priced under paragraph (a) or (b).* Any person desiring to make a direct-mill sale of an item covered by RMPR 293 in quantities exempt under section 2 (b) (1) of that regulation for which a price cannot be otherwise computed under other provisions of this regulation, or a sale under this regulation of any item under any circumstance in which a price cannot be otherwise computed under other provisions of this regulation must make application to the Lumber Branch, Office of Price Administration, Washington 25, D. C. for approval of a price. The application must contain a complete description of the item to be priced, the requested selling price, the maximum price under the GMPR, and any additional facts which the respondent cares to make in support of the requested price.

As soon as the request has been filed, quotations and deliveries may be made at the requested price, but final payment may not be made until the price has been approved. Action on the request may be by letter or telegram.

6. Section 5 is amended to read as follows:

SEC. 5. *Invoicing requirements.* An invoice must be rendered in all sales. All invoices must contain a sufficiently complete description of the millwork to show whether the price is proper or not. Any specification or extra which affects the maximum price must be mentioned in the description. The invoice must show whether the sale is a carload or less-than-carload sale, whether shipped by rail or truck, the total quantity and price of each item, the total value of the sale, origin and destination of the shipment, and any additions for packaging.

PART 1351—FOOD AND FOOD PRODUCTS

[RMPR 289,[1] Amdt. 8]

DAIRY PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Revised Maximum Regulation 289 is amended in the following respect:

Section 18a is added to read as follows:

SEC. 18a. *Maximum prices for listed dairy products purchased for ultimate sale to ship operators*—(a) *Sales by civilian sellers to licensed ship suppliers or to designated corporations.* Notwithstanding other provisions of this regulation, in any case where the purchase order has been initially placed by, through, or pursuant to the direction of the War Shipping Administration, the maximum price for the sale of any listed dairy product by any civilian seller other than a designated corporation to any licensed ship supplier or to any designated corporation shall be the maximum price as established by other provisions of this regulation and as adjusted by additions permitted by other pertinent regulations or orders issued by the Office of Price Administration for the sale of such listed dairy products by such seller to the United States Government or any of its agencies.

(b) *Sales by designated corporations to licensed ship suppliers or to other designated corporations.* Notwithstanding other provisions of this regulation, any designated corporation which has purchased any listed dairy product from any civilian seller, upon order initially placed by, through or pursuant to the direction of the War Shipping Administration, or from any agency of the United States government, for the purpose of ultimate resale to any licensed ship supplier shall sell such listed dairy product at a maximum price not in excess of the sum of (1) the purchase price paid by such corporation plus all interest charges, apportioned to the particular lot of the listed dairy product being sold, not to exceed 2% per annum, (2) all banking charges, apportioned to the particular lot of the listed dairy product being sold, not to exceed ½% per annum, (3) all out of pocket storage charges actually incurred and paid to a public warehouse for storing the listed dairy product being sold, (4) all administration charges actually incurred in handling the specific listed dairy product being sold and (5) all transportation charges actually paid by the designated corporation for transporting the specific listed dairy product being sold to the place where title passes to the purchaser. No interest or banking charges may be added, however, unless actually incurred in connection with a loan obtained to facilitate the purchase of the listed dairy product being sold by the designated corporation from a bank approved in writing by the War Shipping Administration. Furthermore, before any designated corporation may add any of the interest, banking, storage, administration, or transportation charges referred to above, these charges must be approved in writing by the War Shipping Administration.

(c) *Sales by licensed ship suppliers to other licensed ship suppliers.* Notwithstanding other provisions of this regulation, the maximum price at which any licensed ship supplier may sell any listed dairy product to another licensed ship supplier, where the sale has been requested or directed by the War Shipping Administration, shall be the sum of (1) the purchase price paid for such listed dairy product, (2) the actual out of pocket storage charges paid to a public warehouse for storing the listed dairy product being sold, and (3) all transportation charges actualy paid by the seller for transporting the specific listed dairy products being sold to the place where title passes to the purchasing licensed ship supplier: *Provided, however,* That if such sale is not requested or directed by the War Shipping Administration, the maximum price which may be charged by the seller shall be the purchase price paid by him for such listed dairy products.

In no event, however, may any licensed ship supplier add any storage or transportation charges under the provisions of this paragraph (c) unless such charges have been approved in writing by the War Shipping Administration.

(d) *Sales of listed dairy products delivered shipside by licensed ship suppliers to ship operators.* Notwithstanding other provisions of this regulation, the maximum price at which any licensed ship supplier shall sell, delivered shipside, any listed dairy product which he has purchased under the provisions of this section or from any agency of the United States Government to any ship operator shall be the maximum price for such sale as established by other provisions of this regulation and other applicable orders and regulations issued by the Office of Price Administration plus the sum of (1) the difference between the highest maximum price he could pay any one of his usual suppliers under other sections of this regulation for the listed dairy product being sold and the purchase price paid by him for such listed dairy product, and (2) the actual out of pocket storage charges accrued and paid to a public warehouse for storing the listed dairy product being sold. However, no licensed ship supplier may add any storage charges which have not been approved in writing by the War Shipping Administration.

(e) *Definitions*—(1) *Designated corporation.* "Designated corporation", as used in this regulation, means any corporation which has received the written approval of the War Shipping Administration to receive and to stockpile set aside, restricted, and designated foods for the purpose of ultimate resale to licensed ship suppliers.

[MPR 547]

MAXIMUM PRICES FOR SPECIFIED LOW PRICE-LINE GARMENTS

A statement of the considerations involved in the issuance of this Maximum Price Regulation No. 547 has been issued simultaneously herewith and filed with the Division of the Federal Register.* In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected or have previously been promulgated and their use lawfully required by another Government agency. To the extent that this regulation operates to compel changes in the business practices, costs practices or methods, or means or aids to distribution established in the industries affected, the Administrator has found that such action is necessary to prevent circumvention or evasion of this regulation.

AUTHORITY: Secs. 1 to 10, inclusive (§ 1389.-605) issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383; 78th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

SECTION 1. *What this regulation covers.* This regulation establishes dollar-and-cents ceiling prices for all sales of specified low price line garments made from fabrics for which priorities assistance has been given in accordance with Men's Shorts Program No. 1, Men's Shirts Program No. 1, Women's Housedresses Program No. 1 and Women's and Misses' Slips Program No. 1, issued June 20, 1944 under Schedule A of War Production Board Conservation Order No. M-328B. This regulation covers sales in the 48 states and the District of Columbia.

SEC. 2. *Ceiling prices*—(a) *Ceiling prices for garments covered by this regulation and made in accordance with the standards and specifications stated in Schedule A of War Production Board Conservation Order M-328B, are established as follows:*

Item	Size	Sales other than at retail, per doz. f. o. b. point of shipment	Sales at retail (per garment)
1. Men's shorts	28-44	$3.55	$0.39
2. Men's dress shirts:		Less 8% trade discount for all sales to persons other than sellers at retail; net for sales to sellers at retail.	
(a) Printed and solid colors	14-17	12.25	1.39
(b) White	14-17	11.25	1.39
3. Housedresses	12-44	12.75	1.49

	46-52	6.40	.75

For all items, the time limit for payment will be the seller's customary business practice to purchasers of the same class.

Examples: 1. A manufacturer sells men's shorts to a jobber. His ceiling price for the sale is $3.27 per dozen (the stated price of $3.55 less 8%).

2. A manufacturer sells printed shirts to a jobber. His ceiling price for the sale is $11.27 per dozen (the stated price of $12.25 less 8%).

3. A jobber sells men's shorts to another jobber. His ceiling price is $3.27 per dozen (the stated price of $3.55 less 8%).

4. A manufacturer (or a jobber) sells printed shirts to a retailer. The ceiling price for such sales is the net price of $12.25 per dozen.

5. A manufacturer sells slips to a jobber (or to a retailer) in the 34-44 size range. The ceiling price for such sale is $5.29 per dozen (the stated price of $5.75 less 8%).

6. A jobber sells slips to a retailer in the 46-52 size range. His ceiling price for the sale is the net price of $6.40 per dozen. His ceiling price to another jobber is also the net price of $6.40 per dozen.

(b) *Ceiling prices for garments covered by this regulation but which do not meet the standards and specifications set forth in Schedule A of War Production Board Conservation Order M-328B,* may be established only by specific authorization from the Office of Price Administration, Washington, D. C. No person is permitted to deliver such garments until he receives such authorization. A seller, in order to secure an authorized ceiling price, must file with the Consumer Goods Division of the Office of Price Administration, Washington, D. C. an application setting forth each particular in which the garment for which he seeks a ceiling price differs in construction from the garment for which specifications are set forth in Schedule A of War Production Board Conservation

*Copies may be obtained from the Office of Price Administration.

Order M–328B and a breakdown of his total unit cost of the garment in the detail customarily used by him. The applicant must also submit a sample of the garment for which he seeks authorization of a ceiling price.

SEC. 3. *Definitions*—(a) *Sale at retail.* A "sale at retail" is a sale to an ultimate consumer. Also, sales to industrial, commercial, or institutional users are "sales at retail" if made by a person who sells principally at retail. If not made by such a person, then they are "sales other than at retail."

(b) *Sale other than at retail.* Any sale which is not a "sale at retail" as defined in paragraph (a), above, is a "sale other than at retail."

(c) *Manufacturer.* A "manufacturer" of a garment is a person who sells the completed garment after having fabricated it or who sells the completed garment after having sold or consigned to the fabricator thereof any of the principal materials from which it was made.

(d) Unless the context otherwise requires, or unless specifically provided herein, the definitions set forth in § 1499.20 of the General Maximum Price Regulation [1] shall apply to the terms used herein.

SEC. 4. *Marking.* On and after the effective date of this regulation, every manufacturer is forbidden to deliver any garment covered by this regulation unless each garment is marked with (a) the manufacturer's War Production Board case number, (b) the appropriate retail ceiling price specified in this regulation, and (c) if the garment is a "second" or "imperfect" a marking to that effect. If any part of the required marking has not been performed by the manufacturer it must be supplied by the retailer. A manufacturer, within five days after written request, shall furnish to any retailer who purchases any of the garments covered by this regulation all information necessary for correct marking of the garment. The required marking must be attached to each garment. It must be attached by stitching, adhesive, pins, staples, or string tickets, or stamped on the garment itself, and must be placed on the garment where it is clearly visible to retail purchasers.

SEC. 5. *When taxes may be added.* If a statute or ordinance imposes a tax upon a particular sale or delivery (such as a sales tax, gross proceeds or gross receipts tax or compensating use tax) and permits such tax to be stated separately from the selling price, the seller may collect such tax in addition to the maximum price under this regulation, provided that he states the amount of the tax separately. However, this provision does not apply to any tax imposed on a prior sale or delivery of the same article.

SEC. 6. *Sales slips and invoices.* (a) Any retailer who has customarily given a purchaser a sales slip, receipt or similar evidence of purchase shall continue to do so. Upon request from a purchaser, any retailer, regardless of previous custom shall give the purchaser a receipt showing the date, name and address of the seller, the description of each garment sold and the price received for it.

(b) All sellers other than sellers at retail shall give an invoice to purchasers and retain a duplicate thereof for inspection by the Office of Price Administration. The invoice shall show the date, the name and address of the seller and the purchaser, and with respect to each style of garment sold, the manufacturer's War Production Board Case number, the terms of sale, the style or lot number, size or size range, quantity and price.

SEC. 7. *Records.* (a) Every person who purchases garments covered by this regulation for purposes of resale shall retain and keep for inspection by the Office of Price Administration all invoices received in connection with purchases of such garments.

(b) Manufacturers must retain the following for inspection by the Office of Price Administration:

(1) *Purchase invoices.* All invoices for materials and trimmings used in the manufacture of garments covered by this regulation must be retained. On each invoice for material or trimming must be recorded the numbers of the cutting tickets for cuttings in which that material or trimming was used.

(2) *Cutting tickets.* A separate cutting ticket must be prepared and retained for each cutting of garments covered by this regulation, and should contain:

(i) Cutting ticket number
(ii) Date of cutting
(iii) Style number of garment
(iv) Number of garments cut in each size
(v) Number of yards of material and trimming used
(vi) Invoice number of materials and trimmings used.

(3) *Markers and patterns.* Manufacturers must retain the marker used on each cutting of garments, or, if the marker is cut with the lay, all patterns used in each cutting must be retained, whether the cutting is done in the manufacturer's establishment or in the establishment of a contractor.

SEC. 8. *Relation to other maximum price regulations*—(a) *Regulations superseded.* The coverage of this regulation is stated in section 1. Where this regulation applies, it supersedes the provisions of the following:

(1) General Maximum Price Regulation.
(2) Maximum Price Regulation No. 332 [2] (Simplified Men's and Boys' Shirts and Pajamas).
(3) Revised Maximum Price Regulation No. 287 [3] (Manufacturers' Prices for Women's Girls' and Children's Outerwear Garments).
(4) Maximum Price Regulation No. 330 [4] (Retailers' and Wholesalers' Prices for Women's, Girls' and Children's Outerwear Garments).

(b) *Contractor's services.* The regulation does not apply to charges for contractors' services which are governed by Maximum Price Regulation No. 172.[5] (Charges of Contractors in the Apparel Industry).

"Contractor" is defined in § 1389.52 of that regulation.

(c) *Export sales.* This regulation does not apply to export sales or deliveries of the articles covered in section 2 of this regulation. Such sales and deliveries are covered by the Second Revised Maximum Export Price Regulation.[6]

(d) *Import sales.* The provisions of this regulation do not apply to sales or deliveries made from points outside the 48 states and the District of Columbia. Such sales and deliveries are governed by the provisions of the Maximum Import Price Regulation.[7] This regulation does, however, apply to domestic sales when the articles sold were originally imported.

SEC. 9. *Prohibitions, enforcement and licensing*—(a) *Prohibitions.* On and after July 7, 1944, regardless of any contract or obligation, no person shall:

(1) Sell or deliver any article covered by this regulation at a price higher than the ceiling price permitted by this regulation; or

(2) Deliver any article made from a fabric for which he has received priority assistance pursuant to any of the special programs issued June 20, 1944 under Schedule A of War Production Board Conservation Order M–328B, but not meeting the specifications set forth therein unless he shall have first secured from the Office of Price Administration an authorized ceiling price therefor as provided by section 2 of this regulation; or

(3) Buy or receive, in the course of trade or business at a price higher than the ceiling price permitted by this regulation, any article covered by this regulation; or

(4) Require a purchaser to buy or agree to buy any article, service, package or wrapper in connection with the sale or delivery of any article covered by this regulation; or

(5) Do any other act which directly or indirectly increases above the ceiling price the consideration paid by the purchaser for any article, covered by this regulation. Any practice which is a device to secure the effect of a higher than ceiling price is as much a violation as an outright raising of the ceiling price. This applies to but is not limited to the devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, tying-agreements, trade understandings and all similar practices.

(6) Offer, attempt, or agree to do any of the acts prohibited by this regulation.

(b) *Enforcement.* Any person who violates any provisions of this regulation is subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided by the Emergency Price Control Act of 1942, as amended.

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 2 is amended in the following respects:

1. Section 14, paragraph (a) is amended by the addition of another grade of aluminum scrap to the schedule of prices, Appendix A, as follows:

Contaminated aluminum foil scrap not conforming to these specifications shall be bought and sold for not more than a price, below the maximum price for clean aluminum foil scrap, fairly reflecting the value of such scrap.

2. Section 14, paragraph (a), Note 4 is revoked.

3. Section 14, paragraph (a), Note 6 is amended to read as follows:

NOTE 6: *Premiums for special preparation.* (a) Upon the sale of segregated solid aluminum plant scrap of any of the wrought aluminum or S-type alloys, except 2S and 3S, to the Aluminum Company of America, the Olin Corporation, or the Reynolds Metals Company, the following premiums may be charged, demanded, paid or offered:

	Premium (cents per pound)
If such scrap is baled or packaged, suitable for briquetting	½
If such scrap is briquetted, or in large pieces too heavy to briquette	1

(b) Upon the sale of wrecked aircraft, prepared, a premium of one-half cent per pound of material may be charged, demanded, paid or offered if such scrap is baled by compression or briquetted.

(c) The maximum price charged for aluminum scrap specially prepared or processed in any other manner shall be a price hereafter established in writing by the Office of Price Administration. The price so established shall be a price in line with the general level of prices established by this Maximum Price Regulation No. 2, taking into account the buyer's special requirements and the additional cost to the seller in preparing material to meet the buyer's requirements.

Any person desiring to sell such material may apply to the Office of Price Administration at Washington, D. C., for the establishment of a price that such person may charge for such scrap. Such application shall be in writing and shall state:

(1) The nature of seller's business.

(2) The name and address of the purchaser.

(3) The quantity of material to be processed or prepared and the purpose for which it is to be used.

(4) A detailed statement of the buyer's specifications for the material and a description of the manner in which the material has been or will be specially prepared.

(5) To the extent possible, a statement of the additional expense to the seller in preparing the material for the purchaser's use.

Transfers to such fleet operators on a delayed settlement basis may be made only if the conditions set forth in this section are met and the procedures provided are followed. When used in this section, the term "fleet operator" means the operator of a fleet of official or commercial motor vehicles.

(b) *Fleet operators eligible to receive transfers on a delayed settlement basis.* Any person (including a government, government agency, or government subdivision) who operates a fleet of official or commercial motor vehicles may acquire gasoline on a delayed settlement basis if he meets all the following tests:

(f) *Settlement.* Within the week following the calendar week in which he acquires gasoline pursuant to this section every fleet operator shall issue to his supplier a ration check for the number of gallons owed by him to that supplier. A fleet operator who fails to receive such a statement and original delivery receipts within a reasonable time after the calendar week in which such transfer was made shall immediately notify in writing the District Office having jurisdiction over the area where his principal place of business is located, stating all relevant facts and shall forward his ration check to his supplier for the gallonage of ration credits shown to be owing by his copies of the delivery receipts issued. A supplier who fails to receive a ration check in payment of a statement within two weeks after such statement was forwarded pursuant to paragraph (e) of this section, shall notify the District Office having jurisdiction over the area where his place of business is located, stating all the relevant facts.

(g) *Records to be kept and reports to be made by fleet operators.* (1) Delivery receipts shall be furnished by fleet operators for use as provided in paragraph (d) of this section and shall be securely bound in pads and serially numbered. A set of delivery receipts for use in a single transaction shall consist of an original, plainly marked "original", a first copy, plainly marked "duplicate", and a second copy, plainly marked "triplicate", all of which shall bear the same serial number. (iii) A record, which may consist of a notation on the duplicate copy of the delivery receipt, of the date on which a statement was submitted pursuant to paragraph (e), and the date on which a ration check was received.

(2) Every dealer and distributor shall keep at the designated place of business one copy of each of the letters of designation received by him pursuant to the provisions of subparagraph (3) of paragraph (b) of this section during the period in which he makes deliveries of gasoline upon a delayed settlement basis and for one year after the termination of the arrangement for the transfer of gasoline by him pursuant to such letter and this section.

The applicant shall submit with his application one copy of each of the designations received by him pursuant to § 1394.8153a (b) and Part A of his certificate of registration. The Board shall forward the application, together with copies of the designations submitted, and Part A and Part B of the applicant's registration certificate to the District Director of that District or his designee.

If the District Director or any person designated by him to consider such application determines that the applicant needs additional allowable inventory to make such transfers upon a delayed settlement basis, he shall increase the applicant's storage capacity in such manner as will provide the additional allowable inventory which he determines to be necessary for this purpose. However, the amount of such increase shall not exceed three times the average number of gallons of gasoline the applicant expects to transfer on a delayed settlement basis each week. The District Director or his designee shall deduct from the storage capacity so determined, the gallonage value of any shortage of gasoline or ration evidences which the applicant is unable to explain in the manner provided in § 1394.8217 (a) (1) and (3).

The District Director or his designee shall notify the applicant and the Board of the action taken upon the application and, if the application is granted, the applicant shall reregister as for a change of storage capacity.

In the event a District Director or any person designated by him for that purpose determines that a dealer or intermediate distributor no longer needs all or any part of the additional allowable inventory granted to him, such District Director or his designee may decrease the storage capacity of such dealer or intermediate distributor by the amount of the additional allowable inventory granted and no longer needed. The District Director or his designee shall notify such dealer or intermediate distributor and the Board of the action taken and such dealer or intermediate distributor shall reregister as for a change of storage capacity.

This amendment shall become effective July 14, 1944.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

TITLE 50—WILDLIFE

Chapter IV—Office of the Coordinator of Fisheries

[Order 1956; Area Coordinator's Gen. Direction H-1]

PART 401—PRODUCTION OF FISHERY COMMODITIES OR PRODUCTS

ALLOCATION OF HALIBUT WITHIN PORTS

Pursuant to Order No. 1956 of the Secretary of the Interior, issued June 13, 1944 (9 F.R. 6780), entitled "Allocation of halibut within ports," which is referred to hereinafter simply as "the order", and because it is deemed necessary to accomplish the purposes of the order, the following General Direction No. H-1 is issued:

§ 401.4 *Allocation of halibut within ports.* (a) In accordance with paragraph (g) of the order, schedules for the supervised allocation of halibut among dealers in certain ports, with the allocation to each dealer of a definite percentage of the total landings of halibut in the port, will be established by subsequent general directions. When such directions have been issued for any port, the purchases of halibut by each dealer in the port should, as nearly as is practicable, be such as to keep his total purchases for the season at all times approximately at the percentage allocation prescribed for him. The issuance of an allocation schedule direction for a port is not an assurance to any dealer that he will be allowed to purchase the named quota for the whole season; any percentage named is subject to reduction for any one of the several reasons as specified in the order.

(b) Each dealer shall keep accurate itemized records of all halibut purchased by him during the season from any source, showing for each purchase the poundage of halibut, and the name or number of the boat or other identification of the source, and showing the total purchases for the season. Records of all halibut purchases shall be posted within 48 hours after delivery date in a form readily available to the representative of the Area Coordinator. On request of the representative of the Area Coordinator, this record shall be produced for his inspection, and the dealer shall sign a statement showing the total halibut purchases by him from all sources during the season to the date of the statement, and certify to the truth of such statement as follows:

I certify that the above information is true to the best of my knowledge and belief, and that I am aware of the penalties for making a false statement as to any matter within the jurisdiction of the Secretary of the Interior under the Act of July 7, 1898, as amended, 18 U.S.C. 81.

(c) If upon such inspection it shall be found, from the dealer's records or other sources, that any dealer in a port where loads have not been individually directed by a representative of the Area Coordinator, has made total purchases considerably more than his prescribed percentage quota, or if at each of two or more successive inspections any such dealer shall be found to have made total purchases for the season appreciably more than his quota, such quota may be reduced appropriately by the Area Coordinator. Excess purchases made prior to the effective date of the order shall be balanced by reduced purchases thereafter as directed by the Area Coordinator or his representative.

(d) In accordance with paragraph (j) of the order, the Area Coordinator or his representative may direct the master of a halibut vessel arriving at a port to deliver his load to a particular dealer. In the absence of such a direction, the mas-

ter of the vessel must deliver its load to some dealer who has a valid permit and whose purchases, according to the information and belief of the master, conform to the approved allocation schedules in the manner described in the preceding paragraphs of this direction. Any delivery of halibut, or any acceptance of halibut, contrary to any such direction, or to the provisions of this paragraph, shall constitute a violation of this general direction and of the order.

(e) If a dealer refuses to accept and unload a halibut trip offered to him in accordance with this general direction, he must unload a vessel if offered to him on the next business day or forfeit the quantity of halibut on the latter trip which quantity shall be considered as received and credited to his percentage allotment. But no load shall be considered offered to the dealer on any particular day unless the vessel is at the dealer's dock ready for unloading by an hour in the afternoon recognized by custom in the port or indicated by reasonable consideration of all the circumstances as the hour when a dealer should be expected to receive and unload a halibut trip.

(f) Where a load of halibut is purchased by a dealer at one port and delivered to him at another, if delivery is made in a fishing vessel, and if only one of the two ports is operating under a percentage allocation schedule, the load shall be considered a part of the percentage assigned to the dealer at such port. The same result shall follow however delivery is made if resorted to for the purpose of evading the allocation schedule. If a load is bought in one allocation port and delivered in another port which is also an allocation port, it shall be computed as a part of the allotment of the dealer at one port or the other in the discretion of the Field Supervisor.

(g) This general direction shall become effective immediately; and purchases by permittees from the beginning of the season shall be included in the computation of landings to which the assigned percentages shall be applied, as provided by paragraph (n) of the order.

Issued this 3d day of July 1944.

V. J. SAMSON,
Area Coordinator, Area I.

QUOTA ON CERTAIN FISH ENLARGED

JULY 8, 1944.

The tariff-rate quota for the calendar year 1944 on certain fish dutiable under paragraph 717 (b), Tariff Act of 1930, as modified pursuant to the Canadian Trade Agreement, enlarged.

In accordance with the second proviso to item 717 (b) of Schedule II in the trade agreement with Canada (T. D. 49752), it has been ascertained that the average apparent annual consumption in the United States of fish, fresh or frozen (whether or not packed in ice), filleted, skinned, boned, sliced, or divided into portions, not specially provided for (except cod, haddock, hake, pollock, cusk, and rosefish), in the 3 years preceding 1944, calculated in the manner provided for in the cited agreement, was 121,404,386 pounds. The quantity of such fish that may be imported for consumption during the calendar year 1944 at the reduced rate of duty provided for in that trade agreement is, therefore, increased from 15,000,000 to 18,210,658 pounds. [Supp. Order ODT 3, Rev. 245]

COMMON CARRIERS

COORDINATED OPERATIONS BETWEEN POINTS IN NEW JERSEY AND NEW YORK

Upon consideration of a plan for joint action filed with the Office of Defense Transportation by the persons named in Appendix 1 hereof to facilitate compliance with the requirements and purposes of General Order ODT 3, Revised, as amended, (7 F.R. 5445, 6689, 7694; 8 F.R. 4660, 14582; 9 F.R. 2793, 3264, 3357, 6778) a copy of which plan is attached hereto as Appendix 2,[1] and

It appearing that the proposed coordination of operations is necessary in order to assure maximum utilization of the facilities, services, and equipment, and to conserve and providently utilize vital equipment, materials, and supplies, of the carriers, and to provide for the prompt and continuous movement of necessary traffic, the attainment of which purposes is essential to the successful prosecution of the war, *It is hereby ordered*, That:

1. The plan for joint action above referred to is hereby approved and the carriers are directed to put the plan in operation forthwith, subject to the following provisions, which shall supersede any provisions of such plan that are in conflict therewith.

2. Each of the carriers forthwith shall file a copy of this order with the appropriate regulatory body or bodies having jurisdiction over any operations affected by this order, and likewise shall file, and publish in accordance with law, and continue in effect until further order, tariffs or supplements to filed tariffs, setting forth any changes in rates, charges, operations, rules, regulations, and practices of the carrier which may be necessary to accord with the provisions of this order and of such plan; and forthwith shall apply to such regulatory body or bodies for special permission for such tariffs or supplements to become effective on the shortest notice lawfully permissible, but not prior to the effective date of this order.

3. The provisions of this order shall not be so construed or applied as to require any carrier subject hereto to perform any service beyond its transportation capacity, or to authorize or require any act or omission which is in violation of any law or regulation, or to permit any carrier to alter its legal liability to any shipper. In the event that compliance with any term of this order, or effectuation of any provision of such plan, would conflict with, or would not be authorized under, the existing interstate or intrastate operating authority of any carrier subject hereto, such carrier forthwith shall apply to the appropriate regulatory body or bodies for the granting of such operating authority as may be requisite to compliance with the terms of this order, and shall prosecute such application with all possible diligence. The coordination of operations directed by this order shall be subject to the carriers' possessing or obtaining the requisite operating authority.

5. All records of the carriers pertaining to any transportation performed pursuant to this order and to the provisions of such plan shall be kept available for examination and inspection at all reasonable times by accredited representatives of the Office of Defense Transportation.

6. Withdrawal of a carrier from participation in the plan for joint action hereby approved shall not be made without prior approval of the Office of Defense Transportation.

7. The provisions of this order shall be binding upon any successor in interest to any carrier named in this order. Upon a transfer of any operation involved in this order, the successor in interest and the other carriers named in this order forthwith shall notify, in writing, the Office of Defense Transportation of the transfer and, unless and until otherwise ordered, the successor in interest shall perform the functions of his predecessor in accordance with the provisions of this order.

[Region IV Order G–3 Under MPR 280, Amdt. 2]

FLUID MILK IN ATLANTA REGION

Amendment 2 to Order G–3 under Maximum Price Regulation No. 280, as amended. Maximum prices for specific

food products. Maximum prices for interhandler sales of bulk fluid milk.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of Region IV of the Office of Price Administration by § 1351.817a of Maximum Price Regulation 280, as amended: *It is hereby ordered,* That a new paragraph (h) (3) be added following paragraph (h) (2) to read as set forth below:

(h) * * *

(3) *Reporting requirements.* (i) On or before August 15, 1944, every primary handler subject to the provisions of this order shall file with the Regional Office of Office of Price Administration, Atlanta, Georgia, a report in letter form setting forth the method employed in computing the "handler's fluid milk cost" defined in paragraph (j) (6) (i) and (j) (6) (ii) below. This statement shall include the quantities of "fluid milk" purchased from producers (or taken from members of a cooperative) at each different price, reduced to a basis of 3.5% butterfat content, during the month of July, August, and December, 1943. Prices shall be converted to a basis of f. o. b. handler's plant if necessary; and in all such cases the report shall include the prices actually paid f. o. b. farm or other point, and the transportation allowances added thereto.

EXAMPLE 1

Month	Purchases of milk (lbs.)	Base price per cwt. f. o. b. plant, 4% butterfat	Price per cwt. converted to 3.5% butterfat	Total payments at 3.5%
July 1943	750,000	$3.00	$2.75	$20,625.00
Aug. 1943	600,000	3.00	2.75	16,500.00
Dec. 1943	400,000	3.20	2.95	11,800.00
Dec. 1943	200,000	3.30	3.05	6,100.00
Total	1,950,000			55,025.00

Average price of 3.5% milk, as purchased during all three months is $2.82 per cwt. ($55,025.00 divided by 1,950,000 lbs. or 19,500 cwts.). Lowest price paid during December for 3.5% milk is $2.95. Therefore, "Handler's Fluid Milk Cost" is $2.95 (the higher of the two preceding items).

EXAMPLE 2

Month	Purchases of milk	Price per lb. butterfat f. o. b. plant	Price converted to 3.5% butterfat per cwt.	Total payments at 3.5%
July 1943	70,000 gals. or 602,000 lbs.	$0.80	$2.80	$16,856.00
Aug. 1943	60,000 gals. or 516,000 lbs.	.80	2.80	14,448.00
Dec. 1943	35,000 gals. or 301,000 lbs.	.75	2.62½	7,901.25
Totals	165,000 gals. or 1,419,000 lbs.			39,205.25

Average price of 3.5% milk, as purchased during all three months is $2.76 per cwt. ($39,205.25 divided by 14,190 cwts.). Lowest price paid during December is $2.62½ per cwt. for 3.5% milk. Therefore, "Handler's Fluid Milk Cost" is $2.76 (the higher of the two preceding items).

EXAMPLE 3

Month	Purchases of milk	Price per gallon "flat" f. o. b. plant	Price per cwt. for 3.5% milk	Total payments at 3.5%
July 1943	50,000 gals. or 430,000 lbs.	$0.30	$3.49	$15,000.00
Aug. 1943	40,000 gals. or 344,000 lbs.	.30	3.49	12,000.00
Dec. 1943	30,000 gals. or 258,000 lbs.	.32	3.72	9,600.00
Totals	120,000 gals. or 1,032,000 lbs			36,600.00

Average price of 3.5% milk, as purchased during all three months is $3.55 per cwt. ($36,600.00 divided by 10,320 cwts.). Lowest price paid during December is $3.72 per cwt. for 3.5% milk. Therefore, "Handler's Fluid Milk Cost" is $3.72 per cwt. or 32 cents per gallon (the higher of the two preceding items).

EXAMPLE 4

Month	Purchases of milk (lbs.)	Price per lb. butterfat f. o. b. plant	Price per cwt. for 3.5% milk f. o. b. plant	Total payments at 3.5%
July 1943	200,000	$0.60	$2.10	$4,200.00
Aug. 1943	180,000	.60	2.10	3,780.00
Dec. 1943	100,000	.62	2.17	2,170.00
May 1944	225,000	.68	2.38	5,355.00

See paragraph (j) (6) (ii) below. Since this handler paid a price lower than the equivalent of $2.75 for 4% milk all during July, August and December, 1943, the "Handler's Fluid Milk Cost" is his actual price paid at any time, f. o. b. plant and converted to 3.5% butterfat base, provided such price does not exceed $2.75 for 4% milk or its equivalent. In other words, the "Handler's Fluid Milk Cost" is $2.38 per cwt. in May 1944.

(ii) On or before August 15, 1944, every handler who made sales of "fluid milk" during the months of January, February or March 1944, to purchasers within the meaning of this order shall file a report in letter form with the Regional Office of the Office of Price Administration, Atlanta, Georgia, which shall contain the following information:

1. The names and addresses of such purchasers.

2. The type or types of transportation employed in deliveries to each purchaser.

3. The distance from the handler's plant to the purchaser's plant (if deliveries of "fluid milk" were made by the handler and the invoices included a charge for such deliveries).

4. The charge per load, per cwt. or per gallon added to the handler's f. o. b. plant price of "fluid milk" to each purchaser during January, February or March, 1944. If a given purchaser was charged for delivery by more than one method during January, February or March, 1944, all types of such delivery charges to that purchaser must be set forth in this report.

This order shall become effective June 29, 1944.

NOTE: The reporting and record keeping provisions of this amendment have been approved by the Bureau of the Budget (No. 08-R 480.2) in accordance with Federal Reports Act of 1942.

Issued June 24, 1944.

[Indianapolis Order G-3 Under MPR 154]

ICE IN INDIANA

Order No. G-3 under Maximum Price Regulation No. 154 as amended. Adjusting the maximum prices of ice sold in the State of Indiana (except Lake County) in cities of less than fifty thousand population.

For the reasons set forth in an opinion issued simultaneously herewith, and under authority vested in the Regional Office of the Office of Price Administration, Region III, by Maximum Price Regulation No. 154, as amended, and pursuant to the delegation of such authority to the Indianapolis District Office by Delegation Order No. 1-A, Revised, issued March 11, 1944, it is hereby ordered:

SECTION 1. *What this order does.* This order fixes maximum prices for sales of block ice by manufacturers and dealers. It also fixes maximum prices for certain sales made to dealers at wholesale.

SEC. 2. *Maximum prices.* On and after the effective date of this order, regardless of any contract, agreement or other obligation, no person, firm or corporation subject to the provisions of this order shall sell or deliver or agree to sell or deliver any quantity of ice in excess of the maximum price set out in Appendix A to this order: *Provided, however,* That in any case where any person has heretofore established higher prices for ice by reason of his prices during the base period, April, 1943, or whose prices have heretofore been adjusted by the Office of Price Administration, and whose prices are higher than those set out in Appendix A, shall not be effected by this order, and he may continue to charge such prices, even though such prices exceed those set out and listed in Appendix A: *Provided, however,* That the maximum prices stated in Appendix A of this order shall constitute the maximum prices of the manufacturers and dealers who elect to operate under them, and when such prices are accepted, may not be accepted in part but shall apply to all categories of sales listed in said appendix. Any seller may, however, sell for less than the maximum price.

SEC. 3. *Applicability of order.* This order and the schedule of prices fixed in Appendix A shall, save as excepted herein, apply to all manufacturers and dealers of ice in the Indianapolis District, except in all cities having a population of 50,000 or more. It is provided, however, that this order shall not be construed to mean that specially prepared ice (such as ice cubes, snow ice or sized ice, generally) is to be affected by this order, except that specially prepared ice now selling at prices less than those stated in the appendix for block ice, may be increased to equal, but not to exceed, the prices stated in the appendix.

SEC. 4. *Definitions.* When used in this order the following terms shall have the following meanings:

(a) "Platform sale" is the sale of ice, delivery of which is made to the purchaser at the seller's place of business.

(b) "Delivered sale" is a sale of ice to a purchaser at a point other than the seller's place of business.

(c) "Person" means individual, corporation, partnership, association, or other organized group of persons or the legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, any other Government or any political subdivision or any agency of the foregoing. Unless the context otherwise requires, definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, in the General Maximum Price Regulation, and Maximum Price Regulation No. 154, issued by the Office of Price Administration, shall apply to other terms used herein.

SEC. 5. *Relations to other regulations.* All the provisions of Maximum Price Regulation 154 shall apply to those operating under this order, including the requirement to give the purchaser a slip or receipt upon a request made for the same as evidence of the purchase in connection with such sale, retaining a copy for his files.

SEC. 6. *Evasion.* The price limitations set forth in this order shall not be evaded, either directly or indirectly, by any scheme or device or by any practice which is used to get the effect of higher than maximum price. The prices established by this order are maximum prices for the commodities and all services ordinarily rendered in connection with the sale of such commodities. Therefore, you may not charge any additional amounts for any services ordinarily connected with the sale of these commodities.

SEC. 7. *Licensing.* The provisions granting licenses to all persons who make sales under price control shall apply to every seller subject to the provisions of this order. Those sections provide in brief that a license is required of all persons selling commodities for which ceiling prices are established. The license is automatically granted and it is not necessary to apply for the same. Such license may be suspended for violation in

connection with the sale of any commodity for which ceiling prices are established. No person whose license is suspended may sell any such commodity during the period of suspension.

SEC. 8. *Enforcement.* On and after the effective date of this order, any person who sells ice at a higher price than the maximum price permitted by this order, or otherwise violates any of the provisions hereof, shall be subject to the criminal penalties, civil enforcement action, license suspension proceedings and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 9. *Order in conformity with Emergency Price Control Act.* It is found that the adjustments herein made will not create or tend to create a shortage or a need for an increase in prices in any other locality and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

SEC. 10. *Revocability.* This order may be revoked, amended or corrected at any time by the Office of Price Administration.

This order shall become effective July 2, 1944.

(56 Stat. 23, 765; Pub. Law 151, 78th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681)

Issued: June 29, 1944.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 70–307]

LUZERNE COUNTY GAS AND ELECTRIC CORPORATION

ORDER GRANTING APPLICATION FOR MODIFICATION OF PREVIOUS ORDER

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 5th day of July 1944.

Luzerne County Gas and Electric Corporation (Luzerne), a subsidiary of The United Gas Improvement Company, a registered holding company, having filed an application requesting the modification of an order issued by this Commission on May 27, 1941 (Holding Company Act Release No. 2784), whereunder a restrictive condition was imposed in respect of an application filed by Luzerne under section 6 (b) of the act regarding the issue and sale by Luzerne of new preferred stock and serial notes for the purpose of redeeming and retiring its then outstanding preferred stock, such condition having been as follows:

Luzerne shall not declare or pay any dividends (other than dividends payable in shares of its common stock) on any shares of its common stock, nor shall Luzerne make any other distribution on its common stock or purchase or retire any shares of its common stock out of net income unless the earned surplus after making such declaration, payment, distribution, purchase or retirement is equal to or greater than the sum of $183,261 plus an accumulative amount equal to $60,000 per calendar year beginning with the year 1941 and continuing until the cost of retiring the presently outstanding $6 and $7 Dividend Cumulative Preferred Stock shall have been completely amortized, and thereafter an accumulative amount equal to $190,000 per calendar year to continue until the total earned surplus so accumulated, and unavailable for common stock dividends, shall equal $1,500,000: *Provided, however,* That such earned surplus required to remain after declaration or payment of such dividends or after such distribution, purchase, or retirement may be reduced for the purpose of this computation by the amount of any surplus adjustments resulting from writing down or writing off the excess of carrying value of property now owned by Luzerne over the original cost of such property when first devoted to public use;

and

The Pennsylvania Public Utility Commission, by order dated February 7, 1944, having directed Luzerne to, among other things, dispose of an aggregate excess over original cost of $2,412,933, as found by that Commission, by charging off $188,014 forthwith against, for the most part, the Reserve for Depreciation-Electric, and amortizing the balance of $2,224,919 through the period from 1944 to 1958, inclusive, by annual charges to the account entitled Miscellaneous Amortization, as follows:

1944	$29,955
1945	66,672
1946–58, 13 years at approximately $163,714 per year	2,128,292
	2,224,919

The order of the Pennsylvania Public Utility Commission having further provided that no portion of the restricted earned surplus of Luzerne amounting to $348,261 at December 31, 1943, should be available for common stock dividends until such time as the excess of $2,224,919 had been completely eliminated but that the company could at any time use such surplus to reduce the excess; and

Said application having been filed on June 10, 1944, and notice of said filing having been duly given, and the Commission not having received a request for hearing with respect to said application within the period described in said notice or otherwise, and not having ordered a hearing thereon; and

It appearing to the Commission that the provisions of the order dated February 7, 1944, of the Pennsylvania Public Utility Commission and the general improvement in Luzerne's financial condition make the condition hereinabove set forth imposed by the order of this Commission under date of May 27, 1941 no longer necessary, and that the granting of the requested modification would not be detrimental to the public interest or to the interests of investors or consumers.

It is hereby ordered, That our order of May 27, 1941 in the above styled and numbered cause (Holding Company Act Release No. 2784) is hereby modified by

deleting therefrom paragraph (3) of the terms and conditions of said order, such paragraph being quoted above; *Provided, however,* That Luzerne County Gas and Electric Corporation shall notify this Commission immediately of any modifications which may be made in the provisions of the Pennsylvania Public Utility Commission's order of February 7, 1944 as referred to above.

It is further ordered, That all other provisions of said order of May 27, 1941 in this matter shall remain in full force and effect until further order of this Commission.

By the Commission.
